Ethiopia Business Law Handbook Volume 1 Strategic Information and Basic Laws Walter de Gruyter GmbH & Co KG

Emphasising an empirical research to contemporary legal pluralist settings in Muslim contexts, the present collected volume contributes to a deepened understanding of legal pluralist issues and realities through comparative examination. This approach reveals some common features, such as the relevance of Islamic law in power struggles and in the construction of (state or national) identities, strategies of coping with coexisting sets of legal norms by the respective agents, or public debates about the risks induced by the recognition of religious institutions in migrant societies. At the same time, the studies contained in this volume reveal that legal pluralist settings often reflect very specific historical and social constellations, which demands caution towards any generalisation.

Ethiopia is one of the world's oldest countries; its Rift Valley may be the location where the ancestors of humankind originated more than four million years ago. With a population of 67 million people today, it is the third most populous country on the African continent after Nigeria and Egypt. It is the source of 86 percent of the water reaching the Aswan Dam in Egypt, most of it carried by the amazing Blue Nile. Ethiopia offers major historical sites such as the pre-Christian palace at Yeha, the stele and tombs of the old Kingdom of Axum, and the rock-carved churches of Lalibela. For anyone interested in Ethiopia, this historical dictionary, through its individual and carefully cross-referenced entries, captures the importance and intrigue of this truly significant African nation. *Historical Dictionary of Ethiopia* appeals to all levels of readers, providing entries for each of Ethiopia's 85 ethnic groups and covering a broad range of cultural, political, and economic topics. Readers interested in the cultural aspects or who are planning to visit Ethiopia will find a wealth of entries on art, literature, handicrafts, music, dance, bird life, geography, and historic tourist sites. Practitioners in government and non-governmental organizations will find entries on pressing economic, social, and political issues such as HIV/AIDS, female circumcision, debt, human rights, and the environment. The important historical role of missionaries and the combination of conflict and cooperation between Christians and Muslims in the region are also issues reviewed. And, finally, many of the entries highlight relations between Ethiopia and her neighbors-Eritrea, Somalia, Somaliland, Djibouti, Kenya, and Sudan. In the bibliography, considerable emphasis has been placed on including both new and old materials covering all facets of Ethiopia, organized for easy identification by areas of major interest.

The Routledge Handbook of the Horn of Africa provides a comprehensive, interdisciplinary survey of contemporary research related to the Horn of Africa. Situated at the junction of the Sahel-Saharan strip and the Arabian Peninsula, the Horn of Africa is growing in global importance due to demographic growth and the strategic importance of the Suez Canal. Divided into sections on authoritarianism and resistance, religion and politics, migration, economic integration, the military, and regimes and liberation, the contributors provide up-to-date, authoritative knowledge on

the region in light of contemporary strategic concerns. The handbook investigates how political, economic, and security innovations have been implemented, sometimes with violence, by use of force or by negotiation - including 'ethnic federalism' in Ethiopia, independence in Eritrea and South Sudan, integration of the traditional authorities in the (neo)patrimonial administrations, Somali Islamic Courts, the Sudanese Islamist regime, people's movements, multilateral operations, and the construction of an architecture for regional peace and security. Accessibly written, this handbook is an essential read for scholars, students, and policy professionals interested in the contemporary politics in the Horn of Africa.

Africa, with its mix of statute, custom and religion is at the centre of the debate about law and its impact on gender relations. This is because of the centrality of the gender question and its impact on the cultural relativism debate within human rights. It is therefore important to examine critically the role of law, broadly constructed, in African societies. The book focuses on women's experiences in the family. This is because the lives of women continue to be lived out largely in the private domain, where the right to privacy is used to conceal unequal treatment of women which is justified by invoking 'custom' and 'tradition'. The book shows how law and its interpretation is used to disenfranchise women, resulting in their being deprived of land and other property which they may have helped to accumulate. It also considers issues of violence within the home, reproductive rights and examines the issue of female genital cutting. The role of women in development is explored as is their participation in politics and the NGO sector. A major theme of the book is a consideration of the linkages of constitutional and international human rights norms with local values. This is done using feminist tools of analysis. The book considers the provisions of the Protocol to the African Charter on Human and People's Rights on the Rights of Women which was adopted by the African Union in July 2003.

Democracy is a concept reflecting European philosophies, struggles and concerns. Many Ethiopian ethnic groups have traditions which may offer more satisfactory and culturally acceptable foundations for a "sovereignty of the people" through time-honored ways of voicing political ideas, ironic observations and vital interests. In line with modern urban life Ethiopians also organize and express their interests in non-governmental organizations, the independent press and advocacy groups representing political and social alternatives. The contributors to this book analyze the democratic potential of these movements and practices, their ability to give a voice to the view from below and their potential contribution to a more genuine participation by the majority of Ethiopians in democratic decision making and bringing the sovereignty of the people a step closer to reality. *Bibliographia Aethiopia II* Cambridge University Press Derived from the renowned multi-volume *International Encyclopaedia of Laws*, this convenient resource provides systematic information on how Ethiopia deals with the role religion plays or can play in society, the legal status of religious communities and institutions, and the legal interaction among religion, culture, education, and media. After a general introduction describing the social and historical background, the book goes on to explain the legal framework in which religion is approached. Coverage proceeds from the principle of religious freedom through the rights and contractual obligations of religious communities; international, transnational, and regional law effects; and the legal parameters affecting the influence of religion in politics and public life. Also covered are legal positions on religion in such specific fields as church financing, labour and employment, and matrimonial and family law. A clear and comprehensive overview of relevant legislation and legal doctrine make the book an invaluable reference source and very useful guide. Succinct and practical, this book will prove to be of great value to practitioners in the myriad instances where a law-related religious interest arises in Ethiopia. Academics and researchers will appreciate its value as a thorough but concise treatment of the legal aspects of diversity and multiculturalism in which religion plays such an important part.

Ethiopia has had four constitutions throughout its history: the 1931 version, the 1955 version, the 1987 version, and the 1995 version; which is currently in effect. Until the adoption of the first of these constitutions, the concepts of Ethiopian government had been codified in the Kebra Nagast (which presented the concept that the legitimacy of the Emperor of Ethiopia was based on its asserted descent from king Solomon of ancient Israel), and the Fetha Nagast (a legal code used in Ethiopia at least as early as 1450 to define the rights and responsibilities of the monarch and subjects, as defined by the Ethiopian Orthodox Tewahedo Church).

Having just emerged from a prolonged civil war and faced with the urgent tasks of establishing political stability and reinvigorating an economy in tatters, the Transitional Government of Ethiopia (1991-1995) had to set a new direction for the economic reconstruction and social rehabilitation of the war-torn and poverty-ridden country. During the Transitional Period a spate of new policies and strategies defining the development priorities, goals and implementation instruments of the new regime led by the EPRDF was introduced. This work is a synthesis of various sectoral policies and an attempt to trace the genesis of the policies, highlight the continuities, significant departures and other salient features. Each of the reviews in this digest briefly analyses the critical elements of the policies, identifies major gaps in the conceptualisation of the policy as well as the achievements registered and the challenges encountered in its implementation. The authors also try to identify the outstanding issues to be addressed by policymakers and suggest remedies. The policy reviews have been grouped into three parts and presented under social, economic and governance sectors. *Historical Dictionary of Ethiopia* Universal-Publishers

This first volume of EThYL focuses on issues concerning the developing world in general and (the Horn of) Africa - and Ethiopia - specifically. It argues that rebalancing the international law narrative to reflect Africa's legitimate interests is an urgent priority, and can only succeed through the fair representation of African countries in the creation and interpretation of international law. The book begins by reflecting on the ICJ's West African Cases and provides a unique perspective on decolonisation as a source of jus cogens and obligations erga omnes. This is followed by a comprehensive analysis of the reception of international law in the Ethiopian legal system, and of the potential implications of Ethiopia joining the WTO. The book then delves into such topical issues as the relationship between competition for natural resources and international investment law, the UN Global Goals and the fledgling international climate change regime, with particular emphasis on the Paris Climate Agreement and their implications for developing countries. Further issues include the Declaration of Principles on the Grand Ethiopian Renaissance Dam signed by Ethiopia, Sudan and Egypt in light of Nile colonial treaties and contemporary international watercourses law, as well as selected legal implications of the armed conflict in South Sudan. Gathering high-quality scholarship from diverse researchers, and examining a constellation of critical international law issues affecting developing countries, especially African countries, the book offers a unique resource.

In "Islamic Family Law in a Changing World," Abdullahi A. An-Na'im explores the practice of the Shari'a, commonly known as Islamic Family Law. An-Na'im shows that the practical application of Shari'a principles is often modified by theological differences of interpretation, a country's particular customary practices, and state policy and law.
