As an American educator with decades of experience, Dr. Deborah J. Rhea had a burning desire to know why Finland's educational system was top ranked in the world, while the United States fell in the middle of the pack. She made it her mission to learn what she could. Rhea took a six-week trip to Finland, where she lived and learned from the best in their schools and government. During that period, her observations revealed that her generation experienced life and education very differently

from children today. The philosophies and principles she saw reflected in the Finnish educational system helped open her eyes to the many wrong turns that the United States has made in education over the last thirty years. What's more, Rhea presents the right moves needed to get the country back on track for a healthier, happier method of educating children. In this study, an experienced educator compares the educational approaches of Finland and the United States, considering ways that the latter might be adjusted and improved.

I guess I always felt even if the world came to an end, McDonald's still would be open. High school sophomore Miranda's disbelief turns to fear in a split second when an asteroid knocks the moon closer to Earth, like "one marble hits another." The result is catastrophic. How can her family prepare for the future when worldwide tsunamis are wiping out the coasts, earthquakes are rocking the continents, and volcanic ash is blocking out the sun? As August turns dark and wintery in northeastern Pennsylvania, Miranda, her two brothers, and their mother retreat to the unexpected safe haven of their sunroom, where they subsist on stockpiled food and limited water in the warmth of a wood-burning stove. Told in a year's worth of journal entries, this heart-pounding story chronicles Miranda's struggle to hold on to the most important resource of all--hope--in an increasingly desperate and unfamiliar world. Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control - from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and

“fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

An enthralling journey into the world of chess--a story of heartbreak, obsession, failure, and the hunger for greatness. Sasha Chapin is a victim of chess. Like countless amateurs before him--Albert Einstein, Humphrey Bogart, Marcel Duchamp--the game has consumed his life and his mind. First captivated by it as a member of his high school chess club, his passion was rekindled during an accidental encounter with chess hustlers on the streets of Kathmandu. In its aftermath, he forgot how to care about anything else. He played at all hours, for weeks at a time. Like a spurned lover, he tried to move on, but he found the game more seductive the more he resisted it. And so, he thought, if he can't defeat his obsession, he had to succumb to it. *All the Wrong Moves* traces Chapin's rollicking two-year journey around the globe in search of glory. Along the way, he chronicles the highs and lows of his fixation, driven on this quest by lust, terror, and the elusive possibility of victory. Stylish, inventive, and laugh-out-loud funny, *All the Wrong Moves* is a celebration of the purity, violence, and beauty of the game.

In this groundbreaking book, Keith Law, baseball writer for *The Athletic* and author of the acclaimed *Smart Baseball*, offers an era-spanning dissection of some of the best and worst decisions in modern baseball, explaining what motivated them, what can be learned from them, and how their legacy has shaped the game. For years, Daniel Kahneman's iconic work of behavioral science *Thinking Fast and Slow* has been required reading in front offices across Major League Baseball. In this smart, incisive, and eye-opening book, Keith Law applies Kahneman's ideas about decision making to the game itself. Baseball is a sport of decisions. Some are so small and routine they become the building blocks of the game itself—what pitch to throw or when to swing away. Others are so huge they dictate the future of franchises—when to make a strategic trade for a chance to win now, or when to offer a millions and a multi-year contract for a twenty-eight-year-old star.

These decisions have long shaped the behavior of players, managers, and entire franchises. But as those choices have become more complex and data-driven, knowing what's behind them has become key to understanding the sport. This fascinating, revelatory work explores as never before the essential question: What were they thinking? Combining behavioral science and interviews with executives, managers, and players, Keith Law analyzes baseball's biggest decision making successes and failures, looking at how gambles and calculated risks of all sizes and scales have shaped the sport, and how the game's ongoing data revolution is rewriting decades of accepted decision making. In the process, he explores questions that have long been debated, from whether throwing harder really increases a player's risk of serious injury to whether teams actually "overvalue" trade prospects. Bringing his analytical and combative style to some of baseball's longest running debates, Law deepens our knowledge of the sport in this entertaining work that is both fun and deeply informative.
