*Education, physical activities and sport in a historical perspective = [Educació, activitats físiques i esport en una perspectiva històrica] : XIV ISCHE Conference 1992 : conference working papers Vrin*

Routledge Library Editions: Peace Studies (12 Volume set) contains titles, originally published between 1928 and 1985.

Looking at peace movements and the people involved in them around the world, who seek to learn lessons from war and find solutions to a peaceful existence. It includes titles from a number of well-

known pacifists, both pre- and post-war who have influenced ideas and policy throughout the twentieth century.

*The Idea of Semitic Monotheism* Routledge

There are three themed parts to this book: values, ethics and emotions in the first part, epistemology, perception and consciousness in the second part and philosophy of mind and philosophy of language in the third part. Papers in this volume provide links between emotions and values and explore dependency between language, meanings and concepts and topics such as the liar's paradox, reference and metaphor are examined. This book is the second of a two-volume set that originates in papers presented to Professor Kevin Mulligan, covering the subjects that he contributed

to during his career. This volume opens with a paper by Moya, who proposes that there is an asymmetrical relation between the possibility of choice and moral responsibility. The first part of this volume ends with a description of foolishness as insensitivity to the values of knowledge, by Engel. Marconi's article makes three negative claims about relative truth and Sundholm notes shortcomings of the English language for epistemology, amongst other papers. This section ends with a discussion of the term 'subjective character' by Nida-Rümelin, who finds it misleading. The third part of this volume contains papers exploring topics such as the mind-body problem, whether theory of mind is based on simulation or theory and Künne shows that the most common

analyses of the so-called 'Liar' paradox are wanting. At the end of this section, Rizzi introduces syntactic cartography and illustrates its use in scope-discourse semantics. This second volume contains twenty nine chapters, written by both high profile and upcoming researchers from across Europe, North America and North Africa. The first volume of this set has two main themes: metaphysics, especially truth-making and the notion of explanation and the second theme is the history of philosophy with an emphasis on Austrian philosophy.

*Roman Law and the Idea of Europe*

Peeters Publishers

In the early decades of the twentieth century, engagement with science was commonly used as an emblem of modernity. This phenomenon is now attracting increasing attention in different historical specialties. *Being Modern* builds on this recent scholarly interest to explore engagement with science across culture from the end of the nineteenth century to approximately 1940. Addressing the breadth of cultural forms in Britain and the western world from the architecture of Le Corbusier to working class British science fiction, *Being Modern* paints a rich picture. Seventeen distinguished contributors from a range of fields including the cultural study of science and technology, art and architecture, English culture and literature examine the issues involved. The book will be a valuable resource for students, and a spur to scholars to further examination of culture as an interconnected web of which science is a critical part, and to supersede such tired formulations as 'Science and culture'.

*Europe in Crisis* IRPP

"This volume discusses the nature of theological science and the mystery of the Triune God; introduces the reader to classical Thomistic positions concerning the theological articulation of the Trinitarian mystery, including the topic of the divine missions, providing an important connection between the dogmatic portion of theology and its spiritual/moral concerns"--

Comment la philosophie de Hegel pourrait-elle encore promettre quelque chose puisqu'elle est apparue, aux yeux des lecteurs contemporains, comme une entreprise d'annulation du temps? Le savoir absolu n'est-il pas le résultat du processus dialectique par lequel l'esprit relève toute temporalité et par là toute surprise, l'événement se produisant toujours trop tard? D'une absence de pensée de l'avenir dans la philosophie de Hegel découlerait une absence d'avenir de la philosophie hégélienne elle-même. C'est contre une telle assertion que le présent ouvrage s'inscrit en faux; il se propose pour cela de travailler le concept de plasticité, montrant comment il forme en

profondeur, a la fois comme sa structure et comme son rythme, le contenu speculatif. Est plastique ce qui est susceptible de recevoir comme de donner la forme, mais aussi de l'aneantir. Hegel degage ce concept de son sol natal, l'art, pour le rendre a sa veritable origine : le developpement de la subjectivite. Est dit plastique, en effet, le rapport que la subjectivite entretient avec l'accident, avec ce qui arrive. L'auto-determination apparait comme proces de temporalisation au sein duquel la subjectivite, dans l'attitude contrastee d'un voir venir , se donne et par la recoit sa propre forme, anticipant son avenir tout en renoncant a en maitriser l'irruption. La plasticite du concept hegelien de temps est le foyer de resistance clandestin ou se prepare la reponse a l'accusation de vulgarite portee par Heidegger a l'encontre de ce meme concept.

Roman law is widely considered to be the foundation of European legal culture and an inherent source of unity within European law. Roman Law and the Idea of Europe explores the emergence of this idea of Roman law as an idealized shared heritage, tracing its origins among exiled German scholars in Britain during the Nazi regime. The book follows the spread and influence of these ideas in Europe after the war as part of the larger enthusiasm for European unity. It argues that the rise of the importance of Roman law was a reaction against the crisis of jurisprudence in the face of Nazi ideas of racial and ultranationalistic law, leading to the establishment of the idea of Europe founded on shared legal principles. With contributions from leading academics in the field as well as established younger scholars, this volume will be of immense interests to anyone studying intellectual history, legal history, political history and Roman law in the context of Europe. International Labor Conference Routledge Introduction to the Mystery of the Church is an ecclesiological survey presenting a doctrinal synthesis of the Church. The author's intention is to propose an

overview of this mystery in connection with the entirety of the Christian mystery. The book is divided into two major parts, the first presenting the foundations in the Bible and the tradition up to our day, and the second being an explanatory proposal introducing the reader to the Church's definition and personality and concluding with an exposition of the four properties enunciated in the Creed (one, holy, catholic, and apostolic). The value of this way of proceeding is first and foremost in the proposal of a synthesis that allows one to situate each question in its rightful place, such study being oriented toward a better overall grasp of the subject. As the title suggests, the book is an introduction that should allow the reader to apprehend the mystery in its internal coherence in order subsequently, with the aid of other texts, to be able to enter more deeply into the study of one or other specific point. While this ecclesiology treatise is written from a Catholic point of view, an ecumenical perspective is often present, either through the presentation of divergent views from other Christian confessions or through the proposal for a theological convergence.

L'auteur ne s'adresse pas ici qu'aux férus de science, de technologie et de commerce. Ce livre est bien davantage qu'un instrument fondamental servant à vérifier de façon scientifique la vérité de l'unité du Tout et de la grande unification de la Physique et de l'édification de l'Univers. Il nous propose une démarche en vue de retrouver les traditions souvent oubliées des mères et pères spirituels de l'Humanité qui furent d'avis qu'un être humain est un élément de l'ensemble que nous appelons l'Univers.

The Idea of Semitic Monotheism examines some major aspects of the scholarly study

of religion in the long nineteenth century—from the Enlightenment to the First World War. It aims to understand the new status of Judaism and Islam in the formative period of the new discipline. Guy G. Stroumsa focuses on the concept of Semitic monotheism, a concept developed by Ernest Renan around the mid-nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples, cultures, and religions. This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages, at the time of the Enlightenment and Romanticism. Together with the rise of scholarly Orientalism, this discovery offered new perspectives on the East, as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations. This innovative work studies a central issue in the modern study of religion. Doing so, however, it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century, up to

the present day.

Yves Congar was the most significant voice in Catholic pneumatology in the twentieth century. This new collection of short pieces makes his thought accessible to a broad range of readers – scholars, teachers, ecumenists and laity – and thus helps to ensure that an important theological voice, one that influenced many of the documents of the Second Vatican Council, continues to be heard. The Spirit of God brings together for the first time eight of Yves Congar's previously untranslated writings on the Holy Spirit composed after Vatican II (from 1969 to 1985). Two of these selections offer general overviews of Congar's pneumatology, a pneumatology based upon Scripture and the Tradition of the Church, but articulated in conversation with philosophers, ecumenical partners and non-believers. Other articles make clear the historical context of Vatican II's pneumatology and the Holy Spirit's crucial influence upon the unfolding of history and upon the moral life, the efficacy of the

sacraments and, especially, upon ecclesial life. The writings in The Spirit of God have been translated and edited by a team of scholars familiar with the work of the French Dominican theologian. An introduction situates each of the writings historically and highlights its theological significance. A bibliography lists Congar's publications on the Holy Spirit, the major articles and books written about his pneumatology, and the major scholarly resources to which Congar made reference in the notes that accompanied these writings. An index of biblical references and of personal names is also included. *Annuaire de l'Association Européenne des femmes pour la recherche théologique* A. Michel [1953]

This book proposes an innovative conceptual framework to explore cultural organizations at a multilateral level and cultural mediators as key figures in cultural and institutionalization processes. Specifically, it analyzes the role of Ibero-American mediators in the institutionalization of Hispanic and Lusophone cultures in the first half of the 20th century by means of two institutional networks: PEN (the non-governmental writer's association) and the International Institute of Intellectual Cooperation (predecessor to UNESCO). Attempting to combine cultural and global history, sociology, and literary studies, the book uses an analytical focus on intercultural networks and cultural transfer to investigate the multiple activities and roles that these mediators and cultural organizations set in motion. Literature has traditionally studied major figures and

important centers of cultural production, but other regions and localities also played a crucial role in the development of intellectual cooperation. This book reappraises the place of Ibero-America in international cultural relations and retrieves the lost history of key secondary actors. The book will appeal to scholars from international relations, global and cultural history, sociology, postcolonial Studies, world and comparative literature, and New Hispanisms.

The period between 1917 and 1957, starting with the birth of the USSR and the American intervention in the First World

War and ending with the Treaty of Rome, is of the utmost importance for contextualizing and understanding the intellectual origins of the European Community. During this time of 'crisis,' many contemporaries, especially intellectuals, felt they faced a momentous decision which could bring about a radically different future. The understanding of what Europe was and what it should be was questioned in a profound way, forcing Europeans to react. The idea of a specifically European unity finally became, at least for some, a feasible project, not only to avoid another war but to avoid the destruction of the

idea of European unity. This volume reassesses the relationship between ideas of Europe and the European project and reconsiders the impact of long and short-term political transformations on assumptions about the continent's scope, nature, role and significance.
