This volume highlights the latest research on the foundations of sociopolitical complexity in coastal California. The populous maritime societies of southern California, particularly the groups known collectively as the Chumash, have gone largely unrecognized as prototypical complex hunter-gatherers, only recently beginning to emerge from the shadow of their more celebrated counterparts on the Northwest Coast of North America. While Northwest cultures are renowned for such complex institutions as ceremonial potlatches, slavery, cedar plank-house villages, and rich artistic traditions, the Chumash are increasingly recognized as complex hunter-gatherers with a different set of organizational characteristics: ascribed chiefly leadership, a strong maritime economy based on oceangoing canoes, an integrative ceremonial system, and intensive and highly specialized craft production activities. Chumash sites provide some of the most robust data on these subjects available in the Americas. Contributors present stimulating new analyses of household and village organization, ceremonial specialists, craft specializations and settlement data, cultural transmission processes, bead manufacturing practices, watercraft, and the acquisition of prized marine species.

This book situates the picturebook genre within the widespread international phenomenon of crossover literature, examining an international corpus of picturebooks — including artists' books, wordless picturebooks, and celebrity picturebooks — that appeal to readers of all ages. Focusing on contemporary picturebooks, Sandra Beckett shows that the picturebook has traditionally been seen as a children's genre, but in the eyes of many authors, illustrators, and publishers, it is a narrative form that can address any and all age groups. Innovative graphics and formats as well as the creative, often complex dialogue between text and image provide multiple levels of meaning and invite readers of all ages to consider texts that are primarily marketed as children's books. The interplay of text and image that distinguishes the picturebook from other forms of fiction and makes it a unique art form also makes it the ultimate crossover genre. Crossover picturebooks are often very complex texts that are challenging for adults as well as children. Many are characterized by difficult "adult" themes, genre blending, metafictional discourse, intertextuality, sophisticated graphics, and complex text-image interplay. Exciting experiments with new formats and techniques, as well as novel interactions with new media and technologies have made the picturebook one of the most vibrant and innovative contemporary literary genres, one that seems to know no boundaries. Crossover Picturebooks is a valuable addition to the study of a genre that is gaining increasing recognition and appreciation, and contributes significantly to the field of children's literature as a whole.

In the second edition of the definitive account of Igor Stravinsky's life and work, arranged in two separate sections, Eric Walter White revised the whole book, completing the biographical section by taking it up to Stravinsky's death in 1971. To the list of works, the author added some early pieces that have recently come to light, as well as the late compositions, including the Requiem Canticles and The Owl and the Pussycat. Four more of Stravinsky's own writings appear in the Appendices, and there are several important additions to the bibliography.

Zandile is snatched away from her grandmother's loving care and taken to live with her matriarcal family in rural Transkei. Moving, funny and convincing, full of Zandile's shrewd, youthful insights, the play offers an illuminating window onto the 1960s with its issues of white dominance, rural hardship and black female repression.

Inferencing is defined as 'the act of deriving logical conclusions from premises known or assumed to be true', and it is one of the most important processes necessary for successful comprehension during reading. This volume features contributions by distinguished researchers in cognitive psychology, educational psychology, and neuroscience on topics central to our understanding of the inferential process during reading. The chapters cover aspects of inferencing that range from the fundamental bottom-up processes that form the basis for an inference to occur, to the more strategic processes that transpire when a reader is engaged in literary understanding of a text. Basic activation mechanisms, word-level inferencing, methodological considerations, inference validation, causal inferencing, emotion, development of inferences processes as a skill, embodiment, contributions from neuroscience, and applications to naturalistic text are all covered as well as expository text, online learning materials, and literary immersion.

For several centuries Cape Town has accommodated a great variety of musical genres which have usually been associated with specific population groups living in and around the city. Musical styles and genres produced in Cape Town have therefore been assigned an "identity" which is first and foremost social. This volume tries to question the relationship established between musical styles and genres, and social - in this case pseudo-racial - identities. In *Sounding the Cape*, Denis-Constant Martin recomposes and examines through the theoretical prism of creolisation the history of music in Cape Town, deploying analytical tools borrowed from the most recent studies of identity configurations. He demonstrates that musical creation in the Mother City, and in South Africa, has always been nurtured by contacts, exchanges and innovations whatever the efforts made by racist powers to separate and divide people according to their origin. Musicians interviewed at the dawn of the 21st century confirm that mixture and blending characterise all Cape Town's musics. They also emphasise the importance of a rhythmic pattern particular to Cape Town, the ghoema beat, whose origins are obviously mixed. The study of music demonstrates that the history of Cape Town, and of South Africa as a whole, undeniably fostered creole societies. Yet, twenty years after the collapse of apartheid, these societies are still divided along lines that combine economic factors and "racial" categorisations. Martin concludes that, were music given a greater importance in educational and cultural policies, it could contribute to fighting these divisions and promote the notion of a nation that, in spite of the violence of racism and apartheid, has managed to invent a unique common culture.

"Books geographically focused on the midwestern and eastern states dominate the study of Mennonites in America. The intriguing history of Mennonites in the American West remains untold. In *From Digging Gold to Saving Souls*, Brian Froese introduces readers for the first time to the California Mennonite experience. Although a few Mennonites did dig for gold in the 1850s, the real story of Mennonites in California begins in the 1890s with westward migrations for fertile soil and healthy sunshine. By the mid-twentieth century, the Mennonite story in California had developed into an interesting tale of religious conservatives--traditional agrarians--finding their way in an increasingly urban and religiously pluralistic California. Some California Mennonites negotiated new identities by endorsing conservative evangelicalism; some found them in reclamations of sixteenth-century Anabaptists. Still other Mennonites found meaningful religious experience by engaging in social action and justice even when these actions appeared in "secular" forms. These emerging identities--Evangelical, Anabaptist, and secular--covered a broad spectrum, yet represented a selective retaining and discarding of Mennonite religious practices and expressions. *From Digging Gold to Saving Souls* touches on such topics as migration, pluralism, race, gender, pacifism, institutional construction, education, and labor conflict, all of which defined the experience of Mennonites of California. Brian Froese shows how this experience was a rich, complex, and deliberate move into modern society. In *From Digging Gold to Saving Souls*, he

introduces readers to a dynamic people who did not simply become modern, but who chose to modernize on their own terms"--

Poetry is the most complex and intricate of human language used across all languages and cultures. Its relation to the worlds of human experience has perplexed writers and readers for centuries, as has the question of evaluation and judgment: what makes a poem "work" and endure. The Poem as Icon focuses on the art of poetry to explore its nature and function: not interpretation but experience; not what poetry means but what it does. Using both historic and contemporary approaches of embodied cognition from various disciplines, Margaret Freeman argues that a poem's success lies in its ability to become an icon of the felt "being" of reality. Freeman explains how the features of semblance, metaphor, schema, and affect work to make a poem an icon, with detailed examples from various poets. By analyzing the ways poetry provides insights into the workings of human cognition, Freeman claims that taste, beauty, and pleasure in the arts are simply products of the aesthetic faculty, and not the aesthetic faculty itself. The aesthetic faculty, she argues, should be understood as the science of human perception, and therefore constitutive of the cognitive processes of attention, imagination, memory, discrimination, expertise, and judgment.

This new edition has been thoroughly revised and edited by John Evans (research scholar to the Britten Estate) who has updated the chronological list of published works and included in the bibliography the many books that have been written about the composer since his death in 1976. Although, as the title suggests, this book concentrates on Britten's operatic output, Mr White's account offers insights into the whole range of this prodigious composer's music. The text is lavishly illustrated with plates that reveal both the diversity of his operatic development and comprise a distinctive pictorial bibliography.

Gcina Mhlophe is a poet, playwright, performer and South Africa's favorite storyteller. In this fascinating retrospective collection, she shares her personal journey through the social and political landscapes of the 1980s, with its recollected moments of struggle and transformation

along the way. Written in a variety of styles and voices, ranging from anecdotal memory to historical moment to folklore tradition, these simply presented poems and stories are by turns funny, touching, chilling, thought-provoking and absorbing. *Love Child* is a collection for the new millennium generation. It is valuable not just for the deeply-felt personal and political insights it has to offer, but for the accessible ease with which it manages to capture the seminal moments of black South African history in the preserving amber of the author's personal recollection.

German Culture through Film: An Introduction to German Cinema is an English-language text that serves equally well in courses on modern German film, in courses on general film studies, in courses that incorporate film as a way to study culture, and as an engaging resource for scholars, students, and devotees of cinema and film history. In its second edition, *German Culture through Film* expands on the first edition, providing additional chapters with context for understanding the era in which the featured films were produced. Thirty-three notable German films are arranged in seven chronological chapters, spanning key moments in German film history, from the silent era to the present. Each chapter begins with an introduction that focuses on the history and culture surrounding films of the relevant period. Sections within chapters are each devoted to one particular film, providing film credits, a summary of the story, background information, an evaluation, questions and activities to encourage diverse interpretations, a list of related films, and bibliographical information on the films discussed.
