Walking one day in the woods behind her cottage in Devon, nature illustrator and blogger Jo Brown became captivated by the sight of a Green Dock Beetle on a leaf and took a photograph of it in order to be able to draw it. That first tiny emerald bug was followed by more insects, and then birds, fungi, plants and flowers. The result is *Secrets of a Devon Wood*, a rich illustrated memory of her discoveries in the order in which she encountered them, so that the book flows smoothly with the seasons and the emergence of different wildlife. In enchanting, minute detail she zooms in on a bog beacon mushroom, a buff-tailed bumblebee, or a native bluebell. And she notes facts about their physiology and life history: "The flowers are narrow & darker than *H. hispanica* & *H.x. mossartiana*," she writes. "Drooping stem. Almost all flowers are on one side. Sweet scent." This journal is a treat for the senses, both a hymn to the intricate beauty of the natural world and a quiet call to arms for all of us to acknowledge and preserve it.
