BMW began its life in aero-engineering--as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book, the best of the best get their due, with brilliant, full-color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary marque. From

the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II, to the latest bikes with the revamped opposed-twin-cylinder "boxer" engines that brought BMW its first fame--these are the bikes that made history, and, better yet, gave the most demanding riders a taste for flight.

How to Restore Your Harley-Davidson Haynes Publishing
When it comes to their personal transportation, today's youth have shunned the large, heavy

performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is

must-have for the Honda enthusiast.

Adventure Motorcycling Handbook
Haynes Manuals N. America, Incorporated
The Complete Book of BMW Motorcycles offers a thorough year-by-year

guide to every production machine ever built by Germany's leading motorcycle manufacturer. From the first model, the 1923 R32 that launched BMW's motorcycle dynasty, to the latest (and fastest) superbike, the S1000RR, this book captures nearly a century of motorcycling excellence in a combination of historic and contemporary photos. Technical specs are provided for each model. This comprehensive review covers all of BMW's bike families: The side-valve machines from the early years The early overhead-valve performance bikes The modern Airheads and Oilheads The four-cylinder and six-cylinder touring bikes The early pushrod singles The modern overhead-cam singles The latest parallel twins, and inline-four cylinder sport bikes Among them, you'll find all the classic bikes—pre-World War II BMWs like the R5 that defined performance in that era; the military R12 that carried the Wehrmacht as it blitzkrieged its way across Europe; the Earles-forked R69S that offered the perfect platform for mounting a Steib sidecar; the R90S café racer; the

K1 “flying brick”; and the GS (Gelände Sport) series that launched a dual-sport revolution right up to today's world-class S100RR and retro-inspired R nine T. Like the other titles in Motorbooks' Complete Book series, this guide to BMW's motorcycle output offers the most complete reference to the subject available.

BMW R1200 Twins

Haynes Manuals N. America, Incorporated For the "Retired Blues Crew", a small group of retired LAPD police officers that meet once a month to share old war stories and enjoy each other's company, accepting retirement was a hard pill to swallow. Once considered savvy street warriors who risked life and limb protecting the good citizens of Los Angeles, they were now the forgotten hero's whose past heroic deeds were now only remembrances visited through their colorful story telling during their once a month get-togethers. Like all things in life, they were all expendable and the guys in the "Retired Blues Crew" had been replaced by a new generation of street warriors. To the old dogs who were put out to pasture, the new centurions were taking their places with new technology and a confidence that bordered on disrespect for those who had paved the way

before them. The argument that the old days of crushing crime without the benefit of all the new-fangled gadgets was more rewarding than the technology of the future was a misconception of the new breed that were now in charge of protecting the citizens of Los Angeles. For the select group of old story tellers, they needed to add one more chapter in their lives, something for the street warriors of the present to remember them by when their time finally came and they were reduced to second class citizens too old to do the job anymore. This small tight knit group of old street warriors had enough and it was time to prove beyond a shadow of a doubt that they weren't too old to out-smart and out-wit the high tech rouges who have now taken their places. Proving that computers and gadgets could never replace the wisdom and experience that the old dogs were blessed with wouldn't be an easy task, but they were determined to challenge the new breed and beat them at their own game. They knew whatever it was they were going to do couldn't replicate anything like the violent

movies you see were people die, get hurt or cars get wrecked and buildings are blown up, after all they were cops or at least they were once. That being said, the old dogs had to pull off the perfect caper and they had to do it without claiming any of the bragging rights they so much yearned for. It would have to be for no other reason than "For Greater Glory." In that one of their own had been diagnosed with cancer with less than six months to live, they only had a small window of opportunity to get it done. Since he was the architect behind the perfect crime referred to as "Operation Blue Eclipse," their success would depend on how well the plan was executed with no room for error. If all went as planned and after all was said and done, the Retired Blues Crew would truly know who the best of the best was.
