OF the parts of animals  
some are simple: to

wit, all such as divide into parts uniform with themselves, as flesh into flesh; others are composite, such as divide into parts not uniform with themselves, as, for instance, the hand

does not divide into hands nor the face into faces. And of such as these, some are called not parts merely, but limbs or members. Such are those parts that, while entire in themselves, have within themselves other diverse parts: as for instance, the head, foot, hand, the arm as a whole, the chest; for these are all in themselves entire parts, and there are other diverse parts belonging to them. All those parts that do not subdivide into parts uniform with themselves are composed of parts that do so subdivide, for instance, hand is composed of flesh, sinews, and bones. Of animals, some resemble one another in all their parts, while others have parts

wherein they differ.

### **The World of Physics**

Hodder Education

The main intention of this book is to introduce to the lay readers and students, the daily routine decisions, hurdles, and development of the human self; the topics and quandaries that occur within the philosophy of life. We hope the readers will discover that life struggles are not an easy or a straightforward area of analysis to instill into one format. In other words, the struggles we are in today are developing the strength we need for tomorrow. The concept "to never give up" comes from the strength of struggle from within. When we learn to foresee our struggles as an

opportunity to become wiser, better, and stronger, then we shift our thinking from proactively that I must do this. Sometimes struggles of life are factual: what we needed in our life. If we go through our life without any stumbling blocks, we would be deprived of strength and efficiency. We would not be strong as we could have been. This book realized us to give every opportunity as chance and leave no room to regret in life. Anyhow, the overall intention is to inspire the reader to think critically about what life strength is, struggles and development of personality to read or study further the issues that this book raises for you.

"Romance is the privilege of the rich, not the profession of the unemployed."

Hughie, a charming young man with no money, wants to marry a girl named Laura. But Laura's father is concerned with Hughie's lack of wealth and tells him he can only have his daughter if he comes up with 10,000 pounds. Defeated, Hughie visits his artist friend, who in painting a portrait of a beggar. Meeting the beggar outside, Hughie gives him some money. What he doesn't know is that the man isn't a beggar at all but a wealthy baron, and Hughie's generosity might just be the thing to change

his life. The Model Millionaire is a charming and funny little story, similar in setting to The Picture of Dorian Gray, but far more optimistic. A delightful read. Oscar Wilde (1854-1900) was an Irish playwright, novelist, essayist, and poet, famous for 'The Picture of Dorian Gray' and 'The Importance of Being Earnest' to name a couple. He was believed to be a homosexual and met a lot of resistance in his life on that account. He died in Paris at the age of 46.

The distribution of a liquid in an even, thin protective layer over a surface has for many years been the method adopted for either protecting the substrate and/or enhancing its appearance.

Distribution of the coating, or paint, is usually effected by one of three ways: brush, roller or spraying.

Liquid paint is widely used in manufacturing industries where invariably some type of coating is deposited on the finished product.

Distribution of the paint by atomization into a fine aerosol lends itself very well to

substrate coating, and numerous commercial coating systems are available. Some systems use air atomization while others adopt centrifugal forces for disruption of the continuous phase liquid into fine droplets. jg p.12.
