patient care through professionalism in daily medical practice
Five Star Doody's Review: "This is an outstanding book for all
clinicians and professors, indeed for everyone in medicine to help
mentor and self-police the medical profession." "Understanding
Medical Professionalism is a 'must-have' for all involved in the
healing arts. The book demystifies professionalism, bringing it
from a philosophical, mystical concept to a practical everyday set
of behaviors. The twelve chapters, in a uniform way, provide
wonderful, real-life stories that illustrate the challenges faced by
practitioners, describe ways to deal with those challenges, and
help develop the personal and institutional skills necessary to
provide excellent and compassionate care." -- Carlos A. Pellegrini,
MD, FACS, FRCSI (Hon.), The Henry N. Harkins Professor and
Chair, Department of Surgery, University of Washington

"Insightful, practical, and authoritative. Building on their own
research and that of others, Levinson et al. offer a comprehensive
discussion of medical professionalism from the refreshing
perspective of behavioral skills and an enabling healthcare
system. Understanding Medical Professionalism has
fundamentally reframed the professionalism debate and will likely
remain the definitive work in this field for quite some time." --
David G. Nichols, MD, President and CEO, The American Board of
Pediatrics "The authors' ambitious goal of providing a framework
for the continuum of physician development of professional
behaviors, from student through expert senior clinician, has been
met. Students will find the text modular and instructive; residents
will benefit from the reinforcement of positive professional
behaviors and explication of strategies to excel in this
competency; educational program directors will find the
framework and tools for assessment and strategies for
remediation enriching; and the expert professional will find subtle
opportunities to grow to mastery of this most important
physician competency." -- Thomas J. Nasca, MD, MACP, Chief
Executive Officer, Accreditation Council for Graduate Medical
Education, Professor of Medicine, Jefferson Medical College "The
authors offer a framework and an approach to medical
professionalism that enable us to understand it, teach it, and
