In many cases our ability to remember our experiences is crucial for the justice system. The problem, though, is that perception and memory are fallible. How often do our eyes or memories deceive us? Is there some way to avoid these errors, perhaps by gathering our memory-based evidence in just the right way? Can we specify the circumstances in which perceptual or memory errors are more or less likely to occur? Daniel Reisberg tackles these questions, drawing on the available science and also his experience in training attorneys. *100 Facts* Franklin Classics Trade Press

Buddhism is said to be universal because it transcends all notions of time and culture. A French shepherd from the Middle Ages can apply it just as easily as a Singaporean businessman from the

twenty-first century. The Buddha's teachings offer a method for understanding how to be and how to act—in other words, how to live our humanity while taking care of ourselves and others. The heroes referred to in this book are ordinary beings like us who choose to develop as individuals through their understanding and application of kindness and compassion. These heroes are bodhisattvas who wish for all beings to meet with lasting happiness and to experience protection from all causes for unhappiness. This handbook provides accessible explanations of what it means to live like a bodhisattva and offers

a series of simple exercises directly related to daily life. It gives us key points for facing the difficulties we encounter in a new way and perceiving our lives according to altruistic values. Born in Tibet in 1949, Lama Jigme Rinpoche grew up and received his education with the principal teachers of the Kagyu lineage of Tibetan Buddhism. The Sixteenth Karmapa named Lama Jigme Rinpoche as his official representative and the spiritual director of Dhagpo Kagyu Ling in France. Ever since, Lama Jigme Rinpoche has filled this role. Strengthened by many years of experience in the West, his unique and modern approach renders the Buddha's millennia-old wisdom accessible and allows

students to apply it concretely in daily twenty-first-century life.

?Folklore in the Digital Age shows how digital folklore transcends the boundaries of cyberspace and has very real effect on our everyday life in today's interconnected global world. Online and digital cultures are perhaps the most vivid aspects of globalization and while global multimedia culture may on the one hand endanger traditional folklore, there is no doubt that it creates new folklore as well. Collecting essays from Violetta Krawczyk-Wasilewska's 15 years of e-folklore research, this book is an illustration of the range

of modern folklore studies. While these essays cover the most serious political issues of the day, such as the 9/11 attacks, the Arab Spring and global epidemic threats such as the HIV virus, the book also touches on more lighthearted topics, such as online dating and food culture.

Modern Houses takes readers on a fun-filled tour through ten of the most important houses by the greatest

architects of the twentieth and twenty-first centuries. Beginning with a brief biographical sketch of each architect, illustrator Didier Cornille uses a light touch to depict the various stages of construction, paying special attention to key design innovations and signature details. Cornille's charming drawings and accessible text unlock the secrets of modern classic houses, ranging from Le Corbusier's Villa Savoye (1931) and Frank Lloyd Wright's Fallingwater

(1939) to Shigeru Ban's Cardboard House (1995) and Rem Koolhaas's Bordeaux House (1998). Readers of all ages will delight in this colorful introduction to modern architecture's most extraordinary homes. [A Concise Introduction to Logic](#) Fox Chapel Publishing
