*Dark and Magical Places: The Neuroscience of Navigation*  
Wesleyan University Press

A thought experiment in future-shock survivalism' Robert MacFarlane 'Gripping ... of all science fiction's apocalypses, this is one of the most haunting' Financial Times WITH AN INTRODUCTION BY ROBERT MACFARLANE A post-apocalyptic vision of the world pushed to the brink by famine, John Christopher's science fiction masterpiece *The Death of Grass* includes an introduction by Robert MacFarlane in Penguin Modern Classics. At first the virus wiping out grass and crops is of little concern to John Custance. It has decimated Asia, causing mass starvation and riots, but Europe is safe and a counter-virus is expected any day. Except, it turns out, the governments have been lying to their people. When the deadly disease hits Britain, society starts to descend into barbarism. As John and his family try to make it across country to the safety of his brother's farm in a hidden valley, their humanity is tested to its very limits. A chilling psychological thriller and one of the greatest post-apocalyptic novels ever written, *The Death of Grass* shows people struggling to hold on to their identities as the familiar world disintegrates - and the terrible price they must pay for surviving. John Christopher (1922-2012) was the pen name of Samuel Youd, a prolific writer of science fiction. His novels were popular during the 1950s and 1960s, most notably *The Death Of Grass* (1956), *The World in Winter* (1962), and *Wrinkle in the Skin* (1965), all works depicting ordinary people struggling in the midst of apocalyptic catastrophes. In 1966 he started writing science-fiction for adolescents; *The Tripods* trilogy, *the Prince in Waiting*

trilogy (also known as the *Sword of the Spirits* trilogy) and *The Lotus Caves* are still widely read today. If you enjoyed *The Death of Grass*, you might like John Wyndham's *The Day of the Triffids*, also available in Penguin Modern Classics.

*Seize the Night* Park Publishing (WI)

Cities are experiencing a renaissance today, because we've begun to understand how they really work -- and we've begun to make them work better for people. This book is a lively, readable account of two revealing figures in the history of that renaissance: the urban economist Jane Jacobs and the architect Christopher Alexander. Their key insights have shaped several generations of scholars, professionals, and activists. However, as the book argues, this renaissance is still immature, and more must be done to achieve its promise -- especially in an age of rapid, often sprawling urbanization. The author is a noted scholar on both Jacobs and Alexander, and a participant in the development of the "New Urban Agenda," a historic United Nations agreement emphasizing the pivotal role of cities and towns in meeting the challenges of the future. As the book documents, Jacobs and Alexander played key roles in formulating the conceptual insights behind the New Urban Agenda, and they continue to offer us crucial implementation lessons for the years ahead. This book is ideal for students, professionals, government officials, activists, and anyone who is interested in the future of cities. The author, Michael W. Mehaffy, Ph.D., is currently Senior Researcher at KTH Royal Institute of Technology in Stockholm, and Director of the Future of Places Research Network. He is a popular educator, speaker and author with periodic appointments in seven graduate institutions in six countries, and a consultant in sustainable urban development with an international practice. This is his third book. **Consensus Design** McClelland & Stewart

A stunning debut novel with an intriguing literary hook: written in

part as a letter from a victim to her abductor. Sensitive, sharp, captivating! Gemma, 16, is on layover at Bangkok Airport, en route with her parents to a vacation in Vietnam. She steps away for just a second, to get a cup of coffee. Ty--rugged, tan, too old, oddly familiar--pays for Gemma's drink. And drugs it. They talk. Their hands touch. And before Gemma knows what's happening, Ty takes her. Steals her away. The unknowing object of a long obsession, Gemma has been kidnapped by her stalker and brought to the desolate Australian Outback. *STOLEN* is her gripping story of survival, of how she has to come to terms with her living nightmare--or die trying to fight it.

**The Nature of Order: The phenomenon of life** Routledge  
Kraaker's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to

wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page. *Places of the Soul* Simon and Schuster

Welcome to sunny suburban 1960s Southern California. George is a gay middle-aged English professor, adjusting to solitude after the tragic death of his young partner. He is determined to persist in the routines of his former life. *A Single Man* follows him over the course of an ordinary twenty-four hours. Behind his British reserve, tides of grief, rage, and loneliness surge—but what is revealed is a man who loves being alive despite all the everyday injustices. When Christopher Isherwood's *A Single Man* first appeared, it shocked many with its frank, sympathetic, and moving portrayal of a gay man in maturity. Isherwood's favorite of his own novels, it now stands as a classic lyric meditation on life as an outsider.

*The Eco-Home Design Guide* Delacorte Books for Young Readers How does the built environment affect children - their health, their behaviour, education and development? To support them, what do we need to consider and what do we need to do? Can our surroundings foster environmental and social awareness and responsibility? Based on Christopher Day's experiences designing schools and early childhood centres in the United States and Britain, this groundbreaking book sets out to answer these questions and to offer solutions. Children all too often find themselves living in alien surroundings designed with the needs

of adults in mind, cut off not just from the natural environment but also childhood itself. Society's reaction - to cocoon children from the outside world or to resort to drugs to control behaviour - fails to address the fundamental causes of problems which lie in the environment not the children themselves. One of the world's leading thinkers on the impact of buildings on people, Christopher Day's insights offer new light on one of the most important issues for today's society.

**God Is Not Great** Routledge

How the brain helps us to understand and navigate space—and why, sometimes, it doesn't work the way it should. Inside our heads we carry around an infinite and endlessly unfolding map of the world. Navigation is one of the most ancient neural abilities we have—older than language. In *Dark and Magical Places*, Christopher Kemp embarks on a journey to discover the remarkable extent of what our minds can do. Fueled by his own spatial shortcomings, Kemp describes the brain regions that orient us in space and the specialized neurons that do it. Place cells. Grid cells. He examines how the brain plans routes, recognizes landmarks, and makes sure we leave a room through a door instead of trying to leave through a painting. From the secrets of supernavigators like the indigenous hunters of the Bolivian rainforest to the confusing environments inhabited by people with place blindness, Kemp charts the myriad ways in which we find our way and explains the cutting-edge neuroscience behind them. How did Neanderthals navigate? Why do even seasoned hikers stray from the trail? What spatial skills do we inherit from our parents? How can smartphones and our reliance on GPS devices impact our brains? In engaging, engrossing language, Kemp unravels the mysteries of navigating and links the brain's complex functions to the effects that diseases like Alzheimer's, types of amnesia, and traumatic brain injuries have on our perception of the world around us. A book for anyone who has ever felt compelled to venture off the beaten path, *Dark and Magical Places* is a stirring reminder of the beauty in losing yourself to your surroundings. And the beauty in understanding how our brains can guide us home.

*Environment and Children* Penguin UK

"This firsthand account of contemporary history is key to understanding Russia's latest assault on its neighbor."—USA Today An eyewitness account by a U.S. diplomat of Russia's

brazen attempt to undo the democratic revolution in Ukraine Told from the perspective of a U.S. diplomat in Kyiv, this book is the true story of Ukraine's anti-corruption revolution in 2013–14, Russia's intervention and invasion of that nation, and the limited role played by the United States. It puts into a readable narrative the previously unpublished reporting by seasoned U.S. diplomatic and military professionals, a wealth of information on Ukrainian high-level and street-level politics, a broad analysis of the international context, and vivid descriptions of people and places in Ukraine during the EuroMaidan Revolution. The book also counters Russia's disinformation narratives about the revolution and America's role in it. While focusing on a single country during a dramatic three-year period, the book's universal themes—among them, truth versus lies, democracy versus autocracy—possess a broader urgency for our times. That urgency burns particularly hot for the United States and all other countries that are the targets of Russia's cyber warfare and other forms of political skulduggery. From his posting in U.S. Embassy Kyiv (2012–14), the author observed and reported first-hand on the EuroMaidan Revolution that wrested power from corrupt pro-Kremlin Ukrainian autocrat Viktor Yanukovich. The book also details Russia's attempt to abort the Ukrainian revolution through threats, economic pressure, lies, and intimidation. When all of that failed, the Kremlin exacted revenge by annexing Ukraine's territory of Crimea and fomenting and sustaining a hybrid war in eastern Ukraine that has killed more than 13,000 people and continues to this day. *Ukraine's Revolt, Russia's Revenge* is based on the author's own observations and the multitude of reports of his Embassy colleagues who were eyewitnesses to a crucial event in contemporary history.

*The Timeless Way of Building* Taylor & Francis

This volume provides the opening work in Christopher Alexander's seminal trilogy on architecture (continued in *A Pattern Language* and *The Oregon Experiment*). Here he provides a fascinating introduction to the ideas behind the succeeding two books.

*Stolen* Routledge

Once upon a time, Columbus was a hero... Sadly, that's not the case today: Some people don't even know who he was, or what he did; while others claim he was a villain, and are advocating for the abolition of Columbus Day and everything he represented. Accusations vary from Columbus being a racist, a rapist, a

genocidal maniac, and even that he ran a child sex slave ring. The question is, are these allegations true? And, where are the scholars correcting Columbus' record? Unfortunately, some of the misinformation out there comes from "scholars;" and even those who defend Columbus, won't address the actual story either. In this book, the reader will learn who modern history revisionists claim Columbus was, and what he did, vs. the actual historical accounts, coming from the mouths of those who knew him well, and wrote about them for us. The conclusion will be inevitable, that is, Columbus was a Hero, and his story and legacy need to be rediscovered again today.

**The Arab City** Center for Environmental Struc  
Connecticut boasts some of the oldest and most distinctive architecture in New England, from Colonial churches and Modernist houses to refurbished nineteenth-century factories. The state's history includes landscapes of small farmsteads, country churches, urban streets, tobacco sheds, quiet maritime villages, and town greens, as well as more recent suburbs and corporate headquarters. In his guide to this rich and diverse architectural heritage, Christopher Wigren introduces readers to 100 places across the state. Written for travelers and residents alike, the book features buildings visible from the road. Featuring more than 200 illustrations, the book is organized thematically. Sections include concise entries that treat notable buildings, neighborhoods, and communities, emphasizing the importance of the built environment and its impact on our sense of place. The text highlights key architectural features and trends and relates buildings to the local and regional histories they represent. There are suggestions for further reading and a helpful glossary of architectural terms. A project of the Connecticut Trust for Historic Preservation, the book reflects more than 30 years of fieldwork and research in statewide architectural survey and National Register of Historic Places programs.

**Imaginary Friend** Ad Lib Publishers Ltd

Focusing on a plan for an extension to the University of Oregon, this book shows how any community the size of a university or small town might go about designing its own future environment with all members of the community participating personally or by representation. It is a brilliant companion volume to *A Pattern Language*.

*The Battle for the Life and Beauty of the Earth* Bantam

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

*Shifting Patterns* Oxford University Press

Revised to incorporate the changes in opinions and attitudes since its first publication, the second edition of 'Places of the Soul' has brought Christopher Day's classic text into the 21st century. This new edition of the seminal text reminds us that true sustainable design does not simply mean energy efficient building. Sustainable buildings must provide for the 'soul'. For Christopher Day architecture is not just about a building's appearance, but how the building is experienced. 'Places of the Soul' presents buildings as environment, intrinsic to their surroundings, and offers design principles that will open the eyes of the architecture student and professional alike, presenting ideas quite different to the orthodoxy of modern architectural education. Christopher Day's experience as an architect, self-builder, professor and sculptor have all added to the development of his ideas that encompass issues of economic and social sustainability, commercial pressures and consensus design. This book presents these ideas and outlines universal principles that will be of interest and value to architects, builders, planners and developers alike.

**Spirit and Place** Routledge

BONUS: This edition contains an excerpt from Dean Koontz's *The City*. There are no rules in the dark, no place to feel safe, no escape from the shadows. But to save the day, you must...Seize the Night. At no time does *Moonlight Bay* look more beautiful than at night. Yet it is precisely then that the secluded little town reveals its menace. Now children are disappearing. From their

homes. From the streets. And there's nothing their families can do about it. Because in *Moonlight Bay*, the police work their hardest to conceal crimes and silence victims. No matter what happens in the night, their job is to ensure that nothing disturbs the peace and quiet of *Moonlight Bay*.... Christopher Snow isn't afraid of the dark. Forced to live in the shadows because of a rare genetic disorder, he knows the night world better than anyone. He believes the lost children are still alive and that their disappearance is connected to the town's most carefully kept, most ominous secret—a secret only he can uncover, a secret that will force him to confront an adversary at one with the most dangerous darkness of all. The darkness inside the human heart.

*Light Before Day* Brookings Institution Press

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions.

Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

The Oregon Experiment Grand Central Publishing

Instant New York Times Bestseller One of Fall 2019's Best Books (People, EW, Lithub, Vox, Washington Post, and more) A young boy is haunted by a voice in his head in this acclaimed epic of literary horror from the author of *The Perks of Being a Wallflower*. Christopher is seven years old. Christopher is the new kid in town.

Christopher has an imaginary friend. We can swallow our fear or let our fear swallow us. Single mother Kate Reese is on the run. Determined to improve life for her and her son, Christopher, she flees an abusive relationship in the middle of the night with her child. Together, they find themselves drawn to the tight-knit community of Mill Grove, Pennsylvania. It's as far off the beaten track as they can get. Just one highway in, one highway out. At first, it seems like the perfect place to finally settle down. Then Christopher vanishes. For six long days, no one can find him. Until Christopher emerges from the woods at the edge of town, unharmed but not unchanged. He returns with a voice in his head only he can hear, with a mission only he can complete: Build a treehouse in the woods by Christmas, or his mother and everyone in the town will never be the same again. Twenty years ago, Stephen Chbosky's *The Perks of Being a Wallflower* made readers everywhere feel infinite. Now, Chbosky has returned with an epic work of literary horror, years in the making, whose grand scale and rich emotion redefine the genre. Read it with the lights on. *A Pattern Language* Grove/Atlantic, Inc.

Built environment surrounds us for 90% of our lives but only now

are we realising its influence on the environment, our health, and how we think, feel and behave both individually and socially.

*Spirit & Place* shows how to work towards a sustainable environment through socially inclusive processes of placemaking, and how to create places that are nourishing psychologically and physically, to soul and spirit as well as body. This book's unique arguments identify important, but often unrecognised, principles and illustrate their applicability in a wide range of situations, price-ranges and climates. It shows how to reconcile the apparently incompatible demands of environmental, economic and social sustainability; how to moderate climate to make places of delight, and realign social pressures so places both support society and maximise economic viability. Thought provoking and easy to understand, Christopher Day uses everyday examples to relate his theories to practice and our experience.

Places of the Soul Farrar, Straus and Giroux

"The New York Times bestselling business journalist Christopher Leonard infiltrates one of America's most mysterious institutions--the Federal Reserve--to show how its policies over the past ten years have accelerated income inequality and put our country's economic stability at risk"--
