**Planetaryium Activity Book** Candlewick Press

Discover more than 160 exhibits in this virtual museum, open all hours. Welcome to the museum! There are more than 160 historical artifacts to be discovered in Welcome to the Museum: Historium. Wander the galleries of this museum whenever you wish—it's open 365 days a year!—and discover a collection of curated objects on every page, accompanied by informative text. Each chapter features a different ancient civilization, from the Silla dynasty of Korea to ancient Rome.

**Botanicum** Penguin UK

7-year-old Innosanto spends an exciting night with his mom sleeping under the stars in the Jakarta Planetaryium. Innosanto's father is a playwright and the boy memorizes lines during the actors' rehearsals, so they invite him to join the performance, which tours the country. The play is about a General, who doesn't treat people very well, "so they decided to do a play about how that was wrong." Fact: Indonesia aka The Spice Islands is the place Christopher Columbus was looking for when he crashed in the New World. Fact: Indonesia is made up of 17000 islands where people speak over 750 different languages. Fact: when Inno was a child, speaking out against the government could land you in jail. On the last night of the performace Inno packs a toothbrush ("they figured if you're going to go to jail for a long time, you may as well have your toothbrush with you so you can keep your teeth clean. (true story)."), the curtains go down, and with soldiers on the way, the actors scatter into hiding. On its surface, My Night in the Planetaryium is a modern Indonesian children's story about one night in the late '70s that the author got to spend in the Jakarta planetaryium. But it's actually much more than that. It's an introduction to the history and culture of Indonesia. It's about colonialism, revolution, how power corrupts, and how through art and solidarity liberation can be won.

**Matter** Kids Can Press Ltd

Showcases dozens of full-color space images in a gallery format, complemented by scientific information and brief descriptions.

*Sebastião Salgado. Amazônia* Macmillan

Welcome to the museum! There are more than 160 animal specimens to be discovered in Animalium, the first in a series of virtual museums. Wander the galleries - open 365 days a year - and discover a collection of curated exhibits on every page, accompanied by informative text. Each chapter features a different branch of the tree of life, from the simple sponge to the enormous elephant.

*Planetaryium Junior Edition* National Academies Press

A boy, a science project and an answer to a critical problem. During monsoon season in Bangladesh, Iqbal's mother must cook the family's meals indoors, over an open fire, even though the smoke makes her and the family sick. So when Iqbal hears that his school's science fair has the theme of sustainability, he comes up with the perfect idea for his entry: he'll design a stove that doesn't produce smoke! Has Iqbal found a way to win first prize in the science fair while providing cleaner air and better health for his family at the same time? Sometimes it takes a kid to imagine a better idea — make that an ingenious one!

**Oceanarium** Big Picture Press

Science-loving Delia Bean is expecting to have a pretty boring summer vacation, but when her Uncle Lyndon offers her an internship in his Earth Time Museum, everything begins to look better.

**Animalium Activity Book** Candlewick Press

Many of North America's most beloved regions are artfully celebrated in these boardbooks designed to soothe children before bedtime while instilling an early appreciation for the continent's natural and cultural wonders. Each book stars a multicultural group of people visiting the featured area's attractions—such as the Rocky Mountains in Denver, the Georgia Aquarium in Atlanta, Lake Ontario in Toronto, and volcanoes in Hawaii. Rhythmic language guides children through the passage of both a single day and the four seasons while saluting the iconic aspects of each place.

**A Brief Welcome to the Universe** Harry N. Abrams

This stunning new offering from the Welcome to the Museum series guides readers around the world's oceans, from sandy shorelines to the darkest depths. This stunning new offering from the Welcome to the Museum series guides readers around the world's oceans, from sandy shorelines to the darkest depths. Learn about the ocean's most fascinating animals, including giant whale sharks, tiny tropical fish, and majestic manatees, among many others. With expert text by marine biologist Loveday Trinick and stunning illustrations by Teagan White, travel the world from frozen Arctic seas to shimmering coral reefs, and learn why it is so important that we protect our oceans.

*Welcome to the Universe* Templar Publishing

Welcome to the museum that is always open to explore... Step inside the pages of this beautiful book to discover galleries of dinosaurs, expertly curated to bring you the experience of a fascinating exhibition from the comfort of your own home. Dinosaurium features a wide range of dinosaurs from the most-loved Triceratops and Tyrannosaurus Rex to lesser-known species such as Coelophysis and Tsintaosaurus. With stunning artwork from Chris Wormell (known for the cover of H is for Hawk and his picture books including George and the Dragon) and informative text with input from

experts in palaeontology, Dinosaurium is the perfect gift for anyone with an interest in this fascinating field. Welcome to the Museum is a series of beautifully illustrated, stunningly curated, informative books for all ages. From Animalium and Botanicum to Historium and Dinosaurium there is a book for everyone to discover and explore.

*Fungarium* Candlewick Press

Imagine having a sleepover at the museum for your birthday! The perfect story for museum lovers and adventure-seekers alike! Mason couldn't wait to celebrate his birthday with a sleepover at the museum of natural history--his favorite place to visit. Armed with headlamps for the dark hallways, a map, and a list of clues, Mason and his two best friends take off on a scavenger hunt through each hall of the museum. But they aren't just trying to solve the clues. They're scouting for the best place to spend the night. Sleeping next to a T. rex in the Hall of Dinosaurs felt too scary. And sleeping with the monarch butterflies would probably tickle. This decision isn't as easy as Mason thought it would be.... Wherever they end up, the museum at night is the best place for a birthday adventure!

**Dinosaurium** Princeton University Press

If you go outside on a clear night, you can't help yourself. Your head tilts back, your eyes rise up, and you find yourself gazing at the stars . . . WOW! From the beginning of time, people have admired the night sky's beauty. The night sky is our oldest picture book, and Wishing on a Star retells some of these stories from around the world in simple language that kids can understand. Wishing on a Star also includes lots of fun activities that celebrate the stars. Learn how to make a twinkling thaumatrope, fly a starry kite, and act in your own constellation play. Star maps and stargazing tips show how to find the constellations, and cool science facts teach more about the stars.

**This Book Is a Planetaryium: And Other Extraordinary Pop-Up Contraptions (Popup Book for Kids and Adults, Interactive Planetaryium Book, Cool Books for Adults)** Oxford University Press, USA

A beautiful colouring book from the creator of the bestselling Animalium.Packed with creatures great and small, from the tiniest polyp to the mighty lion, this beautiful colouring book is perfect for all animal-lovers. Wander the galleries - open 365 days a year - and discover a collection of curated exhibits on every page, accompanied by informative text. Each chapter features key species from a different geological era with fantastic new artwork from Katie Scott.

*Good Night Chicago* Kings Road Publishing

A pocket-style edition based on the New York Times bestseller A Brief Welcome to the Universe offers a breathtaking tour of the cosmos, from planets, stars, and galaxies to black holes and time loops. Bestselling authors and acclaimed astrophysicists Neil deGrasse Tyson, Michael A. Strauss, and J. Richard Gott take readers on an unforgettable journey of exploration to reveal how our universe actually works. Propelling you from our home solar system to the outermost frontiers of space, this book builds your cosmic insight and perspective through a marvelously entertaining narrative. How do stars live and die? What are the prospects of intelligent life elsewhere in the universe? How did the universe begin? Why is it expanding and accelerating? Is our universe alone or part of an infinite multiverse? Exploring these and many other questions, this pocket-friendly book is your passport into the wonders of our evolving cosmos.

**Planetaryium** Nomad Press

Following Historium, the latest addition to the Welcome to the Museum series, comes this fantastic companion activity book. Bursting with fascinating facts and puzzles, this book offers hours of entertainment to artists and budding historians alike. Beautiful and inspiring, the myriad of activities in this book challenge the reader to discover something new and use their imagination to draw, decorate and design on every pull-out page.A collection of full-colour, immaculately detailed images from unparalleled new talent, Richard Wilkinson.Play historian with imaginative activities that invite you to engage with the art and culture of ancient worlds.This title, alongside Historium Poster Book, builds on the success of the original Historiumtitle and the Welcome to the Museum series.

**Historium Activity Book** Good Night Books

A curated guide to dinosaurs creates the experience of an exhibition that features a wide range of dinosaurs from lesser known species such as coelophysis and tsintaosaurus to the much-loved triceratops and Tyrannosaurus rex.

*Oceanarium* Dragonfly Books

What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a "leaf safari" for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science

can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A completely revised edition of the best-selling resource guide *Science for Children: Resources for Teachers*, this new book is an annotated guide to hands-on, inquiry-centered curriculum materials and sources of help in teaching science from kindergarten through sixth grade. (Companion volumes for middle and high school are planned.) The guide annotates about 350 curriculum packages, describing the activities involved and what students learn. Each annotation lists recommended grade levels, accompanying materials and kits or suggested equipment, and ordering information. These 400 entries were reviewed by both educators and scientists to ensure that they are accurate and current and offer students the opportunity to: Ask questions and find their own answers. Experiment productively. Develop patience, persistence, and confidence in their own ability to solve real problems. The entries in the curriculum section are grouped by scientific area—Life Science, Earth Science, Physical Science, and Multidisciplinary and Applied Science—and by type—core materials, supplementary materials, and science activity books. Additionally, a section of references for teachers provides annotated listings of books about science and teaching, directories and guides to science trade books, and magazines that will help teachers enhance their students' science education. *Resources for Teaching Elementary School Science* also lists by region and state about 600 science centers, museums,

and zoos where teachers can take students for interactive science experiences. Annotations highlight almost 300 facilities that make significant efforts to help teachers. Another section describes more than 100 organizations from which teachers can obtain more resources. And a section on publishers and suppliers give names and addresses of sources for materials. The guide will be invaluable to teachers, principals, administrators, teacher trainers, science curriculum specialists, and advocates of hands-on science teaching, and it will be of interest to parent-teacher organizations and parents.

*Botanicum Activity Book* Little, Brown Books for Young Readers

Part botany, part history, part cultural anthropology--Trees goes beyond the basics to tell readers everything they might want to know about this particular branch of the plant kingdom. Trees explores the important roles trees play in our ecosystem, takes an up-close-and-personal look at the parts of trees (from roots to leaves), and unpacks the cultural impact of trees from classification systems (like family trees) to art forms (like bonsai trees). Looking forward, Trees also addresses the deforestation crisis. Heavily illustrated in the same style as *Bees: A Honeyed History*, *Trees: A Rooted History* serves as a beautifully packaged celebration of trees of all kinds.

*The Time Museum* Gibbs Smith

First published by Big Picture Press, an imprint of Bonnier Books UK, 2021.
