Acta Forestalia Fennica Taylor & Francis
Suomi on OECD:n maaseutuvaltaisimpia maita. Se on myös ensimmäisten joukossa omaksunut monialaisen lähestymistavan maaseutupolitiikkaan. Näin ollen Suomen maaseutupolitiikan synty ja kehitys kiinnostavat huomattavasti sekä OECD-maita että muita ...

Archivum Societatis Zoologicae Botanicae Fennica Vanamo Springer

This book provides an extensive, up-to-date overview of the ways in which information and communication

technologies (ICTs) can be used to develop tourism and hospitality. The coverage encompasses a wide variety of topics within the field, including virtual reality, sharing economy and peer-to-peer accommodation, social media use, hotel technology, big data, robotics, and recommendation systems, to name but a few. The content is based on the 2019 ENTER eTourism conference, organized in Nicosia, Cyprus by the International Federation for Information Technologies and Travel & Tourism (IFITT) – the leading independent global community for the discussion, exchange, and development of knowledge on the use and impact of new ICTs in the travel and tourism industry. The book offers a global perspective and

rich source of information on important innovations and novel ideas. Though it will prove especially valuable for academics working in the eTourism field, it will also be of considerable interest to practitioners and students.

Management Theory and Methods

The city has been occupied, burned, and bombed. Its streets have seen people murdered, swindled, and frozen to death. Author and TV crime reporter Jarkko Sipilä tells the stories of Helsinki's dark side, past and present from the double murder in the nineteenth-century slums of

Katajanokka to the homicides of the 21st century, from the opulent meals enjoyed by the upper class in the midst of the famine of 1868 to Finland's first brush with modern terrorism in 1981.

Nordic Tourism Tammi

This multidisciplinary book covers all aspects of planning, designing, establishing and managing forests and trees and forests in and near urban areas, with chapters by experts in forestry, horticulture, landscape ecology, landscape architecture and even plant pathology. Beginning with historical and conceptual basics, the coverage includes policy, design, implementation and management of forestry for urban populations.

Vuosikirja Springer Science & Business Media

In recent decades, the fast rise of emerging economies, like the BRICS nations, has propelled the growth of tourism worldwide. Meanwhile, a plethora of nature destinations has been developed to meet the diverse needs of the new wave of demand from emerging economies and to entice existing tourists from advanced and rich economies.

Nature Tourism augments the current

literature on the benefits and pitfalls in recent developments of nature tourism, tracing the history in development, highlighting the ecological impacts and showcasing the current practices in nature tourism, along with discussions on specific tourist markets from holistic viewpoints embracing lessons learned from various destination nations and continents across the globe. A host of topics with global significance will be explored such as the effect of climate change on nature tourism, technological innovation in managing nature tourism, visitor management in nature tourism and market positioning in a highly competitive environment. These are reviewed in a wide range of countries from USA/Canada, South America, Scandinavian countries, the Swiss Alps, Middle-East countries, Africa, China and Australia/New Zealand. This book will offer significant insight into nature-based tourism and its future development. It will be of interest to upper-level students, researchers and academics in tourism, environmental studies, development and sustainability.

Contingent Valuation Springer
Tourism is an increasingly important

industry in the Nordic countries (Denmark, Finland, Iceland, Norway and Sweden) that is integral to economic, social and sustainable development. *Nordic Tourism* is the first comprehensive and accessible introduction to tourism in the region and also includes case studies from leading Nordic researchers on specific destinations, attractions, resources, concepts and issues.

Consumerism in China has developed rapidly. The Changing Landscape of China's Consumerism looks at the growth of consumerism in China from both a socio-economic and a political/cultural angle. It examines changing trends in consumption in China as well as the impact of these trends on society, and the politics and culture surrounding them. It examines the ways in which, despite needing to "unlock" the spending power of the rural provinces, the Chinese authorities are also keen to maintain certain attitudes towards the Communist Party and socialism "with Chinese Characteristics." Overall, it aims to show that consumerism in China today is both

an economic and political phenomenon and one which requires both surrounding political culture and economic trends for its continued establishment. The ways in which this dual relationship both supports and battles with itself are explored through apposite case studies including the use of New Confucianism in the market context, the commodification of Lei Feng, the new Chinese tourist as a diplomatic tool in consumption, the popularity of Shanzhai (fake product) culture, and the conspicuous consumption of China's new middle class. Provides innovative interdisciplinary research, useful to cultural studies, sociology, Chinese studies, and politics Examines changes in consumerism from multiple perspectives Allows both micro and macro insights into consumerism in China by providing specific case studies, while placing these within the context of geopolitics and grand theory

The Changing Landscape of China's Consumerism Elsevier

Impact assessment can be highly technical and complex, requiring a broad knowledge base and diverse skills, but like evaluation, it is a process fraught with philosophical,

technical and political perils. Why is it done, by whom, and how, must be carefully planned. Impacts cannot always be 'proven', so the nature of evidence becomes critical. Accordingly, a strong theoretical base is needed by all IA practitioners. Whilst economic impacts have received a great deal of attention, with sufficient material available to guide all applications, for social, cultural and environmental IA the theory and practice has lagged. In the context of Triple Bottom Line, social responsibility and sustainability approaches most of the available literature is on normative goals (such as going green, meeting sustainability standards), the nature of positive and negative impacts (a descriptive approach or based on public input), or theory about how impacts occur; very little theory development or praxis has been directed at impact assessment for these applied fields. In response to this lack of information, Event Impact Assessment is the first text to: * Develop professionalism for IA and evaluation in these applied management fields.* Position impact assessment within sustainability and responsibility

paradigms.* Recommend goals, methods and measures for planning, evaluation and impact assessment pertaining to events and tourism.* Encourage the adoption of standard methods and key performance indicators in evaluation and impact assessment in order to facilitate valid comparisons, benchmarking, reliable forecasts, transparency and accountability.* Provide concepts and models that can be adapted to diverse situations.* Connect readers to the research literature through use of Research Notes and provision of additional readings. This text also works well as a companion text to Event Evaluation: Theory and methods for event management and tourism. The Events Management Theory and Methods Series examines the extent to which mainstream theory is being employed to develop event-specific theory, and to influence the very core practices of event management and event tourism. Each compact volume contains overviews of mainstream management theories and methods, examples from the events literature, case studies, and guidance on all aspects of planned-event management. They

introduce the theory, show how it is being used in the events sector through a literature review, incorporate examples and case studies written by researchers and/or practitioners, and contain methods that can be used effectively in the real world. Series editor: Donald Getz. With online resource material, this mix-and-match collection is ideal for lecturers who need theoretical foundations and case studies for their classes, by students in need of reference works, by professionals wanting increased understanding alongside practical methods, and by agencies or associations that want their members and stakeholders to have access to a library of valuable resources.

Government publications in Finland CABI
Ideal for researchers and students of ecotourism, this text comprehensively describes, analyses and evaluates aspects of Scandanavian ecotourism.

Wilderness Science in a Time of Change Conference Edward Elgar Publishing
EKOTURISMI JA ELÄINTEN HYVINVOINTI esittelee YK:n julistaman Kestävän matkailun ja kehityksen vuoden (2017) hengessä viime aikojen tieteellisessä kirjallisuudessa, viranomais- ja

asiantuntijaraporteissa sekä uutistapauksissa julkaistuja tietoja luontoa kunnioittavan matkailun ja erityisesti matkailuun liittyvien eläinlääkintövaikutuksia niin turisteille kuin eläimillekin. Luontomatkailun ja sen tiukimmin rajatun muodon ekoturismien nimissä harjoitetaan mitä moninaisimpia toimintoja, joista hälyttävän suuri osa loukkaa eläinten oikeuksia. Esimerkiksi suosittu ja harmittomina pidettävät norsuratsastukset, delfiiniuinnit ja haisukellukset aiheuttavat kohde-eläimille häiriöitä. Villitykseksi noussut selfie-kuvien ottaminen eläinten kanssa on valitettavan usein eläinrääkkäystä, joka voi pahimmillaan tappaa luontokappaleen. Kestävän luontomatkailun onnistumisen ydin on matkanjärjestäjien, oppaiden ja turistien luontotietoisuuden ja vastuullisuuden lisääminen. Opastus ja neuvonta ovat onneksi lisääntyneet, ja tätä nykyä tunnetaan paljon myönteisiä esimerkkejä luontoa kunnioittavasta ja samalla myös luonnonsuojelua ja paikallista väestöä hyödyttävästä ekoturismista
Proceedings RMRS. BoD - Books on Demand

This major reference work the first of its kind provides a comprehensive and authoritative introduction to the large and growing literature on contingent valuation. It includes entries on over 7,500 contingent valuation papers and studies from over 130 countries covering both the published and grey literatures. This book provides an interpretive historical account of the development of contingent valuation, the most commonly used approach to placing a value on goods not normally sold in the marketplace. The major fields catalogued here include culture, the environment, and health application. This bibliography is an ideal starting point for researchers wanting to find other studies that have valued goods or used techniques similar to those they are interested in. For those wanting to conduct meta analyses, the book will serve as an invaluable guide to source material. For those wanting to conduct meta analyses, the book will serve as an invaluable guide to source material. In addition to the print edition we offer access, for purchasers of the book, to a website providing the contents of as a searchable Word document and in a

variety of standard bibliographic database forms. Contingent Valuation is an indispensable reference source for researchers, scholars and policymakers concerned with survey approaches to the problem of environmental valuation.

This book employs an interdisciplinary, cross-sectoral lens to explore the collaborative dynamics that are currently disrupting, re-creating and transforming the production and consumption of tourism. House swapping, ridesharing, voluntourism, couchsurfing, dinner hosting, social enterprise and similar phenomena are among these collective

innovations in tourism that are shaking the very bedrock of an industrial system that has been traditionally sustained along commercial value chains. To date there has been very little investigation of these trends, which have been inspired by, amongst other things, de-industrialization processes and post-capitalist forms of production and consumption, postmaterialism, the rise of the third sector and collaborative governance. Addressing that gap, this book explores the character, depth and breadth of these disruptions, the creative opportunities for tourism that are emerging from them, and how governments are responding to these

new challenges. In doing so, the book provides both theoretical and practical insights into the future of tourism in a world that is, paradoxically, becoming both increasingly collaborative and individualized.
