Mass Killings and Violence in Spain, 1936-1952 Routledge

In the nearly four decades since the First International Symposium on Victimology convened in Jerusalem in 1973, some concepts and themes have continued to hold a prominent place in the literature, while new ones have also emerged. Exploring enduring topics such as conceptions of victimhood, secondary and hidden victimization, and social services for victims along with more recent issues, the International Handbook of Victimology provides an interdisciplinary study of the topic from a diverse range of professionals on the cutting edge of victimology research. Forty experts from top research facilities and universities around the world provide input on the traditional longstanding issues that surround the field of victimology and explore newer themes such as restorative justice, the use of government-sponsored crime victimization surveys, compensation and

restitution schemes, and victims' rights legislation. The second in a trilogy of volumes, this handbook examines victimology from criminology, sociology, psychology, law, and philosophy perspectives. Topics discussed include: Theoretical and historical frameworks used in the study of victimology Advances in research methods, including GIS technology Patterns of victimization, including drug- sex-, and work-related Responses to victimization by the victim and society Restorative justice issues Victimization as it occurs in various social divisions Describing current research and identifying new ideas and topics of concern, the book collectively presents the "state-of-the-art" of the field today. In doing so, it helps to inform contemporary understanding of an eternal societal plague. Those wishing to continue their studies should consult the International Handbook of Criminology and the International Handbook of Penology and Criminal Justice, which complete the trilogy.

A Greek and English lexicon to the New Testament. To this is prefixed a Greek grammar Oxbow Books

Violence is most common when there is a power disparity between two groups of people, and those with less power are far more likely to become the victim in a violent situation. Environment has as much influence on whether or not violence will occur as the person or people involved, and this relationship has drawn the attention of researchers worldwide. *Globalization and Its Impact on Violence Against Vulnerable Groups* is an essential source that provides research that delves deeply into occurrences of violence and the environmental and personal influences that lead to violence in order to better understand and prevent it from happening. Featuring a wide range of topics such as e-blackmail, human displacement, and psychology, this book is ideal for criminologists, law enforcement, psychologists, therapists, academicians, sociologists, anthropologists, government officials, researchers, and students.

Africa lies at the centre of the international community's peacebuilding interventions, and the continent's rich multitude of actors, ideas, relationships, practices, experiences, locations, and contexts in turn shapes the possibilities and practices of contemporary peacebuilding. This timely new handbook surveys and analyses peacebuilding as it operates in this specifically African context. The book begins by outlining the evolution and the various ideologies, conceptualizations, institutions, and practices of African peacebuilding. It identifies critical differences in how African peacebuilders have conceptualized and operationalized peacebuilding. The book then considers how different actors sustain, construct, and use African infrastructure to identify

and analyse converging, differing, or competing mandates, approaches, and interests. Finally, it analyses specific thematic issues such as gender, justice, development, democracy, and the politics of knowledge before ending with in-depth analyses of case studies drawn from across the continent. Bringing together an international line-up of expert contributors, this book will be an essential read for students and scholars of African politics, post-conflict reconstruction, security, and peace and conflict studies.

In this volume, a new generation of researchers explore and demonstrate the interaction between politics and violence in the context of Greek and European history. In terms of focus, the articles here extend over a time span stretching from the Greek classical period to the twentieth century. The ancient Greek polis, medieval and early modern Europe, Byzantium and the Ottoman Empire, nineteenth-century Britain and the Greek society of the 1940s are some of the historical periods in which the relationship between violence and politics is examined. At the same time, the authors tackle important themes concerning this relationship, such as legitimate and illegitimate violence, violence from above and from below, resistance and revolt, authority and subordination, and gendered and political violence.

Women's Access to Transitional Justice in Timor-Leste Hong Kong University Press

Weapons and tools are frequently found depicted in rock art in many parts of the globe and different periods and in varying social contexts. This collection of papers by leading rock art specialists

examines the subjective and metaphorical value of weapons and tools in art, the actions that created them, and their contexts. It also takes into account that such representations incorporate and transmit some kind of understanding about the world and the relationship between objects and humans. Contributors analyse objects and weapons as status symbols, as evidences of cultural contacts, as ideological devices, etc. Divided into regional sections which, for once, do not focus on Scandinavia, chapters deal with the representations of weapons and certain kinds of tools (such as axes and sickles) in different prehistoric, protohistoric and traditional community contexts all over the world. Attention focuses on rock art, but also looks at stelae and statue-menhirs, as well as other kinds of 'container' or vehicle for this kind of depiction. The major concern is to discuss the possible meanings of these embodied signs in different areas and periods, since meanings are permeable both to time and space. Papers either centre their attention in broader approaches based on a specific area, region or people, or focus on particular case studies.

Weapons and Tools in Rock Art

London : Longmans, Green, Reader, and Dyer

This is the first book to explore prehistoric warfare and violence by integrating qualitative research methods with quantitative, scientific techniques of analysis such as paleopathology, morphometry, wear analysis, and experimental archaeology. It investigates early warfare and violence from the standpoint of four broad interdisciplinary themes: skeletal markers of violence and weapon training; conflict in prehistoric rock-art;

the material culture of conflict; and intergroup violence in archaeological discourse. The book has a wide-ranging chronological and geographic scope, from early Neolithic to late Iron Age and from Western Europe to East Asia. It includes world-renowned sites and artefact collections such as the Tollense Valley Bronze Age battlefield (Germany), the UNESCO World Heritage Site at Tanum (Sweden), and the British Museum collection of bronze weaponry from the late Shang period (China). Original case studies are presented in each section by a diverse international authorship. The study of warfare and violence in prehistoric and pre-literate societies has been at the forefront of archaeological debate since the publication of Keeley's provocative monograph 'War Before Civilization' (Oxford 1996). The problem has been approached from a number of standpoints including anthropological and behavioural studies of interpersonal violence, osteological examinations of sharp lesions and blunt-force traumas, wear analysis of ancient weaponry, and field experiments with replica weapons and armour. This research, however, is often confined within the boundaries of the various disciplines and specialist fields. In particular, a gap can often be detected between the research approaches grounded in the humanities and social sciences and those based on the archaeological sciences. The consequence is that, to this day, the subject is dominated by a number of undemonstrated assumptions regarding the nature of warfare, combat, and violence in non-literate societies. Moreover, important methodological questions remain unanswered: can we securely distinguish between violence-related and accidental trauma on

skeletal remains? To what extent can wear analysis shed light on long-forgotten fighting styles? Can we design meaningful combat tests based on historic martial arts? And can the study of rock-art unlock the social realities of prehistoric warfare? By breaking the mould of entrenched subject boundaries, this edited volume promotes interdisciplinary debate in the study of prehistoric warfare and violence by presenting a number of innovative approaches that integrate qualitative and quantitative methods of research and analysis.

A Southern Criminology of Violence, Youth and Policing examines public experiences of insecurity and the social impacts of security programmes that aim to address violence in Brazil. This book contributes to the emerging field of southern criminology by engaging with the perils faced by people living in 'favelas' in Brazil and critically investigating the discourse of state actors. It combines original ethnographic data with critical analysis to expand understandings of violence and control in urban and postcolonial contexts. This study challenges dominant practices and notions of security and control. Its objective is to decolonise knowledge and shed light on issues relating to policing, coercion, and the great socioeconomic, historical and spatial inequalities that shape the lives of millions of people in the Global South. The findings of this book expose the exacerbation of social problems by the expansion of the penal and crime industry, unsettling the applicability and universalism of mainstream managerial criminology. The evidence reveals that new modes of

securitisation have not addressed long-standing issues of sexism, racism, classism and brutalisation in the police. Moreover, through the increasing use of methods of control and incarceration, security programmes have failed to prevent diverse forms of violence and challenge the expansion of organised crime. Instead they have exacerbated the inequalities that affect the most marginalised populations. Written in a clear and direct style, this book will appeal to students and scholars in criminology, sociology, cultural studies, social theory and those interested in learning about the social injustices that exists in the Global South.

Globalization and Its Impact on Violence Against Vulnerable Groups Royal Historical Society

International courts and other actors are increasingly taking into account pre-existing social structures and inequalities when addressing and redressing human rights violations, in particular discrimination against specific groups. To date, however, academic legal research has paid little attention to this gentle turn in international human rights law and practice to address structural discrimination. In order to address this gap, this study analyses whether and to what extent international and regional human rights frameworks foresee positive obligations for State parties to address structural discrimination, and, more precisely, gender hierarchies and stereotypes as root causes of gender-based violence. In order to answer this question, the book analyses whether or not international human rights law requires pursuing a root-cause-sensitive and transformative approach to structural discrimination against women in general and to the prevention, protection and reparation of

violence against women in particular; to what extent international courts and (quasi)judicial bodies address State responsibility for the systemic occurrence of violence against women and its underlying root causes; whether or not international courts and monitoring bodies have suitable tools for addressing structural discrimination within the society of a contracting party; and the limits to a transformative approach.

Ludger Mees offers the first comprehensive study of one of Europe's most protracted ethnic conflicts. He carefully analyzes both the historical roots of the conflict and its later growing violent dimension. Special attention is paid to the framing of a new opportunity structure during the 1990s, which facilitated the first serious, but ultimately frustrated, attempt to broker a settlement. In the light of different theoretical and comparative approaches, the reasons for the dramatic return of terrorism and the possibilities of a more successful conflict de-escalation in the near future are discussed.

Historians have only recently established the scale of the violence carried out by the supporters of General Franco during and after the Spanish Civil War of 1936-1939. An estimated 88,000 unidentified victims of Francoist violence remain to be exhumed from mass graves and given a dignified burial, and for decades, the history of these victims has also been buried. This volume brings together a range of Spanish and British specialists who offer an original and challenging overview of this violence. Contributors not only examine the mass

killings and incarcerations, but also carefully consider how the repression carried out in the government zone during the Civil War - long misrepresented in Francoist accounts - seeped into everyday life. A final section explores ways of facing Spain's recent violent past.

Preventing Teen Violence Taylor & Francis

Over the past 40 years, considerable progress has been made in lowering rates of domestic violence in our communities. This progress has been uneven, however, due to continuing misconceptions about the causes and dynamics of domestic violence, which include an exaggerated focus on males as perpetrators and females as victims, as well as a heavy-handed law enforcement response that compromises the rights of criminal defendants without necessarily reducing violence. *Gender and Domestic Violence* presents empirical research findings and reform recommendations for prosecutors, criminal defense attorneys, policy makers and intervention providers with the aim of rectifying shortcomings in legal and law enforcement responses to domestic violence. The volume's editors and chapter authors confront the notion that certain beliefs shared among victim advocates, legal actors, and other stakeholders -- principally that domestic violence is bound by gender, and is primarily a crime against women -- have led to the use of ineffective and potentially harmful one-size-fits-all intervention policies that can jeopardize defendant due process and victim safety. Domestic violence experts, legal scholars, and practicing attorneys present how gendered aspects of domestic violence affect legal decision-making and practice and provide

strategies for becoming more inclusive in the adjudicative process, intervention/prevention, and practice.

Gender and Domestic Violence:

Contemporary Legal Practice and Intervention Reforms provides the foundation from which we can begin to move beyond the gender paradigm by recognizing disparities and applying tools that improve research, policing, and practice, allowing us to progress toward eradicating domestic violence, and to move closer to equality.

Violence and Politics Springer Publishing Company

This book brings together international research from scholars and activists on the forms of violence that older women experience into a unique, comprehensive two-volume set. This volume is concerned with understanding the consequences and impacts of violence against older women. The majority of policy and practice has been developed to reflect the dynamics and contexts of violence affecting young women, and most of the available support services had focused on the needs of those of child-bearing age. This volume sheds light on the specific needs and effectiveness of responses to violence against older women, and identifies both challenges and opportunities for developing services that meet older survivor's needs. It will be of interest to researchers in social and health care, gerontology, sociology and social policy, feminist research and criminology.

[Handbook on Teaching and Learning for Sustainable Development](#) CRC Press

The originality of this book rests in the application of the human security framework to analyze sexual and gender-based violence in conflict. The human security paradigm is concerned

and centered on the individual's security threats holistically and is inclusive of both men and women in its agenda. The author argues that making a balanced narrative of sexual violence that includes both men and women as both victims and perpetrators could be a more effective means of preventing conflict-related sexual violence than when men are excluded. Another positive feature of the book rests in its analysis of the plights of victims and survivors of sexual violence during conflict and post-conflict situations. The author describes the devastating emotional and traumatic pain, the psychological agony, the health problems, stigmatization, and impoverishment that sexual violence causes victims and survivors. Moving beyond victims and survivors, the book also examines perpetrators of sexual violence and the questionable part played by a range of social actors. This book has taken on the challenge of interdisciplinary studies that draws upon and integrates evidence and concepts from peace and conflict studies, gender studies, law and human rights as well as sociology and psychology to offer a balanced and elucidatory narrative of the occurrence, perpetrations, impacts, as well as responses and actions required of the international community. It makes a convincing argument that sexual violence in conflict is prevalent and persistent, and that it is a global threat to human security. The subject matter is timely and the author's writing style is easy to follow without taking down the reader, making this book a suitable reading for students, academics as well as practitioners. **REVIEWS and WORDS OF PRAISE** Rev. Abara has produced a critically reflective and thought-provoking text documenting how and when sexual violence is used as

a strategic weapon of war and poses a real threat to global security. This is an important book in ensuring that the mental, physical and economic health and diversity of the victims of sexual violence in conflict are central to developments in human security. -- Professor Amanda J. Broderick, Vice-Chancellor & President, University of East London, UK Francis has taken on the challenge of writing an interdisciplinary book that draws upon and integrates evidence and concepts from peace and conflict studies, gender studies, law and human rights as well as sociology and psychology to offer a balanced and elucidatory narrative of the occurrence, perpetrations, impacts, as well as responses and actions required of the international community. --Professor Giorgia Donà, Co-director of the Centre for Migration, Refugees and Belonging, University of East London A highly relevant book that underlines contemporary issues facing the world today. In a clear and easy to follow style, the author provides a brilliantly insightful engagement in this complex topic. -- Professor Wilson Ozuem, Arden University, UK Rev Francis Abara provides a fresh and comprehensive analysis into one of the greatest afflictions of our times - sexual violence in conflict. The horrific, long-term effects of the physical, emotional, economic, social and mental damage of sexual violence are laid bare. Importantly this book takes a gender inclusive approach and analyses the victimization of both women and men. --Dr Edna Maeyen Solomon, Senior Lecturer in Economics, University of Greenwich, London This book comprehensively presents a systematic analysis of sexual violence in conflict as a threat to global security which Rev. Abara has drawn from a wide

range of sources and synthesized into cogent, coherent, and urgent arguments of global importance. Remarkably, this book is distinctive because it is devoid of prolixity and rhetoric but plainly expresses the social and political upheavals within which sexual violence is unleashed. --Dr Moses Itene, Doctor of International Law and Jurisprudence, University of Huddersfield

A Southern Criminology of Violence, Youth and Policing Routledge

This groundbreaking book on the gender-inclusive treatment of intimate partner abuse has been fully updated to reflect new and refined evidence-based approaches that have evolved since the first edition was published nearly ten years ago. It describes new treatment protocols that are strongly supported by current research that enables mental health practitioners to engage in a more nuanced-and gender inclusive conceptualization and treatment of intimate partner abuse in its many permutations. The book eschews the field's previous reliance on traditional domestic violence and treatment protocols to offer new paradigms that reflect the trend toward a more balanced, evidence-based and less heteronormative conceptualization of partner abuse. It presents the latest findings from the third installment of the Partner Abuse State of Knowledge Project. Included are new examples of evidence-based programs currently in existence and those that are in formative stages, fully updated exercises and handouts, new risk assessment instruments, and new definitions of evidence-based treatment. Of special note are several new appendices that include updated assessment forms, a victim safety plan, client workbook guidelines and exercises, resources and

programs for court-ordered clients, and exercises for high conflict family violence parent groups. In addition, a new assessment protocol will be available as a free download. New to the Second Edition: Includes the latest findings from the Partner Abuse State of Knowledge Project Presents most current literature on risk assessment instruments Provides new definitions of evidence-based treatment regarding degree of rigor along with outcome data and newest relevant studies Discusses promising new group programs Includes a new assessment tool available as free download Describes several new, evidence-based gender-inclusive approaches Offers comprehensive appendices that reflect recent advances including new assessment forms, a victim safety plan, client workbook guidelines and exercises, resources and programs for court-ordered clients, and exercises for high conflict family violence parent groups

Preventing Violence Against Women and Children London : Longmans, Green, Reader, and Dyer

Exploring the important role of education in both pursuing and implementing sustainable development, this timely Handbook highlights how teaching methods at schools and universities can impact the future. It looks at ways not only to inform students about matters related to sustainable development, but also to empower them to adopt behaviours and actions that lead to more sustainable lifestyles.

Rerum Britannicarum Medii Aevi Scriptores University of Alabama Press
Violence against women and children is a serious public health concern, with costs at multiple levels of society. Although violence is a threat to everyone, women and children are

particularly susceptible to victimization because they often have fewer rights or lack appropriate means of protection. In some societies certain types of violence are deemed socially or legally acceptable, thereby contributing further to the risk to women and children. In the past decade research has documented the growing magnitude of such violence, but gaps in the data still remain. Victims of violence of any type fear stigmatization or societal condemnation and thus often hesitate to report crimes. The issue is compounded by the fact that for women and children the perpetrators are often people they know and because some countries lack laws or regulations protecting victims. Some of the data that have been collected suggest that rates of violence against women range from 15 to 71 percent in some countries and that rates of violence against children top 80 percent. These data demonstrate that violence poses a high burden on global health and that violence against women and children is common and universal. Preventing Violence Against Women and Children focuses on these elements of the cycle as they relate to interrupting this transmission of violence. Intervention strategies include preventing violence before it starts as well as preventing recurrence, preventing adverse effects (such as trauma or the consequences of trauma), and preventing the spread of violence to the next generation or social level. Successful strategies consider the context of the violence, such as family, school, community, national, or regional settings, in order to determine the best programs. *Nationalism, Violence and Democracy* SAGE Publications
Annotation Family violence, including

intimate partner violence, elder abuse and child maltreatment, is a serious and deteriorating social problem. This book integrates perspectives from different inter-related disciplines into the development of preventive strategies for family violence.

Violence in the Ancient and Medieval Worlds Bloomsbury Publishing

A thought-provoking revelation of the ways ordinary people-conquerors and conquered, imperialists and the colonized, Christians, Jews, and Muslims-think about war and peace.

Ancient Violence in the Modern Imagination National Academies Press

The collected essays in this volume focus on the presentation, representation and interpretation of ancient violence - from war to slavery, rape and murder - in the modern visual and performing arts, with special attention to videogames and dance as well as the more usual media of film, literature and theatre. Violence, fury and the dread that they provoke are factors that appear frequently in the ancient sources. The dark side of antiquity, so distant from the ideal of purity and harmony that the classical heritage until recently usually called forth, has repeatedly struck the imagination of artists, writers and scholars across ages and cultures. A global assembly of contributors, from Europe to Brazil and from the US to New Zealand, consider historical and mythical violence in Stanley Kubrick's *Spartacus* and the 2010 TV series of the same name, in Ridley Scott's *Gladiator*, in the work of Lars von Trier, and in Soviet ballet and the choreography of Martha Graham and Anita Berber. Representations of Roman warfare appear in videogames such as *Ryse: Son of Rome* and *Total War*, as well as recent comics, and examples

from both these media are analysed in the volume. Finally, interviews with two artists offer insight into the ways in which practitioners understand and engage with the complex reception of these themes.

Violence Against Older Women, Volume II Routledge

In the last decade the far-right, associated with white nationalism, identitarian politics, and nativist ideologies, has established itself as a major political force in the West, making substantial electoral gains across Europe, the USA, and Latin America, and coalescing with the populist movements of Trump, Brexit, and Boris Johnson's 2019 election in the UK. This political shift represents a major new political force in the West that has rolled back the liberal internationalism that developed after WWI and shaped world institutions, globalization, and neoliberalism. It has also impacted upon the democracies of the West. Its historical origins date from the rise of fascism in Italy, Germany, and Austria from the 1920s. In broad philosophical terms, the movement can be conceived as a reaction against the rationalism and individualism of liberal democratic societies, and a political revolt based on the philosophies of Nietzsche, Darwin, and Bergson that purportedly embraced irrationalism, subjectivism, and vitalism. This edited collection of essays by Michael A Peters and Tina Besley, taken from the journal *Educational Philosophy and Theory*, provides a philosophical discussion of the rise of the far-right and uses it as a canvas to understand the return of fascism, white supremacy, acts of terrorism, and related events, including the refugee crisis, the rise of authoritarian populism, the crisis of international education, and Trump's

'end of globalism'.
