*Rethinking Library Spaces and Services* John Wiley & Sons

This comprehensive yet accessible text provides a good introduction to the fundamental concepts of Information Technology and skillfully elaborates on their applications, covering in the process the entire spectrum of IT related topics. Organized into three parts, the book offers an insightful analysis of the subject, explaining the concepts through suitable illustrations. Part I covers basic issues and concepts of Internet and the techniques of acquiring, storing, structuring and managing information that may involve images, text files and video data. The reader is exposed to both centralized and distributed database systems. Part II deals with the core topics in developing information systems which are based on audio and speech compression, multimedia communication techniques, and soft computing for analysis and interpretation of data. Part III focusses on a number of application areas-as remote sensing, telemedicine, e-commerce, cybermediary and rural development-besides the traditional engineering disciplines, highlighting their social impacts. The book is intended for undergraduate and postgraduate students of information technology, computer science as well as electronics and electrical communication engineering. It should also serve as an excellent reference for professionals in the IT field. Key Features: Discusses in detail the theoretical basis behind a web graph. Deals with security issues of computer networks and their implications in an easy-to-understand manner. Contains more than 30 projects (with useful hints) that students of various IT courses would find interesting to work on. Three chapters are exclusively devoted to different aspects of database management and data mining systems.

Critical Management Studies', or 'CMS', describes a diverse group of work that has adopted a critical or questioning approach to the traditional concerns of Management Studies, and the growing interest in CMS has produced a vibrant and exciting body of research. Christopher Grey and Hugh Willmott, leading authorities in this area, introduce seventeen readings which reflect these developments, and show CMS' importance. As an assessment of CMS, the Reader will be of interest to academics, researchers, and students of Management Studies. As an introduction to CMS, it will prove invaluable to students taking courses requiring familiarity with the CMS literature.

**Containing a Codification of Documents of General Applicability and Future Effect as of December 31, 1948, with Ancillaries and Index** Council of Europe

Elections are a pre-condition for democratic governance since it is through them that the citizens of a country choose freely, and on the basis of the law, the persons that can legitimately govern in their name and in their interest. The right to free elections, as enshrined in the Article 3 of the Protocol to the European Convention on Human Rights, is a "fundamental principle in a truly democratic political regime". It comprises a series of safeguards and procedures that ensure respect for active and passive electoral rights and the conduct of genuine free and fair elections. Civil society has a distinct role to play since it observes the electoral process and contributes to the development of national electoral procedures through advice and recommendations. The Council of Europe handbook Reporting on elections aims to help observers become more efficient and to produce more effective reports, specifically focusing on the reporting of core team members. At the same time, it also covers the reporting of long- and short-term observers. It deals mainly with final election reports and reports/statements on preliminary findings, while also providing insight into interim reports and ideas for ad hoc reports and press releases, in addition to tips on how to follow up on recommendations.

Discover the bridge between theory and applied research in the hospitality industry The success of marketing programs is dependent on the knowledge of the trends in the marketplace. Handbook of Marketing Research Methodologies for Hospitality and Tourism is a comprehensive guide that clearly explains analyzing markets, utilizing qualitative and quantitative research methodologies, applying findings to market, development, and marketing strategies for the hospitality industry. The text contains detailed outlines and case studies of several types of research, including feasibility studies, market assessment studies, and site selection studies. Numerous graphic examples and presentation techniques are provided to bridge between theory and applied research with ease. Handbook of Marketing Research Methodologies for Hospitality and Tourism clearly details, all in a single volume, the application of research methodology to the real world, as well as showing how to effectively communicate findings and recommendations. This resource provides dozens of case examples and close attention to clearly explaining all facets of market analysis. Part one discusses research and methodologies, including primary and secondary data and integrative research. Part two explores market analysis and assessment, including marketing assessment for development planning and assessing focal points and intuitive techniques. The third part helps the reader apply their learned research into strategies. The final section explains market analysis planning and communications, including preparing a research-based business review and the effective presentation of research findings. The text provides appendixes of essential data, and a helpful glossary of terms. Topics in Handbook of Marketing Research Methodologies for Hospitality and Tourism include: qualitative market analysis techniques and applications quantitative market research and analysis techniques and applications approaches to organized site selection studies, market studies, and project feasibility studies identification of the processes and sources for key market data for projects, markets, and sites presentation and communication techniques and strategies for market analysis and research findings the relationship of market analysis and research to marketing and development strategy selection and more! Handbook of Marketing Research Methodologies for Hospitality and Tourism is a perfect resource for upper-level undergraduate students and graduate students in hospitality colleges and schools; hotel and restaurant development and market research personnel in hospitality corporations; and market research firms serving the hospitality industry.

The vision of Learning Environments for Young Children: Rethinking Library Spaces and Services is

about learning, families, and community, where the public library presents a community-based educational setting in which librarians serve as educators, guides, coaches, and facilitators of lifelong, active learning; access for children to enriching, satisfying, and developmentally appropriate resources and learning opportunities; diverse collections, programs, and technical resources for young children and the adults in their lives; programs and resources that encourage children's focused participation, creativity, critical thinking, cooperation, and problem solving; and a nonjudgmental, integrated, and interdisciplinary approach to lifelong learning, developing the whole person, child or adult. Included in Learning Environments for Young Children are field-tested measuring instruments that you and your staff can use to conduct a qualitative assessment of your library's children's services. These ready-to-use forms will help you collect information that will highlight the importance of early childhood services in presentations to funding sources, trustees, and other key stakeholders.

This collection, entitled Digital Health for Predictive, Preventive, Personalized and Participatory Medicine contains the proceedings of the first International conference on digital healthtechnologies (ICDHT 2018). Ten recent contributions in the fields of Artificial Intelligence (AI) and machine learning, Internet of Things (IoT) and data analysis, all applied to digital health. This collection enables researchers to learn about recent advances in the above mentioned fields. It brings a technological viewpoint of P4 medicine. Readers will discover how advanced Information Technology (IT) tools can be used for healthcare. For instance, the use of connected objects to monitor physiological parameters is discussed. Moreover, even if compressed sensing is nowadays a common acquisition technique, its use for IoT is presented in this collection through one of the pioneer works in the field. In addition, the use of AI for epileptic seizure detection is also discussed as being one of the major concerns of predictive medicine both in industrialized and low-income countries. This work is edited by Prof. Lotfi Chaari, professor at the University of Sfax, and previously at the University of Toulouse. This work comes after more than ten years of expertise in the biomedical signal and image processing field.

Create a more effective system for evaluating online faculty Evaluating Online Teaching is the first comprehensive book to outline strategies for effectively measuring the quality of online teaching, providing the tools and guidance that faculty members and administrators need. The authors address challenges that colleges and universities face in creating effective online teacher evaluations, including organizational structure, institutional governance, faculty and administrator attitudes, and possible budget constraints. Through the integration of case studies and theory, the text provides practical solutions geared to address challenges and foster effective, efficient evaluations of online teaching. Readers gain access to rubrics, forms, and worksheets that they can customize to fit the needs of their unique institutions. Evaluation methods designed for face-to-face classrooms, from student surveys to administrative observations, are often applied to the online teaching environment, leaving reviewers and instructors with an ill-fitted and incomplete analysis. Evaluating Online Teaching shows how strategies for evaluating online teaching differ from those used in traditional classrooms and vary as a function of the nature, purpose, and focus of the evaluation. This book guides faculty members and administrators in crafting an evaluation process specifically suited to online teaching and learning, for more accurate feedback and better results. Readers will: Learn how to evaluate online teaching performance Examine best practices for student ratings of online teaching Discover methods and tools for gathering informal feedback Understand the online teaching evaluation life cycle The book concludes with an examination of strategies for fostering change across campus, as well as structures for creating a climate of assessment that includes online teaching as a component. Evaluating Online Teaching helps institutions rethink the evaluation process for online teaching, with the end goal of improving teaching and learning, student success, and institutional results.

*Reporting on elections* Routledge

Building on recent changes and debates surrounding the use of observation, this fully updated second edition of Classroom Observation explores the role of lesson observation in the preparation, assessment and professional learning of teachers, lecturers and educators at all levels and across all educational organisations. Offering practical guidance and detailed insights on an aspect of training that is a source of anxiety for many teachers, this thought-provoking book offers a critical analysis of the place, role and nature of lesson observation in the lives of education professionals. Updated to incorporate the latest research, policy and practical developments on observation, this new edition also includes greater coverage of research and developments in the field of observation beyond the UK. Enabling readers to use observation as a lens for understanding, informing and improving teaching and learning, and equipping them with structured frameworks for applying observation, this book includes sections on: Teacher autonomy and professional identity Performance management, professional standards and accountability Peer observation, self-observation and critical reflection Educational assessment and evaluation Peer-based models of observation Using digital technology to inform learning. Written for all student and practising teachers as well as teacher educators and those engaged in educational research, Classroom Observation is an essential introduction to how we observe, why we observe, and how it can be best used to improve teaching and learning.

Earth Observation interacts with space, remote sensing, communication, and information technologies, and plays an increasingly significant role in Earth related scientific studies, resource management, homeland security, topographic mapping, and development of a healthy, sustainable environment and community. Geospatial Technology for Earth Observation provides an in-depth and broad collection of recent progress in Earth observation. Contributed by leading experts in this field, the book covers satellite, airborne and ground remote sensing systems and system integration, sensor orientation, remote sensing physics, image classification and analysis, information extraction, geospatial service, and various application topics, including cadastral mapping, land use change evaluation, water environment monitoring, flood mapping, and decision making support. Geospatial Technology for Earth Observation serves as a valuable training source for researchers, developers, and practitioners in geospatial science and technology industry. It is also suitable as a reference book for upper level college students and graduate students in geospatial technology, geosciences, resource management, and informatics.

*Vehicle Classification Sampling Methodology Evaluation* Future of the National Weather Service Cooperative Observer Network

This book collects 15 papers written by renowned scholars from across the globe that showcase the forefront research in Earth observation (EO), remote sensing (RS), and geoscientific ground investigations to study archaeological records and cultural heritage. Archaeologists, anthropologists,

geographers, remote sensing, and archaeometry experts share their methodologies relying on a wealth of techniques and data including, but not limited to: very high resolution satellite images from optical and radar space-borne sensors, air-borne surveys, geographic information systems (GIS), archaeological fieldwork, and historical maps. A couple of the contributions highlight the value of noninvasive and nondestructive laboratory analyses (e.g., neutron diffraction) to reconstruct ancient manufacturing technologies, and of geological ground investigations to corroborate hypotheses of historical events that shaped cultural landscapes. Case studies encompass famous UNESCO World Heritage Sites (e.g., the Nasca Lines in Peru), remote and yet-to-discover archaeological areas in tropical forests in central America, European countries, south Asian changing landscapes, and environments which are arid nowadays but were probably full of woody vegetation in the past. Finally, the reader can learn about the state-of-the-art of education initiatives to train site managers in the use of space technologies in support of their activities, and can understand the legal aspects involved in the application of EO and RS to address current challenges of African heritage preservation.

Administrative Report LJ Springer

This book constitutes revised papers from the seven workshops and one accompanying event which took place at the 21st International Conference on Business Information Systems, BIS 2018, held in Berlin, Germany, in July 2018. Overall across all workshops, 58 out of 122 papers were accepted. The workshops included in this volume are: AKTB 2018 - 10th Workshop on Applications of Knowledge-Based Technologies in Business BITA 2018 - 9th Workshop on Business and IT Alignment BSCT 2018 - 1st Workshop on Blockchain and Smart Contract Technologies IDEA 2018 - 4th International Workshop on Digital Enterprise Engineering and Architecture IDEATE 2018 - 3rd Workshop on Big Data and Business Analytics Ecosystems SciBOWater 2018 - Scientific Challenges & Business Opportunities in Water Management QOD 2018 - 1st Workshop on Quality of Open Data In addition, one keynote speech in full-paper length and contributions from the Doctoral Consortium are included
