Hatred is often considered the opposite of love, but in many ways is much more complicated. It also may be considered one of the

dominant emotions of our time, as individuals, groups, and even nations express or enact hatred to varying degrees. What is hatred? Where does it come from and what does it reveal about the hater? And is hatred always a bad thing? Brogaard makes a deep dive into the moral psychology of one of our most complex, and vivid emotions. She explores how hatred arises between people and among groups. She also shows how hate, like anger, can sometimes be appropriate and fitting. Other other questions she addresses are, how does hate differ from anger, disgust, fear, and other related emotions? Is fear an essential part of hatred? How does hatred affect what happens inside the brain? How did hate evolve in human history? Is hatred ever morally justified? Can you hate and love at the same time? Can one hate oneself? How do implicit biases trigger hatred of groups? This accessible,

timely, and novel look at an underexplored emotion will employ examples from current events as well as art and literature and popular culture.

"The house of fiction," wrote Henry James, "has . . . not one window, but a million." In this, his latest work, Gerald Murnane, one of Australia's most acclaimed contemporary authors, takes these words as his starting point, and asks: Who, exactly, are that house's residents, and what do they see from their respective rooms? His answer, *A Million Windows*, is a gorgeous (if unsettling) investigation into the glories and pitfalls of storytelling. Focusing on the importance of trust and the inevitability of betrayal in writing as in life, its nested stories explore the fraught relationships between author and reader, child and parent, boyfriend and girlfriend, husband and wife. Murnane's fiction is woven from images—the reflections of the setting sun on distant windowpanes, seemingly limitless grasslands, a procession of dark-haired women, a clearing in a forest, the colors indigo and silver-grey, and the mysterious death of a young woman—which build to an emotional crescendo that is all the more powerful for the intricacy of its patterning.

Hatred Oxford University Press

This book examines the manifestations of terror in the arts. From classical tragedy to post-9/11 responses, terror – as an emotion, violent act, and state of the world – has been a preoccupation of artists in all genres. Using philosophy, art history, film studies, interdisciplinary arts, theatre studies, and musicology, the authors included here delve into this perennially contemporary theme to produce insights articulated in a variety of idioms: from traditional philosophical humanism to phenomenology to feminism. Their approaches may vary, but together they reinforce the notion that terror is a thread in the fabric of artistic expression as much as it has always been and, alas, remains a thread in the fabric of life.

Bestselling authors Mary Buffett and David Clark examine seventeen companies that Warren Buffett has bought for himself and for his holding company, Berkshire Hathaway, as durable investments and explain why these companies are once again selling at prices that offer great long-term growth prospects. Warren Buffett has always believed that the time to buy stocks is when nobody else wants them. As we enter the fifth year of what many economists are calling the Great Recession, we find that some of the most amazing businesses—those with a durable competitive advantage—are trading at prices and price-to-earnings ratios that offer investors serious long-term moneymaking opportunities. Pessimism about the banking situation in Europe and unemployment in America have created the perfect storm to bring stock prices down and present value-oriented investors some great possibilities. In Warren Buffett's world, as stock prices decrease, the prospects for investment increase. Putting a number on those prospects tells Warren whether or not the stock is an attractive buy. The Warren Buffett Stock Portfolio explains how to do just that—how to value companies and conservatively estimate the kind of future return that an investment is offering at its current market price. Mary

Buffett and David Clark look at stocks in Warren's portfolio as the basis for their analysis. After a brief history of Warren's investment strategy, Buffett and Clark explain how to interpret a company's per-share earnings and per-share book-value histories to quickly identify which companies have a durable competitive advantage and to project the compounding annual rate of return that an investment offers. The authors provide case studies and evaluations of seventeen companies in Warren Buffett's portfolio. The Warren Buffett Stock Portfolio is a valuable companion to the other books in Buffett and Clark's successful series—Buffettology, The Buffettology Workbook, The New Buffettology, The Tao of Warren Buffett, Warren Buffett and the Interpretation of Financial Statements, Warren Buffett's Management Secrets, and Warren Buffett and the Art of Stock Arbitrage.
