Superforecasting - Wikipedia

Superforcasting: The Art of Science and Prediction, by Philip E. Tetlock, is a book about the art and science of statistical

prediction, and its everyday uses. Except it isn't really, that is just what they are selling it as. The book starts off really strong, analyzing skepticism, illusions of statistical knowledge, and various types of bias.

Superforecasting by Philip E. Tetlock, Dan Gardner ...

Managing large-scale, geographically distributed, and long-term risks arising from diverse underlying causes – ranging from poverty to underinvestment in protecting against natural hazards or failures of sociotechnical, economic, and financial systems – poses formidable challenges for any theory of effective social decision-making.

In SUPERFORECASTING: The Art and Science of Prediction (Crown; September 29, 2015) Philip Tetlock and coauthor Dan Gardner offer a masterwork on prediction, drawing on decades of research and the results of a massive, government-funded forecasting tournament. They look at how forecasting accuracy can be judged, why it is so seldom done, and what results came out of the most comprehensive analysis of political and economic forecasting of experts ever conducted.
