What was once taboo -
 faith at work - is
 increasingly accepted in
 corporate America. From
 secretaries to CEOs,
 growing numbers of
 businesspeople today
 want to bring their faith to
 work. Yet they wrestle
 with how to do this
 effectively and
 appropriately in a
 pluralistic corporate
 setting. For help they turn
 not to their clergy, but to
 their peers and to a
 burgeoning cottage
 industry on spirituality at
 work. They attend
 conferences and
 seminars, participate in
 Bible study and prayer
 groups, and read books,
 blogs, and eNewsletters.
 They see their faith as a
 resource for ethical
 guidance and to help find
 meaning and purpose in
 their work. In *God at
 Work*, David W. Miller
 looks at how this Faith at
 Work movement
 developed and considers
 its potential value for
 business and society.

Done well, the integration
 of faith and work has
 positive implications at
 the personal level, as well
 as for corporate ethics
 and the broader economic
 sphere. At the same time,
 increasing expressions of
 religion and spiritual
 practices at work also
 present the threat of
 divisiveness and
 discrimination. Drawing
 on the insights of
 theological ethics as well
 as the sociology of
 religion, Miller analyzes
 the history of the modern
 day Faith at Work
 movement from its roots
 in the late 19th century to
 its modern formulation
 and trajectory. He
 examines the diversity of
 its members and modes
 of expression, and
 constructs a new
 framework for
 understanding,
 interpreting, and
 critiquing the movement
 and its future. Miller
 concludes that workers
 and professionals have a
 deep and lasting desire to
 live a holistic life, to
 integrate the claims of
 their faith with the
 demands of their work. He
 documents the surprising
 abdication of this field by
 church and theological
 academy and its embrace,
 ironically, by the
 management academy.
 Offering compelling new

evidence of the depth and
 breadth of spirituality at
 work, Miller concludes
 that faith at work is a
 bona fide social
 movement and here to
 stay. He establishes the
 importance of this
 movement, identifies the
 possibilities and problems,
 and points toward future
 research questions. *God
 at Work* is essential
 reading for business
 scholars and leaders,
 theologians and clergy,
 and anyone interested in
 the integration of faith
 and work.

"L'uomo, la natura e il telaio" è una raccolta di poesie divisa in altrettante omonime sezioni in cui sono "pennellati" i pensieri di Carmine Ciaccia. La metafora della vita assume le sembianze di un albero, oggetto passivo dello scorrere delle stagioni. Al pari della complessità sociale odierna, anche le parole assumono una forma barocca ritraendo gli uomini come foglie di

rami che riempiono lo spazio in ogni direzione e sono soggette agli agenti atmosferici. Si agitano col vento, si infreddoliscono con la neve e godono dei raggi del sole anche se rischiano di esserne bruciate. Nascono, crescono e muoiono attraversando una molteplicità di esperienze e stagioni. Ad ogni modo le foglie non possono cambiare la natura e nemmeno sfidarla. Possono solo ammirarla, maledirla, ringraziarla o condannarla. Le foglie, i rami e il paesaggio sono strettamente interconnessi tra di loro come gli anelli di una catena, hanno un senso soltanto se collegati tra di loro e trovano la loro bellezza nell'armoniosa convivenza. Alla stessa stregua l'uomo, la natura e il suo telaio possono regalare emozioni separatamente ma solo se concepiti insieme giustificano la loro sublime esistenza. Le poesie di Ciaccia rivelano una cura lessicale e una formula emozionale unica nel suo genere.

Emotions and Affect in Human Factors and Human-Computer Interaction is a complete

guide for conducting affect-related research and design projects in H/F and HCI domains. Introducing necessary concepts, methods, approaches, and applications, the book highlights how critical emotions and affect are to everyday life and interaction with cognitive artifacts. The text covers the basis of neural mechanisms of affective phenomena, as well as representative approaches to Affective Computing, Kansei Engineering, Hedonomics, and Emotional Design. The methodologies section includes affect induction techniques, measurement techniques, detection and recognition techniques, and regulation models and strategies. The application chapters discuss various H/F and HCI domains: product design, human-robot interaction, behavioral health and game design, and transportation. Engineers and designers can learn and apply psychological theories and mechanisms to account for their affect-related research and can develop their own domain-specific theory. The approach outlined in this handbook works to close the existing gap

between the traditional affect research and the emerging field of affective design and affective computing.
