This book offers a wide range of topics for the scholar interested in the study of English in this unsettling era of disruption in our lives – from linguistics to literature to language teaching and learning. The chapters present snippets of thoughts and critical reflections, findings from action research and other methodologies, and essays on troubling topics for language

teachers. The authors are researchers, experienced teachers, and students engaged in exploratory research. The many ideas and suggestions for further reflection and research will inspire teachers and researchers working in many different contexts, both educational and regional. There is something in this book for everybody.

This is an open access book. Innovation in the guidance and counseling profession is important so that counselors, teachers, or guidance and counseling practitioners can provide optimal services to their counselees. Along with the development of science, creativity and technology in the fields of psychology, education, and

guidance and counseling, various innovations and intervention in the implementation of counseling have been carried out. Especially with the Covid-19 pandemic, which is still on going, various creative interventions in counseling have begun to be widely used. Starting from the use of images for therapy or art therapy, dance movement and the use of other creative media to support the counselee. The need for creative media and innovation in the implementation of counseling is very important at this time, considering that during the pandemic the intensity of face-to-face contact with counselees and counselors is quite limited and most of them use online media. Saturation in the use of online media is

also possible to occur a lot, therefore with the existence of creative interventions that can be guided by a virtual counselor, it will be very interesting for the counselee as well as having a therapeutic impact. Therefore, an international seminar was held with the theme creative counseling intervention. This activity can be followed by guidance and counseling teachers, counselors or various other mental health practitioners to increase information and knowledge about creative interventions in counseling. In the end, participants can provide creative and effective counseling services to their counselees.

The theme of the conference is "Reconstructing Morals, Education, and Social Sciences for Achieving Sustainable Development Goals". This theme was formulated due to several considerations. First, the symptoms of moral decline that have the potential to destroy the nation. Morals guide humanity towards truth and civilization. The phenomenon of the dehumanization process in the industrial era that pushed people to be part of abstract societies tends to ignore humanity. The education process as a humanitarian system is increasingly marginalized, especially during discussions about the industrial revolution 4.0 and Society 5.0. The conference placed six sub-themes for speakers and participants to share ideas, namely: Social Sciences and Laws, History and Cultural Studies, Interdisciplinary Studies, Morals and Humanities, Policy, Politics, and Communication, Education. The committee has received 195 abstracts

from prospective speakers. However, there are only 80 abstracts that are eligible to be presented at this conference. MSCEIS 2019 European Alliance for Innovation

As an annual event, 1st International Conference on Christian and Inter Religious Studies (ICCIRS) 2019 continued the agenda to bring together researcher, academics, experts and professionals in examining selected theme by applying multidisciplinary approaches. In 2019, IAKN Manado successfully held this event for the first time in 11-14 December at Institut Agama Kristen Negeri (IAKN) Manado, Indonesia. There were 134 papers presented during 2 days at the conference from any kind of stakeholders related with Christian education and learning development, Theology, Music and psychotherapy, Psychology and Counselling and Inter-Religious Studies. Each contributed paper was refereed before being accepted for publication. The double-blind peer reviewed was used in the paper selection. From all papers submitted, there were 80 papers were accepted successfully for publication based on their area of interest, relevance,

research by applying multidisciplinary. U-Go Healthy 2020 European Alliance for Innovation

This is an open access book. The universe and society, both macro and micro, were created based on the laws of order which in principle have something in common. For example, the Milky Way solar system in which the center of the solar system is the sun, is surrounded by planets in its orbit. These planets, like Earth, are surrounded by their moons. It turns out that even very small objects such as atomic molecules have a circular model. The aims of research is to find these regularities to facilitate and improve the quality of life. The advancement of science and technology, sport, languages and arts are dedicated not only to facilitate the human life but also educate human being themselves. Arts is the highest achievement that contain values of life that highly respected by a nation. It can be said that arts are reflection of the civilization including moral, and vice versa; civilization as the representation of the advancement of moral, science, technology, cultures, languages, and arts by human being. The viruses that cause

the Covid 19 pandemic are hard to anticipate. Everything must be changed. This means that it is necessary to strive for innovative methods to STRENGTHEN EDUCATIONAL RESEARCH AND INNOVATION BASED ON MORAL, SCIENCES, AND ART IN NEW ERA ICERI is an international conference that accomodates research and innovation in educational practices in various fields of study. For this reason, ICERI is held in conjunction with other international conferences that fall under the scope of educational practices. This includes INTERCOME which is a conference in music education, ICopCoSE which is a conference on teacher education (the teaching practicum, industrial practicum, and students community service in education).

This is an open access book. The Unima International Conference on Social Sciences and Humanity (UNICSSH) 2022 was conducted on October, 11th – 13th 2022, at The Grand Kawanua International City, Manado, North Sulawesi, Indonesia. In 2022, Universitas Negeri Manado will host the Indonesian National Education

Convention (KONASPI) X. Konaspi is a routine activity of the PPTKN which is held once every four years. The fourth industrial revolution (4.0) is marked by technological advances and supported by artificial intelligence that creates opportunities and challenges for the education system. University and vocational school graduates are facing a world transformed by technology which in turn is transforming the workplace from task-based to human-centered characteristics. Certain skills such as critical thinking, emotional intelligence, problem-solving, cognitive flexibility, and knowledge production are required. To answer this demand, the education system must put revolutionary innovation on its agenda. Scholars, researchers, and practitioners are invited to share ideas, research results, and best practices about education, science, and technology now and in the future at an international conference held by Universitas Negeri Manado as part of the Indonesian National Education Convention (KONASPI). As part of KONASPI X activities, Universitas Negeri Manado is holding the 2022 International Conference on Education, Social Science,

and Humanities (ICESSHum). The topics in this international conference are Education, Law, Politics and Social Sciences, Economics, Public Administration, and Humanities. Through these themes, it is expected to involve many professionals who have indirect roles in related fields. To enrich this event, the committee invites all national and international participants (including academics, researchers, professionals, and other relevant stakeholders) to send research papers or review papers to be presented at the conference.

The main theme of the proceedings of the 4th International Conference on Teacher Education and Professional Development (InCoTEPD 2019) is "Teacher Education and Professional Development in Industry 4.0". The papers have been carefully grouped under the subthemes of teacher education and professional development, curriculum, learning materials, teaching-learning process, technology and media, and assessment in Industry 4.0 education. They also cover vocational education in the era in question and one section is devoted to Industrially disadvantaged societies. As these papers were presented at an internationally refereed conference

dedicated to the advancement of theories and practices in education, they provide an opportunity for academics and professionals from various educational fields with cross-disciplinary interests to bridge the knowledge gap and promote research esteem and the evolution of pedagogy.

2018 covers many ideas for handling a wide variety of challenging issues in the field of education. The outstanding ideas dealing with these issues result in innovation of the system. There are many innovation strategies resulting from recent research that are discussed in this book. These strategies will become the best starting points to solve current and future problems. This book provides an in-depth coverage of educational innovation developments with an emphasis on educational systems, formal or informal education strategies, learning models, and professional teachers. Indeed, those developments are very important to be explored for obtaining the right way of problem-solving. Providing many ideas from the theoretical foundation into the practice, this book is versatile and well organized for an appropriate audience in the field of education. It is an extremely useful reference for students, teachers, professors, practitioners, and government representatives in many countries. *Strategi Pendanaan Penelitian pada Perguruan Tinggi untuk Meningkatkan Kinerja Penelitian* Springer Nature

This book contains the proceedings of the The 5th Annual International Seminar on Trends in Science and Science Education (AISTSSE) and The 2nd International Conference on Innovation in Education, Science and Culture (ICIESC), where held on 18 October 2018 and 25 September 2018 in same city, Medan, North Sumatera. Both of conferences were organized respectively by Faculty of Mathematics and Natural Sciences and Research Institute, Universitas Negeri Medan. The papers from these conferences collected in a proceedings book entitled: Proceedings of 5th AISTSSE. In publishing process, AISTSSE and ICIESC were collaboration conference presents six plenary and invited speakers from Australia, Japan, Thailand, and from

Indonesia. Besides speaker, around 162 researchers covering lecturers, teachers, participants and students have attended in this conference. The researchers come from Jakarta, Yogyakarta, Bandung, Palembang, Jambi, Batam, Pekanbaru, Padang, Aceh, Medan and several from Malaysia, and Thailand. The AISTSSE meeting is expected to yield fruitful result from discussion on various issues dealing with challenges we face in this Industrial Revolution (RI) 4.0. The purpose of AISTSSE is to bring together professionals, academics and students who are interested in the advancement of research and practical applications of innovation in education, science and culture. The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about: Mathematical Sciences, Mathematics Education, Physical Sciences, Physics Education, Biological Sciences, Biology Education, Chemical Sciences, Chemistry Education, and Computer Sciences. Thus, this will contribute to the next young generation researches to produce innovative research findings. Hopely that the scientific attitude

and skills through research will promote Unimed to be a well-known university which persist to be developed and excelled. Finally, we would like to express greatest thankful to all colleagues in the steering committee for cooperation in administering and arranging the conference. Hopefully these seminar and conference will be continued in the coming years with many more insight articles from inspiring research. We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks. We hope to meet you again for the next conference of AISTSSE.

The growth rate of the global halal industry has increased in recent years, from 7.5% in 2015 to more than 8% in 2016 and is expected to continue to increase in 2017 and beyond. Indonesia in particular has great potential in the development of the halal industry sector because of the percentage of Indonesia's population which constitutes 12.7% of the world's Muslim population. The large potential of Indonesia in the halal industry

sector can support national economic growth. The market for halal industry in Indonesia, especially the food, travel, fashion, medicines and cosmetics sectors has reached around 11% of the global market in 2016. Behind the development of the halal industry globally, there are challenges especially in the health sector. The fact about guaranteeing halal products on drugs is still very alarming because the data from LPPOM MUI shows that out of 30 thousand types of drugs registered with BPPOM and circulating in the community, only 34 drugs are halal certified. In the food sector, data shows that Indonesia is the highest spending country for halal food compared to other countries in the world with a total expenditure of 170 billion US dollars. In the field of Occupational Health and Safety (OHS) is inseparable in the development of human resources in the halal industry. The security and quality of the halal industry are also closely related to the quality of human resources and the nation's competitiveness. The current development of the halal industry is fairly rapid in non-Muslim majority countries such as Thailand, South Korea, Russia, Mexico,

Japan, and Spain. On the contrary, Indonesia has become a contested market target for halal products for foreign countries. This condition will backfire for Indonesia if there are no quick steps to follow up on this problem. Because Indonesian people will only be targeted by consumers in the halal industry market. Strengthening regulatory development programs based on science and scientific and evidence according to standard development programs as well as strengthening the system of guidance and supervision of industrial security and its implementation in anticipation of the digital era needs to be done. To answer this problem U-GO Healthy Forum will hold International seminars and Call for Paper with the theme "The Role of Health Expert in Solving Contemporary Issues in Halal Industry" as the initial step to strengthen the security system of the halal industry. [ISMINA 2021](#) LIT Verlag Münster This is an open access book. The education sector during the Covid-19 Pandemic is currently undergoing a total reformation. The education process at schools and colleges which was carried out face-to-face has now turned into virtual

face-to-face learning utilizing various platforms. Also, the Covid-19 Pandemic has impacted the research and development process in the field which must be delayed due to the risk of Covid-19 transmission. In regard to this, the educational process does not run optimally. In fact, education is the process of developing the future generation of a country that are supposed to supported by all parties while looking for solutions to the problems at hand. As part of social sciences, the objects of historical study include humans who are bound by the dimensions of space and time. This confirms that history is part of science that is tied to human life. Therefore, various policies taken by the government must also be reviewed from the past historical experience with adjustments to the conditions of the era. Moreover, historical experience will provide an idea that humans are always innovating to solve the problems they face, especially policies related to education and learning. Based on those problems, History Education Study Program of the Faculty of Social Sciences, Universitas Negeri Yogyakarta will hold an international conference on

"Future Teaching and Learning: A Disruptive Innovation." The aim of the conference is providing a forum for exchanging information and finding solutions to learning and teaching problems in the current era of disruption, considering that the Covid-19 Pandemic has changed everything. This conference will seek solutions and innovations from various perspectives which include social, historical and educational perspectives.
