Proposals for power-sharing constitutions remain controversial, as highlighted by current debates in Iraq, Afghanistan, Nepal, and Sudan. This book updates and refines the theory of consociationalism, taking account of the flood of contemporary innovations in power-sharing institutions that have occurred worldwide. The book classifies and compares four types of political institutions: the electoral system, parliamentary or presidential executives, unitary or federal states, and the structure and independence of the mass media. The study tests the potential advantages and disadvantages of each of these institutions for democratic governance. Cross-national time-series data concerning trends in democracy are analyzed for all countries worldwide since the early 1970s. Chapters are enriched by comparing detailed case studies. The mixed-method research design illuminates the underlying causal mechanisms by examining historical developments and processes of institutional change within particular nations and regions. The conclusion draws together the results and the practical lessons for policymakers.

In *The Long Southern Strategy*, Angie Maxwell and Todd Shields trace the consequences of the GOP's decision to court white voters in the South. Over time, Republicans adopted racially coded, anti-feminist, and evangelical Christian rhetoric and policies, making its platform more southern and more partisan, and the remodel paid off. This strategy has helped the party reach new voters and secure electoral victories, up to and including the 2016 election. Now, in any Republican primary, the most southern-presenting candidate wins, regardless of whether that identity is real or performed. Using an original and wide-ranging data set of voter opinions, Maxwell and Shields examine what southerners believe and show how Republicans such as Donald Trump stoke support in the South and among southern-identified voters across the nation.

How popular democracy has paradoxically eroded trust in political systems worldwide, and how to restore confidence in democratic politics Democracies across the world are adopting reforms to bring politics closer to the people. Parties have turned to primaries and local caucuses to select candidates. Ballot initiatives and referenda allow citizens to enact laws directly. Many democracies now use proportional representation, encouraging smaller, more specific parties rather than two dominant ones. Yet voters keep getting angrier. There is a steady erosion of trust in politicians, parties, and democratic institutions, culminating most recently in major populist victories in the United States, the United Kingdom, and elsewhere. Frances Rosenbluth and Ian Shapiro argue that devolving power to the grass roots is part of the problem, not the solution. Efforts to decentralize political decision-making make governments and especially political parties less effective and less able to address constituents' long-term interests. To revive confidence in governance, we must restructure our political systems to restore power to the core institution of representative democracy: the political party.

Creating tables in Excel allows for easier formatting and reporting, but the new syntax that it implies can be intimidating to the uninitiated. In this guide, one of the developers of the official Microsoft Excel 2013 templates—all of which employ tables—helps introduce readers to the multiple benefits of tables. The book begins by explaining what tables are, how to create them, and how they can be used in reporting before moving on to slightly more advanced topics, including slicers and filtering, working with VBA macros, and using tables in the Excel web app. Novice Excel users and experts alike will find relevant, useful, and authoritative information in this one-of-a-kind resource.
