School refusal affects up to 5% of children and is a complex and

stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

This study concentrates on three major issues creating a basis for the making of the "Czech-English Law Dictionary with Explanations", namely language, including terminology, in both the Czech and Anglo-American systems of law; the process of legal translation; and the lexicographic method of producing a bilingual law dictionary. Terminology has been considered the most significant feature of language for legal purposes. It encompasses a wide range of special-purpose vocabulary and higher syntactic units, including legal jargon. Conceptual analysis is to be pursued whenever an identical term in the target language does not exist or its full equivalent is in doubt. Legal translation should be based primarily on comparative legal, linguistic and genre analysis in order to make the transfer of legal information as precise, accurate and comprehensible as possible. The primary objective of legal translation is for the target recipient to be provided as explicit, extensive and precise legal information in the target language as is contained in the source text, complemented (by the translator) with facts rendering the original information fully comprehensible in the different legal environment and culture. A dictionary which will help its users to produce legal texts in the target language should be founded upon a profound comparative legal and linguistic analysis that will (a) determine equivalents at the levels of vocabulary, syntax and genre, (b) select the appropriate lexicographic material to be included in the dictionary, and (c) create entries in a user-friendly manner.
