 Financial management refers to the efficient and effective management of money (funds) in such a manner as to accomplish the objectives of the organization. It is the specialized function directly associated with the top management. The significance of this function is not only seen in the 'Line' but also in the capacity of 'Staff' in overall administration of a company. It has been defined differently by different experts in the field. It includes how to raise the capital, how to allocate it i.e. capital budgeting. Not only about long term budgeting but also how to allocate the short term resources like current assets. It also deals with the dividend policies of the share holders.
 DEFINITION of 'Strategic Financial Management '
 Managing an organization's financial resources so as to achieve its business objectives and maximize its value.
 Strategic financial management involves a defined sequence of steps that encompasses the full range of a company's finances, from setting out objectives and identifying resources, analyzing data and making financial decisions, to tracking the variance between actual and budgeted results and identifying the reasons for this variance. The term "strategic" means that this approach to financial management has a long-term horizon.
