This eBook edition of "Meccania the Super-State" has been formatted to the highest digital standards and adjusted for readability on all devices. "Meccania the Super-State" (1918) - Set in future 1970: a young Chinese traveller named Ming Yuen-hwuy enters Meccania for a five-month stay. Ming's diary and notes describe his dreary and dehumanizing sojourn in a country where the militaristic government dominates social life. "Meccania" is a nation in Central Europe with obvious resemblances to Germany and surrounded by "Franconia" (France), "Luniland" (Britain), and "Lugrabria" (Russia). Here dissenters are sent to mental hospitals and concentration camps. The state maintains a eugenic breeding program, and commands its common citizens when to have children. All letters are censored, and all telephone conversations are monitored. All citizens wear the uniforms of their occupational classes and the works are not allowed to feel fatigued! A chilling reminder of what might have been if Nazis had won the War... Owen Gregory - Nothing is known about the author of this dystopian classic and most critics believed that it was a ruse to hide the true identity of the original "anonymous" author.

Written by locals, Fodor's travel guides have been offering expert advice for all tastes and budgets for 80 years. Known for its sophisticated resorts, British style, and warm inviting hospitality, Barbados is an island of broad vistas, sweeping seascapes, and acres of sugar cane. Mountainous St. Lucia is covered by rainforest that makes it one of the greenest islands in the Caribbean, and it also has vibrant coral reefs that draw scuba divers from all over the world. The two islands offer both all-inclusive and regular resorts and are linked by frequent air service, making the short hop in about 20 minutes. This travel guide includes:

- Dozens of full-color maps
- An 8-page color insert with a brief introduction and spectacular photos that capture the top experiences and attractions throughout Barbados & St. Lucia
- Hundreds of hotel and restaurant recommendations, with Fodor's Choice designating our top picks
- Multiple itineraries to explore the top attractions and what's off the beaten path
- Major sights such as Diamond Falls, Marigot Bay, and The Pitons

The essays in this volume are the revised texts of an eight-part public lecture series on West Indian cricket history and culture organized by the Centre for Cricket Research at the University of the West Indies, Cave Hill. An introductory essay by the editor, an interview with Viv Richards and two commentaries are also included. "Together they represent a tribute to Viv, as well as a substantial contribution to the historiography of West Indies cricket. While this material will serve students in the classroom well, we are sure that the public who participated in and enjoyed these lectures will wish to have this text in their possession for further engagement. It is therefore offered in this spirit of continuing dialogue." Introduction

Marine debris is a global pollution problem affecting marine life, maritime commerce and environmental quality. Scientists, policymakers and the public must be knowledgeable about the source, impact and control efforts if effective solutions are to be developed. Marine Debris addresses the origin of persistent solid waste in the ocean, from urban and rural discharges to waste from ships and the recreational use of oceans. The book identifies key issues from biological, technological, economic and legal perspectives, and gives a framework for controlling each of the main sources of marine debris.

This second volume on coastal tourism and climate change in the Caribbean examines three key supporting sectors: golf, local agriculture and cuisine, and aviation. Today, climate change is propelling accelerated reforms in these three sectors. Initiatives to link local agriculture to tourism are enriching visitor experiences and revitalizing local crops and cuisine, while reducing the carbon impact-the food print-from agricultural imports. Similarly, golf certification programs are providing templates for constructing and operating courses with smaller carbon footprints. In aviation, as well, virtually all international airlines are testing non-fossil fuel alternatives, and a nascent but growing green airport movement is reducing aviation's carbon footprint and improving its resilience. As the volume concludes, coastal tourism in the Caribbean is today addressing two intertwined concerns and opportunities: the impacts of climate change and imperative of responsible tourism.Ó

Explanation in Caribbean Migration e-artnow

North London cricket followers turned to their morning newspapers for eleven summers, in 1939 and from 1946 to 1955, to see how Robertson (J.D.) and Brown (S.M.) had fared as the Middlesex opening batsmen. They were not often disappointed. The pair opened the batting 366 times and their partnerships put on 14,116 runs, reaching 100 runs or more on 35 occasions. As memories of their endeavours fade, cricket enthusiasts nowadays have perhaps typecast them as the warm-up act to the prodigious talents of Bill Edrich and Denis Compton. But they were more than that. Even that curmudgeonly old critic E.M. Wellings thought Jack 'a beautifully fluent stroke-maker', and Syd 'a splendid county batsman'. He thought selectors looked too hard for flaws in Jack's top-class batting technique, thus restricting him to 11 test matches; and he reckoned Syd to be among the finest fielders in the deep. Using material from a wide range of sources, Chris Overson here writes on their early influences, their almost simultaneous start at Lord's in 1934, their inevitable cricketing ups and downs – often in those days before crowds of 10,000 or more – and their lives after they had left the field of play.
