Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination.

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

This book contains the first 10 lessons from our Conversation & Listening series. These lessons have been developed to help young adult students who are stuck at the low to mid-intermediate plateau to develop both their listening and spoken fluency. Each of the 10 units represents around 120 mins of learning materials. Pedagogical approach The series contains lessons on a wide range of topics that encourage students to respond to the materials in a personal and authentic way. The pedagogical approach to the use of the materials draws on a more student-centred and humanistic understanding of the way language skills are learned and developed. Blended learning The blended learning activities that are included in each unit are intended to extend the students learning and help to develop their learner independence. The activities can be used at the discretion of the teacher either in a flipped way to prepare students for the lessons or to consolidate and extend what students have learned during the lessons. These activities have been developed to help students develop their writing skills, activate their vocabulary, improve their pronunciation and further develop their listening skills. Each unit contains at least 5 interactive activities that students can do either on their computer or mobile device. Examples: Writing activity: <https://bit.ly/mp-writing> Summarising activity: <https://bit.ly/ath-video-sum> Vocabulary activity: <https://bit.ly/dm-vocab> Listening close activity: <https://bit.ly/mov-close> Dictation activity: <http://bit.ly/athlete-dict> Pronunciation check: <https://bit.ly/mov-pron-check> (Google Chrome users only) Physical and virtual classroom use The materials have been designed to be user-friendly for both the physical and the virtual classroom with audio files built into the slides and a wide range of materials that students can scan onto mobile devices to make listening or role play type activities easier to manage. Topics Unit 1 - Study skills and habits Unit 2 - Mobile phone and social media use Unit 3 - Dream homes and houses Unit 4 - Holidays and travel Unit 5 - Music and playing an instrument Unit 6 - Shopping and clothes styles Unit 7 - Sport and exercise Unit 8 - Films and going to the cinema Unit 9 - Interviews and talking about ourselves Unit 10 - Describing products and making presentations

enough for new teachers to use; flexible enough for the *Macmillan English, Level 1* Macmillan Higher Education Here is a typical classroom scenario: out of the thirty children, two-thirds speak a different language at home and only speak English at school. Even though many pupils' English skills are almost non-existent, teachers are expected to provide the national curriculum for every child in the class. Teaching Children English as an Additional Language solves this problem with a ten-week teaching programme of units and lesson activities for children aged seven-eleven (Key Stage 2) new to English. It will help these children learn some very basic English sentences, questions and vocabulary, to get them through regular day-to-day routines more easily. By offering a flexible step by step approach this book helps EAL teachers to: identify learners' individual needs teach grammar and vocabulary support teaching through speaking and listening assess pupils to inform future planning The programme also contains emergency lessons to support learners in the first three days, cross curricular links, ways of using a home-school learning book and an opportunity for the child to make a booklet about themselves. It fosters the child's home language, incorporates different learning styles as well as including a wealth of carefully tailored, themed resources. The programme is complete with activities, resources and assessment materials and helpful tips on how to develop a successful EAL department.

An understanding of social policy is vital for engaging practically with social work values, dealing with political and ethical questions about responsibility, rights, our understanding of 'the good society'. This textbook provides a comprehensive introduction to social policy, tailored to the needs of a social work audience. Jonathan Dickens analyses current policies and policy themes relevant to social work, and locates them in the context of fundamental social policy principles and debates. He discusses the nature of social policy and its relationship to social work, and covers essential themes such as: service user participation and involvement the balance between individual, societal and state responsibility for people's wellbeing the proper roles of the state, the private sector, voluntary organisations and the family the relationships between needs, rights and choices the purposes and challenges of professional social work the meanings of 'inclusion' and 'personalisation'. Each chapter ends with activities for reflection and analysis, and suggestions for further reading. *Social Work and Social Policy* is invaluable for students undertaking social work qualifying courses, all of whom are required to demonstrate an understanding of the social policy contexts of practice.
