THE CLASSIC WORK OF ARCHIMEDES The Sand-Reckoner Dimensio Circuli of Archimedes Translated

by Thomas L. Heath (Original publication: Cambridge University Press, 1897). The Sand Reckoner is a work by Archimedes in which he set out to determine an upper bound for the number of grains of sand that fit into the universe. In order to do this, he had to estimate the size of the universe according to the contemporary model, and invent a way to talk about extremely large numbers. The work, also known in Latin as Archimedis Syracusani Arenarius and Dimensio Circuli, which is

about 8 pages long in translation, is addressed to the Syracusan king Gelo II (son of Hiero II), and is probably the most accessible work of Archimedes; in some sense, it is the first research-expository paper. Archimedes died during the Siege of Syracuse when he was killed by a Roman soldier despite orders that he should not be harmed. Cicero describes visiting the tomb of Archimedes, which was surmounted by a sphere and a cylinder, which Archimedes had

requested to be placed on his tomb, representing his mathematical discoveries. Unlike his inventions, the mathematical writings of Archimedes were little known in antiquity. Mathematicians from Alexandria read and quoted him, but the first comprehensive compilation was not made until c. 530 AD by Isidore of Miletus in Byzantine Constantinople, while commentaries on the works of Archimedes written by Eutocius in the sixth century AD opened them to wider readership

for the first time. The relatively few copies of Archimedes' written work that survived through the Middle Ages were an influential source of ideas for scientists during the Renaissance, while the discovery in 1906 of previously unknown works by Archimedes in the Archimedes Palimpsest has provided new insights into how he obtained mathematical results.

When Germanic troops in the service of the Empire begin to rebel, and a Roman general disappears, Emperor Vespasian turns to the one man he can trust: Marcus Didius Falco, a private informer whose rates are low enough that even the stingy Vespasian is willing to pay them. To Falco, an undercover tour

of Germania is an assignment from Hades. On a journey that only a stoic could survive, Falco meets with disarray, torture, and murder. His one hope: in the northern forest lives a powerful Druid priestess who perhaps can be persuaded to cease her anti-Rome activities and work for peace. Which Falco is eagerly hoping for as, back in Rome, the Titus Caesar is busy trying to make time with Helena Justina, a senator's daughter and Falco's girlfriend. Lindsey Davis'

historical mystery Iron Hand of Mars is a "Seamless blending of humor, history and adventure" (Publishers Weekly).

Advances in second language teaching methodology, including new emphases on communicative language teaching and learner-centeredness, have significantly changed the roles teachers play in the classroom, making ever greater demands upon their classroom

management skills. For Nunan and Lamb, "management" refers to the planning and creation of a positive pedagogical environment which facilitates learning. They focus on the kinds of professional decisions teachers must make to ensure that learning takes place effectively. The ultimate aim of the book is to help teachers and teachers-in-preparation become "self-directed" by providing them with the knowledge and skills needed to take effective control of the teaching

and learning processes in their classrooms. The Self-directed Teacher prepares teachers to make independent decisions in key areas such as lesson planning, teacher talk, group work, error correction, resource management, and evaluation. The text uses a task-based approach, and the material presented is well supported by theory and research.

A publishing phenomenon in Spain: a moving, lyrical, far-ranging meditation on the deep joys of confronting oneself through silence by a Spanish priest and Zen disciple. With silence increasingly becoming a stranger to us, one man set out to become its

intimate: Pablo d'Ors, a Catholic priest whose life was changed by Zen meditation. With disarming honesty and directness, as well as a striking clarity of language, d'Ors shares his struggles as a beginning meditator: the tedium, restlessness, and distraction. But, persevering, the author discovers not only a deep peace and understanding

of his true nature, but also that silence, rather than being a retreat from life, offers us an intense engagement with life just as it is. Imbued with a rare beauty, *Biography of Silence* shows us the deep joy of silence that is available to us all. *Girls to the Rescue* Chivers North America The Activity Book reinforces and consolidates the language and skills presented in the
