**Poole's Textbook on Contract Law** OUP  
Oxford  
European Contract Law unification projects have recently advanced from the Draft Common Frame

of Reference (2009) to a European Commission proposal for an optional Common European Sales Law (2011) which is to facilitate cross-border marketing. This book investigates for the first time how CESL and DCFR rules would interact with various

aspects of domestic law, represented by English and German law. Nineteen chapters, co-authored by British and German scholars, examine such interface issues for eg pre-contractual relationships, notions of contract, formation, interpretation, and remedies, extending to non-discrimination, third parties, transfers or rights, aspects of property law, and collective proceedings. They go beyond a critical analysis of CESL and DCFR rules by demonstrating where and how CESL rules would interact with neighbouring areas of English and German law before English and German courts, how domestic traditions might influence the application, which aspects might motivate

sellers and buyers to choose or reject CESL, and which might serve as model for national legislators. The findings are summarized in the final two chapters.

**Comparative Remedies for Breach of Contract**

Oxford University Press, USA

This book offers students a firm understanding of the central doctrines and the controversies associated with them. Presenting a unique balance of 1/3 text to 2/3 cases and materials, the book can be used both as a stand alone text or as a companion volume to a textbook.

Comprehensive coverage is presented in a logical structure that maps closely onto courses and stimulating

commentary is delivered through detailed introductions, extract notes and extensive comments within each chapter. Extended extracts illustrate points clearly and promote the essential skills of case-reading, encouraging more detailed analysis of salient points, while analysis of key academic commentaries on issues of controversy, contract clauses etc is also included to provide a well-rounded discussion. Extracts from materials such as the Principles of European Contract Law and the UNIDROIT Principles for International Commercial Contracts are incorporated throughout to provide a useful point of comparison with

English Law - encouraging critical reflection upon the state of the English system and illustrating how the law of contract is regarded in other jurisdictions. Specimen clauses are also cited to demonstrate some of the practical problems that confront both businessmen and lawyers, offering students working examples of complex issues. Questions are placed at key points throughout the text to encourage further consideration and reflection of complex or controversial issues, while extensive referencing promotes further research. Written in a familiar and engaging style, this book offers a thought-provoking and well-balanced argument aimed

squarely at undergraduates. It is essential reading for any student of contract law, and a valuable source of reference for practitioners and academics. *Contract Law* Oxford University Press, USA The third edition of *The Principles of the Law of Restitution* brings this widely cited and influential volume fully up to date. It has been substantially rewritten

to reflect the significant changes in the law of restitution and the expansion in the theoretical and critical commentary on the subject. Following important decisions of the Supreme Court and other courts, large-scale changes have been made to the chapters on enrichment, at the expense of the claimant, mistake, claims against public authorities, and change of position. Additionally, this edition contains a new chapter on the operation of juridical bars on restitutionary claims. References to developments in other jurisdictions have been expanded for this edition, reflecting the significance of these changes and how they assist in the

interpretation of English law and provide a basis for criticising that law. Further, in the light of leading cases and the contributions of restitutionary scholars around the world, the author's views on specific controversial debates about the ambit, function, and interpretation of the subject have changed, sometimes radically. One significant aspect of the book remains unchanged: the book continues to focus on the identification and analysis of the principles which underpin the law of restitution as a whole, but with reference to its three distinct parts: unjust enrichment, restitution for wrongs, and the vindication of property rights. This approach provides the

reader with a peerless guide to the law of restitution.

common, and mixed law jurisdictions. *Contract Law* Oxford University Press, USA This edited collection brings together leading scholars and practitioners from various jurisdictions with essays and commentaries coordinated around the theme of alignments and misalignments between commercial law and commercial practice. The purpose of the book is to prompt a more critical and constructive reassessment of current commercial law and its practices, and to instigate a more fruitful dialogue between academics, judges, law reformers and practitioners. The result is a series of provocative and challenging essays addressing an

enormous range of problems that are of intimate concern to commercial practice. Some essays focus on broad themes, such as globalization and trust. Others address more specific issues, such as contract interpretation or constraining modern management. Yet another group targets special problems, such as dematerialisation or super-priority, in order to assess the success of commercial law in meeting commercial demands. The depth and breadth of issues addressed is a credit to the authors.
