"This will become the go-to resource for intranet projects" - Robert Mills Create content that makes it faster for people to find what they need on the intranet than from a colleague. Learn user-centred design as you progress through this practical, stage by stage guide. Generally, people want information about a specific thing, fast, when they visit an intranet. They need it in as little time as possible, so they can get to a meeting, or enjoy their lunch break. This book outlines processes that put into practice these 3 essential principles for user-centred intranet content: 1. Content reflects a staff need for it. 2. Information is easy to find. 3. Style, tone and language is optimised for users with little time to read and absorb content. Lizzie Bruce pours her experience of designing intranet content around staff needs for UK government into 100 pages of advice and techniques for creating usable, readable content. Includes: list of universal intranet tasks, glossary of user-centred design terms, project "shopping list", timeline planner, tips for stakeholder buy-in, and links to case studies and blogs. Every organisation planning an intranet redesign needs this book.

10 Minute Guide to Intranets Routledge

An intranet portal project may well be the first and last project in your organisation that truly touches everyone, from the office of your CEO to the newest recruit. It may well be the most significant investment that you ever make in your people, their processes and their systems and has the power and potential to transform your organisation. However, it can be a tough project to deliver, bringing great exposure to its participants. All your customers will be only a small march away down the corridor and will all know where you live! Considering the \$1.5 billion market for

intranet portal technology worldwide, there are surprisingly few books on the topic (and those typically either very technical or very theoretical). The *Intranet Portal Guide* is a deliberately practical handbook for the stressed middle manager, seeking to make things happen in their organisation. The book is divided into three sections (before, during and after) and 31 chapters, addressing everything from the key issue of how to make the business case through to ongoing performance enhancement and benefit realisation. It is packed full of tools, templates, plans and processes for successful delivery - based on real life experience of implementation at two major UK companies.

Why Intranets Fail (and How to Fix Them) is a practical guide to some of the common problems associated with Intranets, and solutions to those problems. The book takes a unique end-user perspective on the role of intranets within organisations. It explores how the needs of the end-user very often conflict with the needs of the organisation, creating a confusion of purpose that impedes the success of intranet. It sets out clearly why intranets cannot be thought of as merely internal Internets, and require their own management strategies and approaches. The book draws on a wide range of examples and analogies from a variety of contexts to set-out in a clear and concise way the issues at the heart of failing intranets. It presents step-by-step solutions with universal application. Each issue discussed is accompanied by short practical suggestions for improved intranet design and architecture. Jargon-free and aimed at information professionals with sole/mixed responsibilities Draws many examples from broader library management contexts Clearly distinguishes between intranet and Internet technologies
