Over the Rainbow SIAM
The fascination with
tragedy and the

subsequent theatre of
voyeurism are part of
human nature,
especially when it
involves our icons,
celebrities and
musicians. Knocking

On Heaven's Door is the definitive book of rock 'n' roll, pop, R&B and blues deaths. Often, only the biggest selling artists are written about and sometimes it is the death of a personality that cements their iconic status. Knocking On Heaven's Door not only covers the rock legends who lived hard and died young, this detailed reference contains over 1,000 obituaries of music industry personalities, famous and obscure from mid-fifties to the present day. Alphabetical entries of all the important individuals, including: noteworthy producers, managers, songwriters, record company founders A&R men and even critics, puts all the information at your finger tips. Nick

Talevski has spent a decade researching this comprehensive and authoritative reference book and it will be an indispensable and practical addition to every music library, full of irresistible and intriguing information. *The New Real Book* Charlesbridge Collecting and analysing data to monitor and challenge school standards is an increasingly important - and unavoidable - aspect of our education system. But how do we ensure we are generating useful information to support learning and make informed decisions, and not needlessly ramping up workload? This book will guide you through the different types of data schools can, and

should, generate; how to make the best use of it, and what to avoid. From standardised tests and teacher assessment, to managing data and developing a data strategy, this book will equip you with the tools you need to dataproof your school. Richard Selfridge is a primary school teacher, data consultant and writer on education James Pembroke is a data analyst, blogger and consultant with 15 year's experience working with education data. He now works for Insight Tracking.

Mark Twain's novels
are filled with humor,
wit, and astounding
insight into the world
of the 19th-century
United States. Written
entirely in the
vernacular, these
classic satirical tales
exposed the bigotry
and hypocrisy of
American life. The
cheerful Tom Sawyer,
the goodnatured Huck
Finn, the independent
Hank Morgan, and the
well-meaning Tom
Canty are
quintessential Twain
characters, full of life,
verve, and a sense of
justice they often felt
was missing from the
world around them.
Included in this

collection are four of
his greatest and most
popular novels: The
Adventures of Tom
Sawyer, The
Adventures of
Huckleberry Finn, A
Connecticut Yankee in
King Arthur's Court,
and The Prince and the
Pauper. They are the
perfect introduction to
the work of one of
America's foremost
talents.

This book is a major new study - dealing with notions of film music as a device that desires to control its audience, using a most powerful thing: emotion. The author emphasises the manipulative and ephemeral character of film music dealing not only with traditional orchestral film music, but also looks at film music's colonisation of television, and discusses pop music in relation to films, and the historical dimensions to ability to possess audiences that have so many important cultural and aesthetic effects. It

challenges the dominant but limited conception of film music as restricted to film by looking at its use in television and influence in the world of pop music and the traditional restriction of analysis to 'valued' film music, either from 'name' composers' or from the 'golden era' of Classical Hollywood. Focusing on areas as diverse as horror, pop music in film, ethnic signposting, television drama and the soundtrack without a film- this is an original study which expands the range of writing on the subject.

even as the world

hurtles toward

catastrophe. Each

fighting to survive in America. Tough-minded, vulnerable, and brave, Jocelyn Nicole Johnson's precisely imagined debut explores burdened inheritances and extraordinary pursuits of belonging. Set in the near future, the eponymous novella, "My Monticello," tells of a diverse group of Charlottesville neighbors fleeing violent white supremacists. Led by Da'Naisha, a young Black descendant of Thomas Jefferson and Sally Hemings, they seek refuge in Jefferson's historic plantation home in a desperate attempt to outlive the long-foretold racial and environmental unravelling within the nation. In "Control

Negro," hailed by Roxane Gay as "one hell of a story," a university professor devotes himself to the study of racism and the development of ACMs (average American Caucasian males) by clinically observing his own son from birth in order to "painstakingly mark the route of this Black child too, one whom I could prove was so strikingly decent and true that America could not find fault in him unless we as a nation had projected it there." Johnson's characters all seek out home as a place and an internal state, whether in the form of a Nigerian widower who immigrates to a meager existence in the city of Alexandria, finding himself adrift; a young mixed-race

woman who adopts a new tongue and name to escape the landscapes of rural Virginia and her family; or a single mother who seeks salvation through "Buying a House Ahead of the Apocalypse." United by these characters' relentless struggles against reality and fate, *My Monticello* is a formidable book that bears witness to this country's legacies and announces the arrival of a wildly original new voice in American fiction.

This is the incredible story of friendship

brought about by the game of Bridge. Two young women meet when their children begin Kindergarten. Their story continues as told in this book. One has a fascination for Bridge and teaches her new friend the game. We learn about the four women that play together and the absolute fun they have. There is tragedy entwined at their game table. It also includes the husbands and children as a fun group over the years. They are from very different backgrounds which we learn little of, yet it is enough. However, one of the women has a background she is unwilling to share at all. In the end, we learn why. On a trip to celebrate their "almost" 30 year friendship, Kate and

Simone fly to NYC to shop, see theater and enjoy wonderful restaurants. Naturally, the Bridge cards go along for 2-handed Bridge like these two have enjoyed during their friendship. On most of the journey they are playing in the airplane. During the trip, the past thirty years is remembered by Kate, the main character in the book who is narrating the story. Kate is thinking about the present, and the past, alternating between the two time-frames, going back, and then returning to the present; back and forth. Some she keeps to herself and some she discusses with Simone. One of the husbands is a wealthy philanthropic father of twins, murdered for no reason. His father-in-

law, the Chief-of Police can't solve the crime and it goes cold. It was a brutal murder for no reason. There had been a stranger lurking they knew nothing about. The book spans Kate's first marriage and takes you into her second. It takes you graphically into both bedrooms. This book does not fail to knock on any bedroom doors. In the end, much is learned about their friend that never wanted to share her past

The unlikely worlds of sports fans and statisticians collide in this interesting and accessible collection of previously published

articles on the use of statistics to analyze sports, which the editors have thoughtfully culled from a variety of American Statistical Association (ASA) publications. Heavily weighted in the areas of competition (rating players and teams, evaluating strategies for victory), the articles vary in mathematical complexity, but most will be accessible to readers with a general knowledge of statistics. Newly written material from the editors and other notable contributors introduces each section of the book, and a chapter with suggestions on using the articles in the classroom is included. Organized by sport to make it easy for readers to find the papers in their

particular areas of interest, *Anthology of Statistics in Sports* contains separate sections devoted to the major North American team sports of baseball, football, basketball, and ice hockey. Two additional sections cover miscellaneous sports and more general issues related to sports and statistics. This book grew from the efforts of members of the ASA Section on Statistics in Sports, which is dedicated to promoting high professional standards in the application of statistics to sports and fostering statistical education in sports.

Clinicians and those in health sciences are frequently called upon to measure subjective

states such as attitudes, feelings, quality of life, educational achievement and aptitude, and learning style in their patients. This fifth edition of *Health Measurement Scales* enables these groups to both develop scales to measure non-tangible health outcomes, and better evaluate and differentiate between existing tools. *Health Measurement Scales* is the ultimate guide to developing and validating measurement scales that are to be used in the health sciences. The book covers how the individual items are developed; various biases that can affect responses (e.g. social desirability, yea-saying, framing); various response

options; how to select the best items in the set; how to combine them into a scale; and finally how to determine the reliability and validity of the scale. It concludes with a discussion of ethical issues that may be encountered, and guidelines for reporting the results of the scale development process. Appendices include a comprehensive guide to finding existing scales, and a brief introduction to exploratory and confirmatory factor analysis, making this book a must-read for any practitioner dealing with this kind of data.
