With Exploring Medical Language, 10th Edition, you can now master medical terms on your terms! At the heart of this one-of-a-kind learning package is an innovative worktext, which enables you to gradually acquire an understanding of medical terminology by first learning word parts and then learning how to combine the

parts into full medical terms that make sense. Perhaps even better is the wide range of engaging online learning tools — tools like interactive games, puzzles, application activities, and on-the-go auditory reviews — that come with the worktext to help reinforce your learning and help you understand how the terms are used in the professional world. In all, this is the only resource on the market that incorporates all the proven methods for mastering medical terminology that work best for today's learners. Systematic presentation of medical terminology provides a foundation of word parts (prefixes, suffixes, and word roots), then builds words by combining the parts. Comprehensive coverage of words that are built from word parts and other important terms creates a distinction between terms built from word parts and those not easily recognized as built from word parts and provides thorough coverage of both. Over 400 flashcards enable readers to review word parts when and where they want. Margin boxes detail important information such as medical terminology facts and tips, historical information, weblinks, and complementary and alternative medicine terms. Simulations of electronic health records familiarize readers with the growing use of EHRs in healthcare settings. AudioTerms study companion can be easily downloaded to portable media players and includes over 3,000 terms, each of which is pronounced and defined. Integrated online learning tools feature interactive games and activities, A+P boosters, career videos, and more that cater to the way today's learners master medical terminology. NEW! Case studies introduce medical terminology in context and encourage critical thinking and information application. NEW! Adaptive learning, gradeable case studies, and audio reviews are now available in the online course to provide a complete learning experience for distance learners. For separate sale. NEW! Updated integrative medicine boxes introduce terminology related to integrative medicine (formerly complementary and alternative medicine). NEW! Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Accounting: Information for Business Decisions offers an integrated approach to teaching managerial and financial accounting course topics for the Introductory or Principles of Accounting course. This new text, written by an experienced author team, is designed to help students understand how to use both managerial and financial accounting information to make decisions. Class-tested for three years across the United States, its student-friendly approach has already earned it rave reviews. The text provides an introduction to business in Chapter 1 and is the only introductory accounting book to have an entire chapter (Chapter 2) devoted to creative and critical thinking. A non-technical approach makes learning accounting accessible for majors and non-majors, focuses students on using accounting information for decision making, and conforms with AECC guidelines for teaching accounting. A full-chapter length appendix on the accounting cycle (debits/credits) allows instructors to implement this portion of the course anywhere they desire.
