Social media are now widely used for political protests, campaigns, and communication in developed and developing nations, but available research has not yet paid sufficient attention to experiences beyond the US and UK. This collection tackles this imbalance head-on, compiling cutting-edge research across six continents to provide a comprehensive, global, up-to-date review of recent political uses of social media. Drawing together empirical analyses of the use of social media by political movements and in national and regional elections and referenda, The Routledge Companion to Social Media and Politics presents studies ranging from Anonymous and the Arab Spring to the Greek Aganaktismenoi, and from South Korean presidential elections to the Scottish independence referendum. The book is framed by a selection of keystone theoretical contributions, evaluating and updating existing frameworks for the social media age.

This collection of non-partisan reports focuses on 18 hot-button social policy issues written by award-winning CQ Researcher journalists. As an annual that comes together just months before publication, the volume is as current as possible. And because it's CQ Researcher, the social policy reports are expertly researched and written, showing all sides of an issue. Chapters follow a consistent organization, exploring three issue questions, then offering background, current context, and a look ahead, as well as featuring a pro/con debate box. All issues include a chronology, bibliography, photos, charts, and figures.

When the Committee published the Scrutiny Reform Report 18 months ago asked the Government to ensure that it responded to the Report within the customary two-month deadline. This did not happen, the Government response was received on the day the House rose for the summer recess, 22 July 2014, eight months after the Report's publication. Moreover, the tone of the Government's response to the key recommendations was overwhelmingly negative and did not sufficiently address our proposals, including those relating to the introduction of a form of national veto and the disapplication of EU law. In this Report the Committee first consider in more detail the background to, possible causes of and the implications of the Government's failure to schedule EU document debates, before turning to some of the other outstanding issues covered in the Scrutiny Reform Report, in particular papers deposit, limitâ documents, and the coverage of EU scrutiny and wider EU issues by the BBC. The Committee also sets out some outstanding scrutiny issues which the successor Committee may wish to consider, in particular scrutiny of the proposed EU-US Transatlantic Trade and Investment Partnership.

IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2015 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2015 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic

basis. Each chapter of International GAAP® 2015 deals with a key area of IFRS and has a common structure for ease of use: An introduction to the background issues An explanation of relevant principles A clear exposition of the requirements of IFRS A discussion of the implications in practice and possible alternative solutions available Worked examples Extracts from real company accounts A full listing of the required disclosures "...an important part to play in the process of promoting consistent, comparable and high quality financial reporting under IFRSs ... a book that not only provides an analysis of the requirements of the standards and the principles that they expound, but also presents a unique explanation of how the standards should be interpreted and applied in practice." —The Chairman of Trustees of the IASC Foundation "A standard reference work" —Financial Times "The definitive guide to financial reporting." —The Times
