The Italian-American mafia has its roots in a mysterious and powerful criminal network in Sicily. While the mythology of the mafia has been widely celebrated in American culture, the true origins of its rituals, laws, and methods have never actually been revealed. John Dickie uses startling new research to expose the secrets of the Sicilian mafia, providing a fascinating account that is more violent, frightening, and darkly comic than anything conceived in popular movies and novels. How did the Sicilian mafia begin? How did it achieve its powerful grip in Italy and America? How does it operate today? From the mafia's origins in the 1860s to its current tense relationship with the Berlusconi government, Cosa Nostra takes us to the inner sanctum where few have dared to go before. This is an important work of history and a revelation for anyone who ever wondered what it means to be "made" in the mob.

This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism.

Some of the oldest and most enduring myths involve the tree. Why this is, should be obvious, for without trees there would be no oxygen, fire, heat, wood, paper, nor dwellings -- in short, no life as we know it. Like water, trees are not just metaphors for life, they are life. This book celebrates the tree as it inspires artistic imagination, and gathers together the arboreal images of such artists as Friedrich, Monet, Cezanne, Giacometti, Ernst, Beuys, Baselitz, Penone, and many others, as well as artists and artisans from Africa and the Pacific. Here, those who have identified with trees for their symbolic, aesthetic, and natural principles of life preservation, are represented and discussed, and the role of the tree in folklore, magic, religion, and aesthetics, is considered.

This book presents the multiple facets of English as a Medium of Instruction (EMI) in higher education across various academic disciplines, an area that is expected to grow constantly in response to the competitive global higher education market. The studies presented were conducted in various EMI classrooms, with data collected from observing and documenting the teaching activities, and from interviewing or surveying EMI participants. Through data analysis and synthesis, cases across disciplines – from engineering, science, technology, business, social science, medical science, design and arts, to tourism and leisure service sectors – are used to illustrate the various EMI curriculum designs and classroom practices. Although the cases described are limited to Taiwanese institutions, the book bridges the gap between

planning and executing EMI programs across academic domains for policy makers, administrators, content teachers, and teacher trainers throughout Asia.

Die englische Version des drei ???-Titels "Fussballgangster" ist bereits im Jahr 2009 erschienen und hier besprochen worden (vgl. BA 11/09). Am Inhalt hat sich zur Neuauflage nichts Wesentliches geändert, lediglich das Cover wurde leicht überarbeitet. Text Analysis in Translation has become a classic in Translation Studies. Based on a functional approach to translation and indebted to pragmatic text linguistics, it suggests a model for translation-oriented source-text analysis applicable to all text types and genres independent of the language and culture pairs involved. Part 1 of the study presents the theoretical framework on which the model is based, and surveys the various concepts of translation theory and text linguistics. Part 2 describes the role and scope of source-text analysis in the translation process and explains why the model is relevant to translation. Part 3 presents a detailed study of the extratextual and intratextual factors and their interaction in the text, using numerous examples from all areas of professional translation. Part 4 discusses the applications of the model to translator training, placing particular emphasis on the selection of material for translation classes, grading the difficulty of translation tasks, and translation quality assessment. The book concludes with the practical analysis of a number of texts and their translations, taking into account various text types and several languages (German, English, Spanish, French, Italian, Portuguese, and Dutch).
