### Maximizing the Benefits of Reform Crown

From Summary: ... the 1994 Violent Crime Control and Law Enforcement Act, which gives DOJ's Civil Rights Division the authority to investigate state and local law enforcement agencies that it believes have unconstitutional policies or practices of conduct. The law is intended to address systemic issues, rather than individual complaints... The alleged misconduct cannot be an isolated incident. And there is no private right of action under the 1994 law; only the Justice Department is given authority to launch investigations and litigation under this statute.

Compstat and community policing are both powerful tools that have been quite effective in police reform in the United States. But just how well do they work together? This report takes a look at the impact of these reforms when implemented simultaneously in the same police organization. While some have speculated that Compstat complements and supports community policing and even improves it, there is very little systematic evidence to support these claims. This report uses fieldwork data from site visits to seven U.S. police agencies to address this issue. The principal finding that these reforms operated largely independently suggested that there were opportunities for making them work more closely with one another in ways that promise greater benefits than having them operate separately. The goal of this publication is to challenge policymakers, practitioners, and scholars to reconsider the current relationship between Compstat and community policing and conceive of more innovative approaches to their co-implementation. As a starting point, we make four key recommendations for integration of these two powerful reforms.

Brooklyn Borough president and Democratic nominee for New York City mayor Eric Adams is on a mission to tackle one of the most stubborn health problems in the country: chronic disease in the African American community. African Americans are heavier and sicker than any other group in the U.S., with nearly half of all Black adults suffering from some form of cardiovascular disease. After Adams woke up with severe vision loss one day in 2016, he learned that he was one of the nearly 5 million Black people living with diabetes-and, according to his doctor, he would have it for the rest of his life. A police officer for more than two decades, Adams was a connoisseur of the fast-food dollar menu. Like so many Americans with stressful jobs, the last thing he wanted to think about was eating healthfully. Fast food was easy, cheap, and comfortable. His diet followed him from the squad car to the state senate, and then to Brooklyn Borough Hall, where it finally caught up with him. But Adams was not ready to become a statistic. There was a better option besides medication and shots of insulin: food. Within three months of adopting a plant-based diet, he lost 35 pounds, lowered his cholesterol by 30 points, restored his vision, and reversed his diabetes. Now he is on a mission to revolutionize the health of not just the borough of Brooklyn, but of African Americans across the country. Armed with the hard science and real-life stories of those who have transformed their bodies by changing their diet, Adams shares the key steps for a healthy, active life. With this book, he shows readers how to avoid processed foods, cut down on salt, get more fiber, and substitute beef, chicken, pork, and dairy with delicious plant-based alternatives. In the process he explores the origins of soul food-a cuisine deeply important to the Black community, but also one rooted in the horrors of slavery-and how it can be reimagined with healthy alternatives. Features more than 50 recipes from celebrities and health experts, including Paul McCartney, Queen Afua, Jenné Claiborne, Bryant Jennings, Charity Morgan, Moby, and more! The journey to good health begins in the kitchen-not the hospital bed!

In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of "the world outside and the pictures in our heads", a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.

The beloved, bestselling classic that became the movie, A CHRISTMAS STORY -- humorous and nostalgic Americana, reissued in a strikingly designed paperback edition. Before Garrison Keillor and Spalding Gray there was Jean Shepherd: a master monologist and writer who spun the materials of his all-American childhood into immensely resonant--and utterly hilarious--works of comic art. In God We Trust: All Others Pay Cash represents one of the peaks of his achievement, a compound of irony, affection, and perfect detail that speaks across generations. In God We Trust, Shepherd's wildly witty reunion with his Indiana hometown, disproves the adage "You can never go back." Bending the ear of Flick, his childhood-buddy-turned-bartender, Shepherd recalls passionately his genuine Red Ryder BB gun, confesses adolescent failure in the arms of Junie Jo Prewitt, and relives a story of man against fish that not even Hemingway could rival. From pop art to the World's Fair, Shepherd's subjects speak with a universal irony and are deeply and unabashedly grounded in American Midwestern life, together rendering a wonderfully nostalgic impression of a more innocent era when life was good, fun was clean, and station wagons roamed the earth. A comic genius who bridged the gap between James Thurber and David Sedaris, Shepherd may have accomplished for Holden,

Indiana, what Mark Twain did for Hannibal, Missouri.

Brass Buttons, Blue Coats "Remembering All Who Served 1871 to 1971" By: George E. Rutledge As a young police sergeant in 1976, George E. Rutledge met a veteran who told him, "I served 35 years in our police department and the day I retired was the very last time I ever heard from anyone in the police department. And the same thing will happen to you." Rutledge has dedicated his life to making sure all who served in the Yonkers Police Department are remembered and honored. Brass Buttons - Blue Coats is a thorough documentation of all individuals who have served from the beginning of the Yonkers Police Department to 1971. Personal profiles and photographs create a lasting memorial of service. In 1866, still suffering from the turmoil of the Civil War, the town of Yonkers voted to hire fourteen Metropolitan Policemen from New York, creating the first Yonkers police force. From this humble beginning, the Yonkers police force has grown to over 600 dedicated men and women. From foot patrols to squad cars, notebooks to computers, the Yonkers police force has grown and adapted with the times. But the purpose has never wavered: to Serve and Protect. Civil War veterans, Vietnam veterans, rescue workers after 9/11, and Special Olympic volunteers - the Yonkers force is filled with people who have dedicated their lives to their country and their community. Rich with details of service and crimes over 100 years, Brass Buttons - Blue Coats is both a fitting tribute to brave men and women as well as a fascinating look at the history of Yonkers and the history of crime.

Craig's study of McAdoo and Baker illuminates the aspirations and struggles of two prominent southern Democrats. In this dual biography, Douglas B. Craig examines the careers of two prominent American public figures, Newton Diehl Baker and William Gibbs McAdoo, whose lives spanned the era between the Civil War and World War II. Both Baker and McAdoo migrated from the South to northern industrial cities and took up professions that had nothing to do with staple-crop agriculture. Both eventually became cabinet officers in the presidential administration of another southerner with personal memories of defeat and Reconstruction: Woodrow Wilson. A Georgian who practiced law and led railroad tunnel construction efforts in New York City, McAdoo served as treasury secretary at a time when Congress passed an income tax, established the Federal Reserve System, and funded the American and Allied war efforts in World War I. Born in the eastern panhandle of West Virginia, Baker won election as mayor of Cleveland in the early twentieth century and then, as Wilson's secretary of war, supervised the dramatic build-up of the U.S. military when the country entered the Great War in Europe. This is the first full biography of McAdoo and the first since 1961 of Baker. Craig points out similarities and differences in their backgrounds, political activities, professional careers, and family lives. Craig's approach in Progressives at War illuminates the shared struggles, lofty ambitions, and sometimes conflicted interactions of these figures. Their experiences and perspectives on public and private affairs (as insiders who nonetheless were, in some sense, outsiders) make their lives, work, and thought especially interesting. Baker and McAdoo, in league with Wilson, offer Craig the opportunity to deliver a fresh and insightful study of the period, its major issues, and some of its leading figures.

"As a kid growing up in Manhattan, William Helmreich played a game with his father they called "Last Stop." They would pick a subway line and ride it to its final destination, and explore the neighborhood there. Decades later, Helmreich teaches university courses about New York, and his love for exploring the city is as strong as ever. Putting his feet to the test, he decided that the only way to truly understand New York was to walk virtually every block of all five boroughs—an astonishing 6,000 miles. His epic journey lasted four years and took him to every corner of Manhattan, Brooklyn, Queens, the Bronx, and Staten Island. Helmreich spoke with hundreds of New Yorkers from every part of the globe and from every walk of life, including Mayor Michael Bloomberg and former mayors Rudolph Giuliani, David Dinkins, and Edward Koch. Their stories and his are the subject of this captivating and highly original book. We meet the Guyanese immigrant who grows beautiful flowers outside his modest Queens residence in order to always remember the homeland he left behind, the Brooklyn-raised grandchild of Italian immigrants who illuminates a window of his brownstone with the family's old neon grocery-store sign, and many, many others. Helmreich draws on firsthand insights to examine essential aspects of urban social life such as ethnicity, gentrification, and the use of space. He finds that to be a New Yorker is to struggle to understand the place and to make a life that is as highly local as it is dynamically cosmopolitan."--Publisher's description.

Children are the foundation of the United States, and supporting them is a key component of building a successful future. However, millions of children face health inequities that compromise their development, well-being, and long-term outcomes, despite substantial scientific evidence about how those adversities contribute to poor health. Advancements in neurobiological and socio-behavioral science show that critical biological systems develop in the prenatal through early childhood periods, and neurobiological development is extremely responsive to environmental influences during these stages. Consequently, social, economic, cultural, and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood. *Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity* builds upon and updates research from *Communities in Action: Pathways to Health Equity* (2017) and *From Neurons to Neighborhoods: The Science of Early Childhood Development* (2000). This report provides a brief overview of stressors that affect childhood development and health, a framework for applying current brain and development science to the real world, a roadmap for implementing tailored interventions, and recommendations about improving systems to better align with our understanding of the significant impact of health equity.
