Ecce Romani Book 1. Meeting the Family 2nd Edition

Bloomsbury Publishing

This book contains over fifty passages of Latin from 200 BC to AD 900, each with translation and linguistic commentary. It is not intended as an elementary reader (though suitable for university courses), but as an illustrative history of Latin covering more than a millennium, with almost every century represented.

Conventional histories cite constructions out of context, whereas this work gives a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflect linguistic variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets are well represented,

as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify innovations, discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

RUFUS is a Latin reader written to help beginning students gain the confidence and skills necessary to read Latin. This book, the first of two, contains twenty-six stories about Rufus, a young Roman slave. The vocabulary and grammar contained in each story support and reenforce the vocabulary and grammar in the Ecce Romani series. In each self-contained story, Rufus interacts with the Cornelius family. Students will enjoy the ease with which they can read these stories after mastering the vocabulary within each chapter of Ecce Romani. They will also enjoy following Rufus as he struggles to free himself from slavery and the bothersome

Sextus. Follow Rufus from his first days as he works on Cornelius' farm, through his escape, and to his arrival in Rome. Rufus is a smart and courageous young boy who will not let slavery or Sextus keep him down.

Despite their removal from England's National Curriculum in 1988, and claims of elitism, Latin and Greek are increasingly re-entering the 'mainstream' educational arena. Since 2012, there have been more students in state-maintained schools in England studying classical subjects than in independent schools, and the number of schools offering Classics continues to rise in the state-maintained sector. The teaching and learning of Latin and Greek is not, however, confined to the classroom: community-based learning for adults and children is facilitated in newly established regional Classics hubs in evenings and at weekends, in universities as part of outreach, and even in parks and in prisons. This book investigates the motivations of teachers and learners behind the rise of Classics in the classroom and in communities, and explores ways in which knowledge of classical languages is considered valuable for diverse learners in the 21st century. The role of classical languages within the English educational policy landscape is examined, as new possibilities exist for introducing Latin and Greek into school curricula. The state of Classics education internationally is also investigated, with case studies presenting the status quo in policy and practice from Australasia, North America, the rest of Europe and worldwide. The priorities for the future of Classics education in these diverse locations are compared and contrasted by the editors, who conjecture what strategies are conducive to success.

Latin for the New Millennium: Level 2: student text Cambridge University Press

Like any other children, Roma children have the right to education. They are all born with talents and potential, just like other children, and are capable of succeeding and contributing to society - if they are accepted by the majority and educated in inclusive early childhood services and schools. However, many Roma children in Europe continue to face discrimination, segregation and exclusion from quality early childhood care and education (ECCE). Inclusion from the start - Guidelines on inclusive early childhood care and education for Roma children envisions ECCE as an important stepping stone toward inclusive participation in school and society. By fostering good health, well-being, school readiness and the value of equality and living together in the early years, society can help Roma children get a good start in primary school. These guidelines provide guidance on key themes in ECCE - such as the conceptualisation of ECCE services, agenda setting, curricular and pedagogical approaches, staff training and professional development, assessment and transition to primary education - and highlight examples of good practice. It is hoped that they will support the work of policy makers, early childhood educators and their trainers, Roma organisations, NGOs and international organisations and contribute to making a real change in the lives of young Roma children.

Most critics and commentators on The Aeneid refer to Virgil's audience as readers. Yet, before the advent of printing, texts were neither quantitatively multiple nor qualitatively identical. Furthermore, the formatting of texts was not especially reader friendly. This book focuses on chirographic (manuscripted) texts as generally being performed orally and processed aurally. Chirographic texts retained a massive oral residue. The realities of reciting to a listening rather than a reading audience presented a different set of problems to an ancient author than those faced by a modern author writing for a typographically literate audience.

This book for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Updated throughout, this new edition includes information about and analysis of recent Latin textbook publications and curriculum developments across the globe. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt utilizes case-study evidence of excellent practice in

teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK and USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, this book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin.

From the Preface: Most Americans who have studied Latin, with our priests and seminarians included, have employed this method, which they thought was 'traditional'. But as something fully developed, this tradition scarcely goes farther back than 1880; and even in its beginnings it hardly antedates the seventeenth century. In contrast to this method of grammatical analysis, Father Most's textbooks reproduce much of the "natural method" by which children learn their native language. Hence, the significance of Father Most's books is manifestly great for the Latin classes in any Catholic high schools or colleges. So much of

our Catholic doctrine and culture have been deposited in Latin that we want many of our educated Catholics to be able to use Latin with ease. But the special significance of Father Most's texts is for the Latin classes in our seminaries. Here the students still have much the same cogent motives to master the art of using Latin with ease as the pupils of the thirteenth or sixteenth century. They need it as an indispensable means of communicating thought in their higher studies, and afterwards throughout life. The objectives (knowledge about Latin and training of mind) and corresponding methods (grammatical analysis and translation) "traditional" since 1880 have taken over in our seminaries; and there too the students have been experiencing an ever growing inability to use Latin. Father Most's textbooks can contribute much towards revolutionizing the teaching of Latin by bringing back, as the chief objective, the art of reading, writing, and (when desired) speaking Latin with ease." Fr. Most's textbooks can be classed in categories of similar texts, such as Hans Ørberg's *Lingua Latina*, as well as *Ecce Romani* which is a simplification of Ørberg or others which aim to teach Latin not even so much as a modern language, as to teach it by a method more natural to the philosophy of learning Languages. Fr. Most's text follows the view that Latin of the later period is actually more advanced in communicating ideas and is easier to learn than Latin of the classical period, and thus this Second Volume begins the transition with readings and vocabulary from the Vulgate, continuing with the more ancient collects of the

1962 *Missale Romanum*, St. Cyprian and culminating with a reading from the Roman Historian Sallust. This is an excellent text applying the "natural method" with English language instruction to help the student read and understand Latin natively, with numerous vehicles for simplifying the necessary memorization as well as aiding in truly understanding Latin without constant need to look in a dictionary for rudimentary sentences. This is reprinted from the 1960 edition, and follows the presentation of the text found in that edition.
