Geological Atlas of Africa Routledge

Now newly revised, this invaluable reference work provides a succinct account of the development of African society from the first appearance of man to the complex polity of today. Kingdoms and Empires are only part of the story. The atlas covers the development of modern man, the differentiation and spread of African languages, the first crossings of the Sahara, the exploration of the Niger, and the search for 'the fountains of the Nile'. Gold and ivory lure

traders from far away; Christendom and Islam compete for African attention. Names from the distant past become nation-states with aspirations appropriate to the modern world. Using the formula successfully established in his previous historical atlases, Colin McEvedy outlines this progress with the aid of sixty maps and a clear, concise text. Though his synthesis will be especially useful to those involved in the teaching of African history, its broad perspectives will undoubtedly appeal also to the general reader.

Worldwide scholarship has established the fact that Africa is the cradle land of humanity. Dr. Kurewa promotes the theory that African Religion could very easily have been the proto-religion of humanity, and a religion from which other monotheistic religions, such as Judaism, Zoroastrianism, Christianity, and Islam have their roots. The author shifts the traditional African historical studies stance of looking at Africa from Egypt alone, and instead looks at Africa from inside Africa. Dr. Kurewa invites a debate regarding our understanding of African Religion, the indigenous religion

of millions of people in sub-Saharan Africa today.

African Christians who believe the half-truth that Christianity in Africa is the product of European and American

missionary work need this book. Dr. John Kurewa explores Methodist history in Africa, focusing on the early years of United Methodism in Zimbabwe (1890s-1920s). He reveals it was Africans who led the way in propagating the gospel. Missionaries strategized, but African preachers evangelized. So-called "native helpers" took the gospel to the rural areas and planted the churches, especially in the villages. Kurewa also reveals that in the course of serving the gospel in the African context, indigenous spiritual leaders crafted and modeled a distinctive form of pastoral leadership—the African pastor-teacher—that proved sustainable and fruitful then, and is relevant still today. [Journeys in Time](#) Upper Room Books Organized in the same innovative

manner as Colin McEvedy's other Penguin historical atlases, but presented in a new, larger, and more accessible format, [The Penguin Historical Atlas of the Pacific](#) features forty-nine double-page spreads, with text facing the maps, that provide overviews of crucial moments in the history of the Pacific and the lands around it, from the formation of the ocean some twenty-eight million years ago to the end of the twentieth century. The spreads show the movements of peoples along the Pacific Rim, the occupation of oceanic islands, the development of nations, and the rise and fall of empires within and around the huge Pacific basin. [The Penguin Historical Atlas of the Pacific](#) is an essential acquisition for schools, libraries, and students of Asian and

American history.

When you think of a map of the United States, what do you see? Now think of the Seattle that begot Jimi Hendrix. The Dallas that shaped Erykah Badu. The Holly Springs, Mississippi, that compelled Ida B. Wells to activism against lynching. The Birmingham where Martin Luther King, Jr., penned his most famous missive. Now how do you see the United States? *Chocolate Cities* offers a new cartography of the United States—a “Black Map” that more accurately reflects the lived experiences and the future of Black life in America. Drawing on cultural sources such as film, music, fiction, and plays, and on traditional

resources like Census data, oral histories, ethnographies, and health and wealth data, the book offers a new perspective for analyzing, mapping, and understanding the ebbs and flows of the Black American experience—all in the cities, towns, neighborhoods, and communities that Black Americans have created and defended. Black maps are consequentially different from our current geographical understanding of race and place in America. And as the United States moves toward a majority minority society, *Chocolate Cities* provides a broad and necessary assessment of how racial and ethnic minorities make and change America’s social, economic, and political landscape.
