"The future has attracted the interest of almost all scholars working on the history of Greek, but no satisfactory set of arguments for the developments prior to the emergence of the modern form has ever been produced. In this book Theodore Markopoulos explores and elucidates the stages that led up to the appearance of the modern future in the sixteenth century."--BOOK JACKET.

5: BI-CALZ Routledge

This book will offer an account not so much of God's Providence an sich, but rather of divine providence as experienced by believers and unbelievers. It will not ask questions about whether and how God knows the future, or how suffering can be accounted for (as is the case in the treatments by William Lane Craig, Richard Swinburne, or J. Sanders), but will focus on prayer and decision-making as a faithful and/or desperate response to the perception of God as having some controlling influence. The

following gives an idea of the ground to be covered: The patristic foundations of the Christian view of Providence; The medieval synthesis of 'objective' and 'subjective' views; Reformational and Early Modern: the shift towards piety; Modern Enlightenment: Providence and Ethics; Barth and the Sceptics; The sense of Providence in the Modern Novel and World.

Social theories of modernity focus on the nineteenth century as the period when Western Europe was transformed by urbanization. Cities became thriving metropolitan centers as a result of economic, political, and social changes wrought by the industrial revolution. In Cultural Capitals, Karen Newman demonstrates that speculation and capital, the commodity, the crowd, traffic, and the street, often thought to be historically specific to nineteenth-century urban culture, were in fact already at work in early modern London and Paris. Newman challenges the notion of a rupture between premodern and modern societies and shows how London and Paris became cultural capitals.

Drawing upon poetry, plays, and prose by writers such as Shakespeare, Scudéry, Boileau, and Donne, as well as popular materials including pamphlets, ballads, and broadsides, she examines the impact of rapid urbanization on cultural production. Newman shows how changing demographics and technological development altered these two emerging urban centers in which new forms of cultural capital were produced and new modes of sociability and representation were articulated. Cultural Capitals is a fascinating work of literary and cultural history that redefines our conception of when the modern city came to be and brings early modern London and Paris alive in all their splendor, squalor, and richness.

It is a common belief that in France the study of medieval literature as literature only began to gain recognition as a valid occupation for the scholar during the nineteenth century. It is well known that historians of the sixteenth, seventeenth and

eighteenth centuries looked to the literary productions of the Middle Ages for materials useful to their researches, but it is only recently that the remarkable frequency of this reference has been appreciated and that scholars have become aware of an unbroken tradition of what might best be described as historically oriented medievalism stretching from the sixteenth century to our own.

The eighteenth century has drawn the greatest number of curious to this field, for it is evident that the surprisingly extensive researches undertaken then do much to explain the progress made a century later by the most celebrated generation of medievalistst. Very slowly we are coming to see the value of the contribution made by little known schol ars like La Curne de Sainte-Palaye, Etienne Barbazan and the Comte de Caylus.
