Anatomy is Destiny is the first monograph of artist Marina Font. Her photo-based work explores ideas about identity, gender, territory, language, memory and the forces of the unconscious. The book's title, stemming from Freud, also speaks to the ever-evolving understanding of gender and self-realization in the 21st century. The unique pieces reproduced in *Anatomy is Destiny* stem from a single source photograph made by Font of a nude female figure. Reminiscent of Da Vinci's Vitruvian Man, but with arms down and palms forward, the black and white photograph is both consistent and variant as Font renders each piece through application of embroidery, paint, yarn, and other materials. Through the rituals of these traditionally feminine practices, she, in her own words, "opens a dialogue between biology and psychology, our social and private persona in the evolving mutability of womanhood."

In a world of turmoil, art matters more than ever. Art can bring about political action, even social revolution. Art reminds us of the things that really matter. It lifts our eyes to eternity and show us the importance of the here and now. With illustration from contemporary art and reference to theatre and film, this book shows the importance of art for all, not just the professionals. Creativity helps humans to flourish and reflects the character of a creative God. This is a book to return to time and again for inspiration and encouragement. Illustrated by author Alastair Gordon, *Why Art Matters* encourages us to embrace creativity at home, church, in play and professionally in the creative arts and industries.

In *Art Matters*, Robert Paul Lamb provides the definitive study of Ernest Hemingway's short story aesthetics. Lamb locates Hemingway's art in literary historical contexts and explains what he learned from earlier artists, including Edgar Allan Poe, Paul Cézanne, Henry James, Guy de Maupassant, Anton Chekhov, Stephen Crane, Gertrude Stein, James Joyce, and Ezra Pound. Examining how Hemingway developed this inheritance, Lamb insightfully charts the evolution of the unique style and innovative techniques that would forever change the nature of short fiction. *Art Matters* opens with an analysis of the authorial effacement Hemingway learned from Maupassant and Chekhov, followed by fresh perspectives on the author's famous use of concision and omission. Redefining literary impressionism and expressionism as alternative modes for depicting modern consciousness, Lamb demonstrates how Hemingway and Willa Cather learned these techniques from Crane and made them the foundation of their respective aesthetics. After examining the development of Hemingway's art of focalization, he clarifies what Hemingway really learned from Stein and delineates their different uses of repetition. Turning from techniques to formal elements, *Art Matters* anatomizes Hemingway's story openings and endings, analyzes how he created an entirely unprecedented role for fictional dialogue, explores his methods of characterization, and categorizes his settings in the fifty-three stories that comprise his most important work in the genre. A major contribution to Hemingway scholarship and to the study of modernist fiction, *Art Matters* shows exactly how Hemingway's craft functions and argues persuasively for the importance of studies of articulated technique to any meaningful understanding of fiction and literary history. The book also develops vital new ways of understanding the short story genre as Lamb constructs a critical apparatus for analyzing the short story, introduces to a larger audience ideas taken from practicing storywriters, theorists, and critics, and coins new terms and concepts that enrich our understanding of the field.

From the host of *Fox News @ Night*, a deeply personal book about finding purpose and growth amid life's unpredictability. "What a gift this book will be to your soul."—Lysa TerKeurst Whether it's her work today as a reporter and host for *Fox News*, her years in law school, or the time she spent competing in pageants like *Miss America*, Shannon Bream has spent her entire adult life

navigating high-pressure environments where perfection is expected and competition is the name of the game. But in this laugh-out-loud book of stories and inspiration, Shannon shares the moments away from the cameras and the halls of government, in which she learned that the values and faith of her blue-collar upbringing could keep her grounded in a world where everyone wants you to be something other than who you are. In *Finding the Bright Side*, Shannon continues a conversation about authenticity, humility, and trusting in God that she's already begun with her followers on social media. She shares behind-the-scenes stories from Washington, D.C., revelations from her time reporting on the Supreme Court, and lessons learned from the most challenging moments of her life—from the time she was fired from her first job and told, "You're the worst person I've ever seen on TV," to the time she heard "There is no cure." But through all of this, faith (and a little bit of stubbornness!) has helped Shannon to keep hope, find purpose in the pain, and find laughs along the way. Praise for *Finding the Bright Side* "Integrity. Faith. Diligence. Success. Shannon's book—and life—elevate these cherished values. For anyone hoping to move forward without compromising convictions, this book is a must read."—Max Lucado, pastor and bestselling author "In *Finding the Bright Side*, Shannon reveals that her sunny face and disposition is not just from good genetics. Her success is long in coming and well-deserved. She is sheer joy in a bottle."—Kathie Lee Gifford, bestselling author of *The Rock*, *The Road* and *The Rabbi*

Experts translate the latest findings on embodied cognition from neuroscience, psychology, and cognitive science to inform teaching and learning pedagogy. Embodied cognition represents a radical shift in conceptualizing cognitive processes, in which cognition develops through mind-body environmental interaction. If this supposition is correct, then the conventional style of instruction—in which students sit at desks, passively receiving information—needs rethinking. *Movement Matters* considers the educational implications of an embodied account of cognition, describing the latest research applications from neuroscience, psychology, and cognitive science and demonstrating their relevance for teaching and learning pedagogy. The contributors cover a range of content areas, explaining how the principles of embodied cognition can be applied in classroom settings. After a discussion of the philosophical and theoretical underpinnings of embodied cognition, contributors describe its applications in language, including the areas of handwriting, vocabulary, language development, and reading comprehension; STEM areas, emphasizing finger counting and the importance of hand and body gestures in understanding physical forces; and digital learning technologies, including games and augmented reality. Finally, they explore embodied learning in the social-emotional

realm, including how emotional granularity, empathy, and mindfulness benefit classroom learning. *Movement Matters* introduces a new model, translational learning sciences research, for interpreting and disseminating the latest empirical findings in the burgeoning field of embodied cognition. The book provides an up-to-date, inclusive, and essential resource for those involved in educational planning, design, and pedagogical approaches. Contributors Dor Abrahamson, Martha W. Freedom. It's the ability to do whatever you want, whenever you want. It's the ultimate reward of selling your business. But selling a company can be confusing, and one wrong step can easily cost you dearly. *The Art of Selling Your Business: Winning Strategies & Secret Hacks for Exiting on Top* is the last in a trilogy of books by author John Warrillow on building value. The first, *Built to Sell*, encouraged small business owners to begin thinking about their business as more than just a job. The Automatic Customer tagged recurring revenue as the core element in a valuable company and provided a blueprint for transforming almost any business into one with an ongoing annuity stream. Warrillow completes the set with *The Art of Selling Your Business*. This essential guide to monetizing a business is based on interviews the author conducted on his podcast, *Built to Sell Radio*, with hundreds of successfully cashed-out founders. What's the secret for harvesting the value you've created when it's time to sell? *The Art of Selling Your Business* answers important questions facing any founder, including— • What's your business worth? • When's the best time to sell? • How do you create a bidding war? • How can you position your company to maximize its attractiveness? • Who will pay the most for your business? • What's the secret for punching above your weight in a negotiation to sell your company? *The Art of Selling Your Business* provides a sleeves-rolled-up action plan for selling your business at a premium by an author with consummate credibility.

Original essays offering fresh ideas and global perspectives on contemporary feminist art The term 'feminist art' is often misused when viewed as a codification within the discipline of Art History—a codification that includes restrictive definitions of geography, chronology, style, materials, influence, and other definitions inherent to Art Historical and museological classifications. Employing a different approach, *A Companion to Feminist Art* defines 'art' as a dynamic set of material and theoretical practices in the realm of culture, and 'feminism' as an equally dynamic set of activist and theoretical practices in the realm of politics. Feminist art, therefore, is not a simple classification of a type of art, but rather the space where feminist

politics and the domain of art-making intersect. The Companion provides readers with an overview of the developments, concepts, trends, influences, and activities within the space of contemporary feminist art—in different locations, ways of making, and ways of thinking. Newly-commissioned essays focus on the recent history of and current discussions within feminist art. Diverse in scope and style, these contributions range from essays on the questions and challenges of large sectors of artists, such as configurations of feminism and gender in post-Cold War Europe, to more focused conversations with women artists on Afropean decoloniality. Ranging from discussions of essentialism and feminist aesthetics to examinations of political activism and curatorial practice, the Companion informs and questions readers, introduces new concepts and fresh perspectives, and illustrates just how much more there is to discover within the realm of feminist art. Addresses the intersection between feminist thinking and major theories that have influenced art theory Incorporates diverse voices from around the world to offer viewpoints on global feminisms from scholars who live and work in the regions about which they write Examines how feminist art intersects with considerations of collectivity, war, maternal relationships, desire, men, and relational aesthetics Explores the myriad ways in which the experience of inhabiting and perceiving aged, raced, and gendered bodies relates to feminist politics in the art world Discusses a range practices in feminism such as activism, language, education, and different ways of making art The intersection of feminist art-making and feminist politics are not merely components of a unified whole, they sometimes diverge and divide. A Companion to Feminist Art is an indispensable resource for artists, critics, scholars, curators, and anyone seeking greater strength on the subject through informed critique and debate.

Joseph Masheck wants to take art, historical and modern, as a field of lively interrelations (as if in "random-access memory"

retrieval), rather than just second the motion that art history should be nonlinear; and he takes the task of art criticism to be theory in practice. Thus significant new art is represented in the thirty essays in Modernities, besides already "classic" modern architecture, sculpture, and photography, and contemporary painting by artists. Alternating between a comprehensive sense of art history and engagement with the new and unplumbed contemporary arts, he considers himself a kind of aesthetic double agent. Because Masheck is concerned with the concrete standing of artworks, he speculates on how works of art, including Marcel Duchamp's "ready-mades," relate to other things. More general themes range from the origin of the modern sense of form in prehistoric art to the historical underpinnings of expressionism and on to latter-day "graffiti" culture.

This book explores the life and theories of Michael Balint, who kept alive Ferenczi's analytic traditions in Budapest and brought them to London, where they became a vital part of the Independent Group's theory and practice. Balint's theoretical understanding of regression, 'new beginnings', 'basic fault', as well as his profound impact on medicine, are all described. The work in the Balint groups by general practitioners, psychiatrists, and physicians are explored. Whole person and psychosomatic medicine, championed by Balint, is contrasted with today's more compartmentalised approach to medicine, including the increasing separation of the GP from the family. In the second part of the book Dr Sklar reflects on the complex tasks involved in psychodynamic assessment. Vignettes illustrate the importance of understanding the forces in family dynamics, the value of an early memory and a dream, and the sexual life of the patient. The author argues that Balint's ideas are of particular significance to us today, in our world of quick fixes and the overspecialisation of medicine.

A collection of intensive discussions about the role of visual arts in public life The past decade has seen American culture deeply

divided by debates over social identity, public morality, communal values and freedom of expression. A key focus of these polarizing discussions has been the role of visual arts in public life. In Art Matters, five leading cultural critics and two prominent contemporary artists show the ways that this debate has profoundly reshaped our view of American culture. Lucy Lippard investigates the extraordinary recent transformations in visual art; Michele Wallace takes on high art, popular culture, and African American identity; David Deitcher discusses queer culture and AIDS; Carole S. Vance ponders censorship and sexually explicit imagery; and Lewis Hyde considers democracy and culture. Projects by artists Julie Ault and Andrea Fraser provide a context for these debates. Art Matters also offers a close examination of attempts to develop alternative funding sources for artists, focusing specifically on the influential private foundation Art Matters—a foundation which became an important proponent for new forms of art and for protecting freedom of expression through its funding and advocacy efforts.

A new reality for the art object has emerged in the world of contemporary art: it is now experienced less as an autonomous, inanimate form and more as an active material agent. In this book, Kaira M. Cabañas describes how such a shift in conceptions of art's materiality came to occur, exploring key artistic practices in Venezuela, Brazil, and Western Europe from the mid-twentieth century to the present. Immanent Vitalities expands the discourse of new materialisms by charting how artists, ranging from Gego to Laura Lima, distance themselves from dualisms such as mind-matter, culture-nature, human-nonhuman, and even Western-non-Western in order to impact our understanding of what is animate. Tracing migrations of people, objects, and ideas between South America and Europe, Cabañas historicizes changing perceptions about art's agency while prompting readers to remain attentive to the ethical dimensions of materiality and of social difference and lived experience.
