"In this timeless and deeply learned classic, poet and translator Robert Bly offers nothing less than a new vision of what it means to be a man. Bly's vision is based on his ongoing work with men, as well as on reflections on his own life. He addresses the devastating effects of remote fathers and mourns the disappearance of male initiation rites in our culture. Finding rich meaning in ancient stories and legends, Bly uses the Grimm fairy tale "Iron John"—in which a mentor or "Wild Man" guides a young man through eight stages of male growth—to remind us of ways of knowing long forgotten, images of deep and vigorous masculinity centered in feeling and protective of the young. At once down-to-earth and elevated, combining the grandeur of myth with the practical and often painful lessons of our own histories, Iron John is an astonishing work that will continue to guide and inspire men-and women-for years to come!"--

Golf is one of the most popular games in the world. That is a strange thing to say, since almost all serious golfers actually have a love-hate relationship with it. A good round can bring great joy and satisfaction, while a bad round can end in depression, a binge at the bar, arguments with one’s partner and the need for prompt evasive action by the family cat. Although this book is written in a light-hearted manner, it contains a wealth of information about every aspect of the game. Learn about its long and speckled history and some of the quirky characters who have graced the links. It also has some advice on putting and chipping, two parts of the game which cause the occasional golfer frustration, heartache and sore knees after repeated attempts to break the clubs. Failing that you will find a selection of fascinating anecdotes about the game’s greats and plenty of intriguing trivia.

A concise and accessible introduction to exoplanets that explains the cutting-edge science behind recent discoveries For centuries, people have speculated about the possibility of planets orbiting distant stars, but only since the 1990s has technology allowed astronomers to detect them. At this point, more than five thousand such exoplanets have been identified, with the pace of discovery accelerating after the launch of NASA’s Transiting Exoplanet Survey Satellite and the Webb Space Telescope. In *The Little Book of Exoplanets*, Princeton astrophysicist Joshua Winn offers a brief and engaging introduction to the search for exoplanets and the cutting-edge science behind recent findings. In doing so, he chronicles the dawn of a new age of discovery—one that has rapidly transformed astronomy and our broader understanding of the universe. Scientists now know that many Sun-like stars host their own systems of planets, some of which may resemble our solar system and include planets similar to the Earth. But, Winn tells us, the most remarkable discoveries so far have been of planets with unexpected and decidedly un-Earth-like properties, which have upended what we thought we knew about the origins of planetary systems. Winn provides an inside view of the sophisticated detective work astronomers perform as they find and study exoplanets and describes the surprising—sometimes downright bizarre—planets and systems they have found. He explains how these discoveries are revolutionizing astronomy, and he explores the current status and possible future of the search for another Earth. Finally, drawing on his own and other scientists’ work, he considers how the discovery of exoplanets and their faraway solar systems changes our perspectives on the universe and our place in it.

2019 Paterson Prize winner Skipping Stones Book Award Kirkus Reviews' Best YA Historical Fiction of 2018 A river runs through young Manny Maldonado Jr.'s life, heart and imagination. Sometimes at night it even shoots through his brain like a bullet. But this river isn't water, it's iron—the tracks and trains of the Southern Pacific railroad that pass along his tight-knit neighborhood in the San Gabriel valley just ten miles east of L.A. The iron river is everything to Man-on-Fire, Man for short to his friends, Little Man to his uncles and cousins. He watches it, he waits for it, he plays nears its tracks, he listens for the weight of its currents (strong currents flowing east pulling two hundred boxcars, light current going west with less than fifty cars), he whiles away long summer days throwing rocks and bricks at it with his friends Danny, Marco and Little. They line up cans and bottles in mock battles to try to throw it off track. But nothing derails the iron river, and nothing stops the stinking cop Turk from trying to pin a hobo's murder on the four young boys.
