

# Unisa Applications Dates For 2015

Yeah, reviewing a book **Unisa Applications Dates For 2015** could go to your near connections listings. This is just one of the solutions for you to be successful. As understood, execution does not recommend that you have wonderful points.

Comprehending as without difficulty as bargain even more than further will provide each success. bordering to, the statement as capably as sharpness of this Unisa Applications Dates For 2015 can be taken as capably as picked to act.

Unisa Applications Dates For 2015 by guest

## REEVES EWING

### Innovative Applications of Online Pedagogy and Course Design Springer

New tools and technologies are being developed to cater to the e-learning triangle of content, technology, and services. These developments (in technology, needs of students, emergence of new modes of education like MOOCs or flipped classrooms, etc.) have resulted in a change in the approach to teaching. *Innovative Applications of Online Pedagogy and Course Design* is a critical publication that explores e-learning as a tool for instructional delivery across various kinds of educational institutions and at all levels. Featuring coverage on a wide range of topics such as distance education, cumulative sentence analysis, and primary teacher training, this book is geared toward educators, professionals, school administrators, researchers, and practitioners seeking current and relevant research on instructional design and delivery in online and technology-based courses.

*Being a Systems Psychodynamic Scholar* John Wiley & Sons  
Sadly, the same cannot be said about scholarly publishing which to all intents and purposes continues to remain the flotsam and jetsam of the African publishing landscape. --

*Regional Perspectives of Nature-based Solutions for Water: Benefits and Challenges* IGI Global

*A Handbook on Legal Languages and the Quest for Linguistic Equality in South Africa and Beyond* is an interdisciplinary publication located in the discipline of forensic linguistics/ language and law. This handbook includes varying comparative African and global case studies on the use of language(s) in courtroom discourse and higher education institutions: Kenya; Morocco; Nigeria; Australia; Belgium Canada and India. These African and global case studies form the backdrop for the critique of the monolingual English language of record policy for South African courts, the core of this handbook, discussed in relation to case law and the beleaguered legal interpretation profession. This handbook argues that linguistic transformation and decolonisation of South Africa's legal and higher education systems needs to be undertaken where legal practitioners are linguistically equipped to litigate in a bilingual/ multilingual courtroom that enables access to justice for the majority of African language speaking litigants, enforcing their constitutional language rights.

*Business Education and Ethics: Concepts, Methodologies, Tools, and Applications* IGI Global

In this edited collection, the authors pick up the communities of practice (CoP) approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality. Their stories articulate the vision, the passion and the challenge of working within and/or changing existing institutional culture and practice. The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers. The multiple perspectives provided in the case studies will assist higher education leaders, as well as academic and professional staff, in establishing or assessing CoPs. The book offers insights into implementation strategies, practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context.

*Focus on Bio-Image Informatics* NYU Press

This book addresses the emerging needs of the aerospace industry by discussing recent developments and future trends of aeronautic materials. It is aimed at advancing existing materials and fostering the ability to develop novel materials with less weight, increased mechanical properties, more functionality, diverse manufacturing methods, and recyclability. The development of novel materials and multifunctional materials has helped to increase efficiency and safety, reduce costs, and decrease the environmental foot print of the aeronautical industry. In this book, integral metallic structures designed by disruptive concepts, including topology optimization and additive manufacturing, are highlighted.

*ECRM2015-Proceedings of the 14th European Conference on Research Methods 2015* Emerald Group Publishing

This multidisciplinary book delves into information systems' concepts, principles, methods and procedures and their innovative applications in management science and other domains, including business, industry, health care and education. It will be valuable to students, researchers, academicians, developers, policymakers and managers thriving to improve their information and management systems, develop new strategies to solve complex problems and implement novel techniques to utilise the massive data best. This book of Information Systems

and Management Science (proceedings of ISMS 2021) is intended to be used as a reference by scholars, scientists and practitioners who collect scientific and technical contributions concerning models, tools, technologies and applications in the field of information systems and management science. This book shows how to exploit information systems in a technology-rich management field.

**Scholarly Publishing in Africa** African Books Collective  
This volume of *Advances Anatomy Embryology and Cell Biology* focuses on the emerging field of bio-image informatics, presenting novel and exciting ways of handling and interpreting large image data sets. A collection of focused reviews written by key players in the field highlights the major directions and provides an excellent reference work for both young and experienced researchers.

**Business Events** Academic Conferences and publishing limited  
Cloud computing has experienced explosive growth and is expected to continue to rise in popularity as new services and applications become available. As with any new technology, security issues continue to be a concern, and developing effective methods to protect sensitive information and data on the cloud is imperative. *Cloud Security: Concepts, Methodologies, Tools, and Applications* explores the difficulties and challenges of securing user data and information on cloud platforms. It also examines the current approaches to cloud-based technologies and assesses the possibilities for future advancements in this field. Highlighting a range of topics such as cloud forensics, information privacy, and standardization and security in the cloud, this multi-volume book is ideally designed for IT specialists, web designers, computer engineers, software developers, academicians, researchers, and graduate-level students interested in cloud computing concepts and security.

*Strategies for Facilitating Inclusive Campuses in Higher Education* Springer

This book fills an important gap in the literature, and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as "living labs" in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability, and in an integrated manner. The aims of this book, which is an outcome of the "4th World Symposium on Sustainable Development at Universities" (WSSD-U-2018), held in Malaysia in 2018, are as follows: i. to document the experiences of universities from all around the world in curriculum innovation, research, activities and practical projects as they relate to sustainable development at the university level; ii. to disseminate information, ideas and experiences acquired in the execution of projects, including successful initiatives and good practice; iii. to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv. to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting and many reflect practice-based experiences, some of which may be replicable elsewhere. Also, this book, prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), reinforces the role played by universities as living labs for sustainable development.

**Information Systems and Management Science** Academic Conferences and publishing limited

This two-volume set LNCS 13315 and 13316 constitutes the refereed proceedings of the 14th International Conference on Social Computing and Social Media, SCSM 2022, held as part of the 24rd International Conference, HCI International 2022, which took place in June-July 2022. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 275 posters included in the 40 HCII 2022 proceedings volumes was carefully reviewed and selected from 5583 submissions. The papers of SCSM 2022, Part II, are organized in topical sections named: social media in education; customer experience and consumer behavior.

**Graph-Based Representations in Pattern Recognition** IGI Global

BIODIESEL This outstanding new volume provides a comprehensive overview on biodiesel technologies, covering a broad range of topics and practical applications, edited by one of the most well-respected and prolific engineers in the world and his team. Energy technologies have attracted great attention due

to the fast development of sustainable energy. Biodiesel technologies have been identified as the sustainable route through which overdependence on fossil fuels can be reduced. Biodiesel has played a key role in handling the growing challenge of a global climate change policy. Biodiesel is defined as the monoalkyl esters of vegetable oils or animal fats. Biodiesel is a cost-effective, renewable, and sustainable fuel that can be made from vegetable oils and animal fats. Compared to petroleum-based diesel, biodiesel would offer a non-toxicity, biodegradability, improved air quality and positive impact on the environment, energy security, safe-to-handle, store and transport and so on. Biodiesels have been used as a replacement of petroleum diesel in transport vehicles, heavy-duty trucks, locomotives, heat oils, hydrogen production, electricity generators, agriculture, mining, construction, and forestry equipment. This book describes a comprehensive overview, covering a broad range of topics on biodiesel technologies and allied applications. Chapters cover history, properties, resources, fabrication methods, parameters, formulations, reactors, catalysis, transformations, analysis, in situ spectroscopies, key issues and applications of biodiesel technology. It also includes biodiesel methods, extraction strategies, biowaste utilization, oleochemical resources, non-edible feedstocks, heterogeneous catalysts, patents, and case-studies. Progress, challenges, future directions, and state-of-the-art biodiesel commercial technologies are discussed in detail. This book is an invaluable resource guide for professionals, faculty, students, chemical engineers, biotechnologists, and environmentalists in these research and development areas. This outstanding new volume: Summarizes the recent developments in this rapidly-developing, multi-disciplinary field Provides the reader with a practical understanding of biodiesel technology toward the real-world applications Formulates concepts, case-studies, patents, and applications helpful in decision making and problem-solving, in a single resource Delivers state-of-the-art information on biodiesel technology Audience: Chemical and process engineers and other professionals, faculty, students, scientists, biotechnologists, and environmental engineers

**Handbook of Research on Emerging Theories, Models, and Applications of Financial Econometrics** Springer

This book gathers interdisciplinary reflections from researchers, educators, and other experts on the subject of biodiversity closer to education and learning. The book also highlights its role as an added value to strategic principles for healthy ecosystems and sustainable human development. It promotes critical thinking and foster practices and attitudes for Education for Sustainable Development reconciling education with principles of human behaviour and nature. Readers especially find this book a timely resource in light of the Strategic Plan for Biodiversity 2011-2020, the Aichi Targets, and the new EU biodiversity strategy "Our life insurance, our natural capital: an EU biodiversity strategy to 2020". Along with the challenge of ecosystems and public health, biodiversity conservation is essential for humanity's continued security and sustainability, as it touches on all aspects of people's lives.

**Higher Education and Sustainability** Springer Nature

Filled with over 65 valuable case studies, role plays, video-based discussions, simulations, reflective exercises and other experiential activities, *Teaching Human Resource Management* enables HR professors, practitioners and students at all levels, to engage and enhance knowledge and skills on a wide range of HR concepts. This book breathes life into the teaching of Human Resource Management and readers will be able to better relate theoretical concepts to workplace decisions and dilemmas.

*ICEL 2017 - Proceedings of the 12th International Conference on e-Learning* Taylor & Francis

The publication provides the first comprehensive text that reflects on a century of the development of geography as an academic discipline at South African universities. The book showcases a broad and textured review of South Africa's geography departments, their staff members, their times, and the different Geographies they engaged in. The book lays the foundation from which more expansive individual departmental histories can be written in the future.

**Biodiversity and Education for Sustainable Development** Springer

*Biologically Active Peptides: From Basic Science to Applications for Human Health* stands as a comprehensive resource on bioactive peptide science and applications. With contributions from more than thirty global experts, topics discussed include bioactive peptide science, structure-activity relationships, best practices for their study and production, and their applications. In the interdisciplinary field of bioactive peptides, this book bridges the gap between basic peptide chemistry and human physiology,

while reviewing recent advances in peptide analysis and characterization. Methods and technology-driven chapters offer step-by-step guidance in peptide preparation from different source materials, bioactivity assays, analysis and identification of bioactive peptides, encoding bioactive peptides. Later, applications across disease areas and medical specialties are examined in-depth, including the use of bioactive peptides in treating obesity, diabetes, osteoporosis, mental health disorders, food allergies, and joint health, among other disorders, as well as bioactive peptides for sensory enhancement, sports and clinical nutrition, lowering cholesterol, improving cardiovascular health, and driving advances in biotechnology. Discusses the latest advances in bioactive peptide chemistry, functionality and analysis Offers step-by-step instruction in applying new technologies for peptide extraction, protection, production and encoding, as well as employing bioactive peptide sequencing and bioactivity assays in new research Effectively links basic peptide chemistry, human biology and disease Features chapter contributions from international experts across disciplines and applications

*Universities, Sustainability and Society: Supporting the Implementation of the Sustainable Development Goals* AFRICAN SUN MeDIA

Today, gender inequality and diversity are at the forefront of discussion, as the issue has become an international concern for politicians, government agencies, social activists, and the general public. Consequently, the need to foster and sustain diversity and inclusiveness in the interactions among various groups of people is relevant today more than ever. *Gender and Diversity: Concepts, Methodologies, Tools, and Applications* provides a critical look at gender and modern-day discrimination and solutions to creating sustainable diversity across numerous contexts and fields. Highlighting a range of topics such as anti-discrimination measures, workforce diversity, and gender inequality, this multi-volume book is designed for legislators and policy makers, practitioners, academicians, gender studies researchers, and graduate-level students interested in all aspects of gender and diversity studies.

*Multilingualism and Intercultural Communication* Academic Conferences and publishing limited

The book provides descriptions of experiences from research and educational sustainability projects and the role HEIs can play together with contributions presenting a variety of initiatives showing how SDGs are being implemented. The book promotes the theoretical and practical understanding on this thematic and disseminates knowledge and international research and cooperation. Contributions cover the role of SDGs in advancing implementation of sustainable development, sustainability in higher education, the role of universities in sustainable development, new paths towards sustainable development and e-learning contributions. Features Focuses on theoretical and practical understanding on Sustainability, Higher Education and SDGs to disseminate knowledge and promote research and cooperation Includes lessons learned from sustainability research and educational challenges presenting case studies, technological developments, outputs of research and studies, best practices and examples of successful projects Discusses relevant and international perspectives on sustainability, higher education and SDGs Presents local and international contributions on a variety of initiatives showing how SDGs are being implemented

**Social Computing and Social Media: Applications in Education and Commerce** Springer Nature

The dynamic and fast-expanding business events sector plays a vital role in the professional lives of hundreds of millions of people worldwide by providing settings in which they can meet for the purposes of negotiation, deliberation, motivation, the dissemination of knowledge, and the celebration of their greatest career-related achievements. This book provides a sound practical and theoretical context for the study of this subject by covering, in depth, all categories of business-related events including corporate meetings, association conferences, political events, incentive travel, exhibitions, corporate hospitality, awards ceremonies and SMERF (social, military, educational, religious and fraternal) gatherings. This new edition has been extensively revised and updated to reflect recent developments in business events, including: Five new chapters on business events destination marketing, knowledge, sustainability, ethics and

technology New 'It's my job' voice boxes offering practical insights from people employed in the business events industry A wide range of new case studies illustrating business events throughout the world, including emerging business events destinations such as Russia and the Middle East Written in an accessible yet analytical manner, *Business Events* is essential reading for all students of events, tourism and hospitality management.

*Learning Analytics in Open and Distributed Learning* Academic Press

This volume brings together all the successful peer-reviewed papers submitted for the proceedings of the 43rd conference on Computer Applications and Quantitative Methods in Archaeology that took place in Siena (Italy) from March 31st to April 2nd 2015. *Universities as Living Labs for Sustainable Development* CRC Press

This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio (ePortfolio) in a range of disciplines at Australian universities. It explores the latest research on ePortfolios, teaching quality, future research directions for tertiary learning and teaching, institutional agendas in higher education, and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes. Included in these agendas is research into the development of higher education through the technologising of pedagogy, learner identities in discrete disciplines, and the praxis of individual university teachers. The book covers accounts of academic learning success and challenges across current higher education subject areas. By presenting case study accounts of ePortfolio use, it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research, teaching and learning at Australian universities. With an intentional research base, the book draws on work conducted inside and outside Australia and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student-created portfolio on teaching, learning, and subsequent academic scholarship.
