Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior

exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. Philip Roth's bestselling alternate history—the chilling story of what happens to one family when America elects a charismatic, isolationist president—is soon to be an HBO limited series. In an extraordinary feat of narrative invention, Philip Roth imagines an alternate history where Franklin D. Roosevelt loses the 1940 presidential election to heroic aviator and rabid isolationist Charles A. Lindbergh. Shortly thereafter, Lindbergh negotiates a cordial “understanding” with Adolf Hitler, while the new government embarks on a program of folksy anti-Semitism. For one boy growing up in Newark, Lindbergh’s election is the first in a series of ruptures that threaten to destroy his small, safe corner of America—and with it, his mother, his father, and his older brother. “A terrific political novel . . . Sinister, vivid, dreamlike . . . creepily plausible. . . You turn the pages, astonished and frightened.” — The New York Times Book Review

From the author of the "wonderfully ingenious" (Marilyn Stasio, The New York Times Book Review) novel *After the Crash*, a thrilling tale of a murder that takes place in Claude Monet's garden and the mystery that surrounds it. Giverny, France. During the day, the town is the home of the famous artist Claude Monet and the gardens where he painted his Water Lilies. But once the tourists have gone, there is a darker side to the peaceful French village. This is the story of thirteen days that begin with one murder and end with another. Jéme Morval, a man whose passion for art was

matched only by his passion for women, has been found dead in the stream that runs through the gardens. In his pocket is a postcard of Monet's Water Lilies with the words: Eleven years old. Happy Birthday. Entangled in the mystery are three women: a young painting prodigy, the seductive village schoolteacher, and an old widow who watches over the village from a mill by the stream. All three of them share a secret. But what do they know about the discovery of Jéme Morval's corpse? And what is the connection to the mysterious, rumored painting of Black Water Lilies?

Hailed by Andre Gide as the patron saint of all outsiders, Simone Weil's short life was ample testimony to her beliefs. In 1942 she fled France along with her family, going firstly to America. She then moved back to London in order to work with de Gaulle. Published posthumously *The Need for Roots* was a direct result of this collaboration. Its purpose was to help rebuild France after the war. In this, her most famous book, Weil reflects on the importance of religious and political social structures in the life of the individual. She wrote that one of the basic obligations we have as human beings is to not let another suffer from hunger. Equally as important, however, is our duty towards our community: we may have declared various human rights, but we have overlooked the obligations and this has left us self-righteous and rootless. She could easily have been issuing a direct warning to us today, the citizens of Century 21.

A fascinating examination of the relationship between civilization and inequality from one of history's greatest minds The first man to erect a fence around a piece of land and declare it his own founded civil society—and doomed mankind to millennia of war and famine. The dawn of modern civilization, argues Jean-Jacques Rousseau in this essential treatise on human nature, was also the beginning of inequality. One of the great thinkers of the Enlightenment, Rousseau based his work in compassion for his fellow man. The great crime of despotism, he believed, was the raising of the cruel above the weak. In this landmark text, he spells out the antidote for man's ills: a compassionate revolution to pull up the fences and restore the balance of mankind. This ebook has been professionally proofread to ensure accuracy and readability on all devices.
